

WATER CONSERVATION ALERT | EVERY DROP COUNTS

HOW TO TAKE A NAVY SHOWER

Water on to get wet. Water off to wash and lather. Water on briefly to rinse.

1

1. Water on: briefly get wet

Have supplies ready. Collect warm-up water, move the bucket aside, and briefly wet your body and hair.

2

2. Water off: wash and lather

Turn off the water at the shower controls. Apply soap and shampoo and wash while the water is off.

3

3. Water on: test and rinse

Turn the water back on. Test the temperature with your hand before stepping into the spray. Rinse off soap and shampoo.

4

4. Water off: finish and reuse

Turn the water off as soon as you are rinsed. Dry off. Reuse collected water for flushing or household cleaning.

Keep it brief

Keep showers to 5 minutes or less, with the water off while lathering. Lay out supplies first so the water is not running while you look for them.

Do not add or change shower fixtures. Keep buckets and supplies out of your walking space.

Report leaks or plumbing problems to your housing office. Not sure who that is? Ask your supervisor.

Stage 4 remains in effect. Use only the water you need.
