

The Midden Index

Winter 2012

Amazingly Successful Summer Paleontology Inventory
Investigating Ideal Rattlesnake Relocation Distances
Lehman Cave Restoration
2012 Diptera BioBlitz
Forest Service Assists Park with Forest Health Issues
Re-Discovering Abandoned Mine Lands: The Johnson Lake Mine
Fire Needed to Maintain Healthy Ecosystems
Determining Carnivore Occurrence with Remote Cameras
Hymenoptera BioBlitz Update

Summer 2012

New Park Records for Two Reptile Species
Five New Species of Flies Discovered
Newly Discovered Pure Bonneville Cutthroat Trout Population
The Nevada Climate-Ecological Assessment Network
Documenting the History of Abandoned Mine Lands
Recent Publications about Great Basin National Park
Aspen Stand Condition Assessment
Baker Lake Fish Genetics
25th Anniversary of Park Dedication

Winter 2011

Hymenoptera Bioblitz Nets New Species to Park and Science
How Old is Lehman Cave?
Lehman Caves Stalagmite Gives Ice Age Clues
A Point in Time--Learning about Projectile Points
New Plants Added to Park List
Using Fire Regime Condition Class to Prioritize Restoration
Kious Basin Ecological Restoration Project
New Fly Species Announced
Recent Publications about Great Basin National Park

Summer 2011

Index Fossils Found
Cave Freshwater Shrimp Named
Remote Camera Surveys Target Mesocarnivores
Rocks of the Ages: Rock Art Culture Affiliation and Styles
Recent Publications about Great Basin National Park
New Vegetation Map Reveals Need for Restoration
A New Jumping Insect and Its Genes
Weed Management through Integrated Pest Management
Year-Round Hydrologic Monitoring of Lakes

Winter 2010

Rattlesnake Telemetry Shows New Movement Trends
Sabegbrush Voles Found
Bioblitz Update
Strawberry Creek Restoration
Tilford Cabin and Bonita Camp
Tin Cans Speak
Bonneville Cutthroat Trout Update
Recent Research Projects
SNOTEL Site Installed

Summer 2010

An 800-Year Fire History
2010 Lint Camp
Telling Time from the Trash
Growth of Cultural Resources
Buckeyes Back in Park
Recent Publications
Future for Native Trout
Aerial Detection Surveys
Second Annual Bioblitz

Winter 2009

Park Hosts First Bioblitz
Rattlesnake Telemetry Study
Bristlecone Pine Growth
15 Tons of Debris Removed
12 Plant Species Added
Cultural Resource Update
Aerial Photos Show Changes
Invasive Weeds Treated
Recent Publications
The Newest Cave Species

Summer 2009

Bighorn Sheep in the Snake Range: Status and Restoration
Recent Publications
Cultural Resource Accomplishments and Changes
Stella Lake: A Glimpse to the Past
New Genus of Millipede
Water Resources Monitoring
Park Staff Assist Mojave Preserve
Beetle Bioblitz

Winter 2008

Alpine Plant Monitoring

New Park Projects
Groundwater Withdrawal Effects on Small Mammals
Climate Change History in GRBA
Extirpated Fish Recovery
Cave Biota Report Released

Summer 2008

Cleaning Lehman Cave: 2008 Lint Camp
Cave Restoration in Talus Room
Bonneville Cutthroat Trout
Great Basin Cottonwoods
Important Bird Areas
Stable Isotopes as a Tool in Preserving Park Resources
Earthquakes in the Great Basin
Lehman Cave Map Turns 50

Winter 2007

Value and Beauty in GRBA's Night Sky
Lincoln Cirque Restoration
Detailed Park Geologic Map
2007 Water Quality Inventory
New Soil Survey for Park
Resource Management Briefs
Johnson Historic District
Alpine Cave Biota Survey

Summer 2007

Restoration of Johnson Lake Mine Historic District
Improved Cave Lighting
New Millipede Named
Glacial Chronology
WNPA Grant Awarded
Stream Habitat Surveys
Ants Underfoot
Junipers of GRBA
Snow Survey Results

Winter 2006

Cave Bioinventory: New Discoveries and Ongoing Research
What's Eating Our Trees?
Pulse of the Trees
Published Research
Data Mining in the Park
Mapping Lehman Caves
Nutcrackers, Squirrels, and Pines
Climate Change Study

Small Mammals
Alpine Areas May Shrink
Fish Populations Increase

Summer 2006

USGS Study Shows Park Waters Susceptible to Pumping
Elusive Kingsnakes Uncovered
Return of the Sage Grouse
Interpreting Aspen Carvings
Caves Reveal New Creatures
New Lights in Cave
Winter Tracking
Out of the Mud: Triops

Winter 2005

Thirty New Archeological Sites Found
22 Avalanches Discovered
Battling Invasive Plants
Great Basin Dark Skies
Restoration of Four Fish Species
Creel Survey Results
Potential Natural Vegetation
Grey Cliffs Restoration
Museum Update
Finding Small Carnivores
Road to Trail Conversion
Life in Lehman Caves

Summer 2005

Bonneville Cutthroat Trout in Fourth Stream
Sage Grouse Return
Snow Survey Results
Research in the Park
Bighorn Habitat Restoration
Carnivore Tracking
Wildlife Observations
Snake Food
Why Are the Trees Dying?

Winter 2004

Archeological Surveys Reveal New Finds
High Beetle Diversity in Sagebrush Habitat
Discovering Great Basin Birds
Trout Populations on the Rise
425+ Springs Found in Park
2004 Wildlife Projects

New Cultural Resources Database
German National Parks-A Comparison
Cave Program

Summer 2004

Two New Marmot Colonies Discovered
Update on Bighorn Sheep
Getting out of the Heat
Pygmy Rabbits Found
Spring Runoff below Average in 2004
Researchers Find New Species in Park Caves

Winter 2003

Bonneville Cutthroat Trout Reproducing Well in New Streams
Beavers Found in the Park
Tracking Elk Reveals Surprises
Fish Populations Increase in Baker and Lehman Creeks
A Closer Look at Marmots
New Caves Discovered
Rock Art in GRBA
Aquatic Inventory Results
Great Basin Weather Stations

Summer 2003

Carnivores Captured in Park
Returning the Landscape to a Natural Community
First Amphibian Found in Park
Electrofishing Survey Reveals Surprise Brown Trout
Searching for Springs
