

Cave Survey Synopsis

April 11, 2013

Team members:

Kelly Mathis (trip leader)

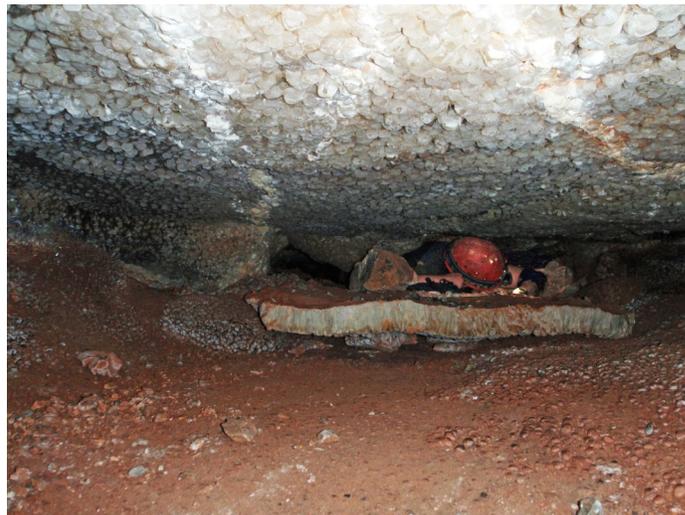

Jessica Reese

Adam Weaver

This trip was a continuation of efforts to map passages in the G survey area, north of the Scenic Tour route.

The team began by going to a tight lead that had been discovered in January. They were able to negotiate the squeeze, only to find that it connects to a room that was surveyed in 1991.

The cavers then traveled to where they had left off in February, and finished surveying the remaining

leads in that area. 269.30 feet were surveyed on this 5 hour trip.

The current length of Jewel Cave is 166.45 miles.
