

Help Prevent the Spread of Asian Carp

Avoid using the locks

Silver carp leap out of the water when disturbed.

Young bighead carp look like other bait fish.

Asian carp threaten our rivers and lakes. In addition to avoiding lock use, you must...

- Drain your boat, bait containers, and wells
- Not move bait or fish from water body to another
- Not harvest bait from the Mississippi or St. Croix Rivers
- Not use live minnows above the St. Croix Falls dam
- Report sightings and catches to MN DNR at 651-259-5100
