

American Goldfinch

(Spinus tristis)

- Goldfinches are very strict vegetarians and try to eat only vegetables and seeds
 - When you see goldfinches fly, they bounce and roller coaster up and down, often chirping as they fly
 - Goldfinches love to nest in weedy fields, open floodplains, and other overgrown plant areas with shrubs and trees
-
- Size: Extra Small
 - Color: Adult males are bright yellow with black forehead and wings. Females are a duller yellow. In winter both are brown with blackish wings
