

WATER CONSERVATION ALERT | EVERY DROP COUNTS

HOW TO MAKE ESSENTIAL LAUNDRY COUNT

Wash only what's needed, in full loads, while Stage 4 remains in effect.

1

1. Choose what is essential

Prioritize needed clothing, towels, and bedding. Delay nonessential laundry.

2

2. Wash full loads

Wait for a full load, without overloading. Follow the machine capacity instructions so items can move and get clean.

3

3. Prepare before washing

Treat stains before loading. Measure detergent according to the label to help avoid rewashing or extra rinsing.

4

4. Use the right settings

Choose the cycle and water level for the load. Skip the extra rinse unless care instructions require it.

Save water throughout the day

Turn off taps while brushing teeth or shaving. Chill drinking water instead of running the tap to cool it. Do not wash vehicles or water plants or lawns outdoors.

For shared laundry, follow your housing office's current limits and hours.

Report leaks or plumbing problems to your housing office. Not sure who that is? Ask your supervisor.

Stage 4 remains in effect. Use only the water you need.
