

Upper Bay: milky water
from glacial erosion

This is an aerial photograph of a rugged, mountainous landscape. The terrain is covered in snow and ice, with numerous green, forested peaks and valleys. A large body of water, likely a bay or fjord, is visible in the center. Several smaller bodies of water, including lakes and inlets, are scattered throughout the landscape. The water in the bay is a milky blue color, indicating glacial erosion. The surrounding mountains are steep and rocky, with patches of snow and ice. The overall scene depicts a high-altitude, glacial environment.
