

WATER CONSERVATION ALERT | EVERY DROP COUNTS

HOW TO USE WIPES AND KEEP HANDS CLEAN

Use your wipes for simple cleaning to save water. Never skip essential handwashing.

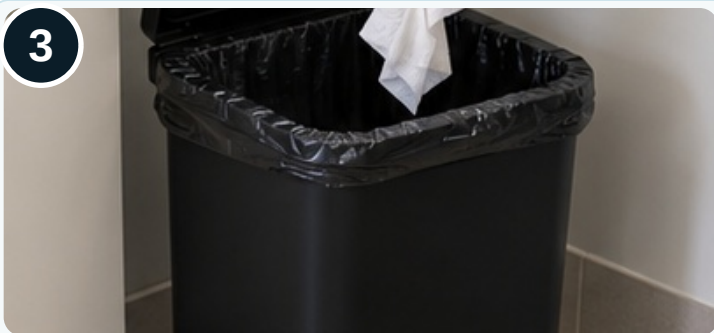

1. Personal cleaning

Use only wipes labeled for skin, following package directions. Do not use household disinfecting wipes on your body.

2. Household cleaning

Use wipes only on surfaces listed on the label. Follow contact times and any required rinse for food-contact surfaces.

3. Every wipe goes in the trash

Do not flush wipes, including those labeled "flushable." Flush only human waste and toilet paper.

4. Wash hands with soap

Wet hands; turn off the tap. Lather and scrub for at least 20 seconds. Rinse under running water; dry with a clean towel.

Keep essential handwashing

Wash before preparing or eating food, after using the toilet, and after changing diapers. Wipes do not replace necessary handwashing. Keep the tap off while scrubbing.

Report leaks or plumbing problems to your housing office. Not sure who that is? Ask your supervisor.

Stage 4 remains in effect. Use only the water you need.
