

Forest Insects and Diseases

Hemlock Woolly Adelgid on Eastern hemlock needles.

USDA Forest Service

**Thursday, May 1st
7:00 – 9:00 PM**

USDA Forest Service State and Private Forestry entomologist Dennis Souto and Barbara Burns, Vermont Agency of Natural Resources Forest Protection Regional Supervisor, will offer an evening slide show of common and not so common inhabitants of the northern forest. Learn to recognize insects and diseases by the bug themselves, or the evidence they leave behind.

Hear the latest updates on Hemlock Woolly Adelgid, Emerald Ash Borer, and other introduced exotic pests that you should be on the watch for in your forest.

**At the Marsh-Billings-Rockefeller National Historical Park
Carriage Barn Visitor Center
Woodstock, Vermont**

These workshops are free and open to the public.

To register, please call (802)457.3368x22.

The Working Woodlands series is a collaborative effort of the U.S. Forest Service, National Park Service, and Vermont Agency of Natural Resources to provide educational opportunities in the tools and techniques of sound forest stewardship to land owners and resource professionals. These workshops are offered in partnership with many conservation organizations throughout the region, including:
