Eastside Trail

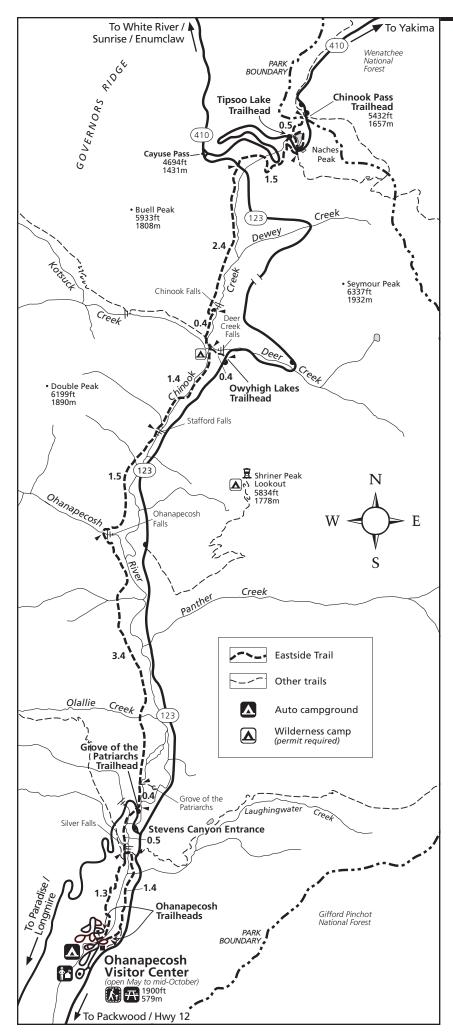

This extensive route connects the subalpine highlands of Chinook Pass and Tipsoo Lake with the deep, lowland forests of the Ohanapecosh area by following the Chinook Creek and Ohanapecosh River drainages.

Many hikers choose to begin at the trail's upper end and complete the entire trail as a one-way, downhill trip from Chinook Pass to Ohanapecosh. However, trailheads provide access to the trail at several locations along its length, allowing day-hikers to enjoy shorter sections of the trail. Refer to the map on the reverse side for details.
