National Register of Historic Places Continuation Sheet

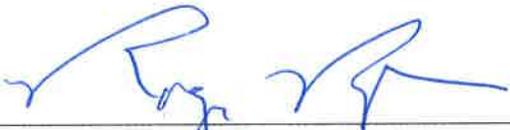

Section number Amendment Page 1

Oregon State University Historic District
NRIS # 08000546
Date Listed: June 25, 2008

The purpose of this continuation sheet is to amend the boundary for the National Register of Historic Places nomination for the Oregon State University Historic District and to request a change in status for the 1947 Gilmore Annex at 2650 SW Campus Way, located within the district, from non-contributing/not-in-period to contributing.

On March 18, 2009 the Oregon State Historic Preservation Office submitted a request to revise the district boundary to exclude two properties mistakenly included in the district. These changes were accepted by the National Park Service on April 15, 2009. Since that submission, it was discovered that some of the details and measurements given in the revised boundary description do not accurately reflect the current boundary. To correct this error, a new verbal boundary description and justification are provided on a continuation sheet. A new boundary and photo location map showing the correct boundary are also included.

At the time the district nomination was first submitted for consideration in May 2008, the 1947 Gilmore Annex at 2650 SW Campus Way was identified as a non-contributing not-in-period building. This classification is an error. The building's correct construction date is clearly listed in the property list submitted with the nomination and is within the period of significance for the district that extends from 1888-1957. To address this mistake, a revised Section 5 Classification and Section 7, page 1 reflecting the correct property count are provided. Also included is a revised statistical printout and property list.

DESCRIPTION

SUMMARY

The Oregon State University (OSU) Historic District is located on the main campus of Oregon State University in Corvallis, Oregon. The university campus lies west of the downtown commercial center of Corvallis on a slight rise known as "College Hill." The historic district itself is generally bounded by Monroe and Orchard Avenues on the north, 30th Street on the west, Washington Way and Jefferson Avenue on the south, and 11th Street on the east. There are a total of 83 resources within the district; 60 of them are considered contributing and 23 are considered non-contributing. The district reflects the development of the main university campus from its beginnings in the late 1880s through the post-World War II era (1888-1957).

NOTE: Buildings in Section 7 are called by their current names rather than historic names (unless they are the same) to avoid confusion about the names that have been used for more than one building over time. Buildings on the appended Site Map are referenced by their building numbers as assigned by OSU. To obtain a building's building number, see the attached property list.

GENERAL DESCRIPTION

The OSU Historic District encompasses several buildings and structures and a number of open spaces. There are expanses of lawns, extensive landscaping, and tree-lined streets and walkways. Most of the district is laid out on a north-south grid, although the original buildings at the east end of the district conform to original city plat grids oriented to the Willamette River, which sit at an angle to the north-south grid.

Buildings are mostly two, three, and four stories in height. Foundations are nearly all poured concrete; however, some are raised so that portions of the basement levels are above ground. The majority of buildings are brick, but only the oldest examples are brick bearing wall. Others are brick veneer with wood and/or steel framing. The brick is red and mortar is light gray. Only a few of the oldest buildings and a couple of the newer co-op houses are wood-framed with wood siding. Some older buildings have stone (granite and/or sandstone) foundations and walls, and there is at least one building where it is clad with stucco. Some buildings constructed after World War II are clad with newer materials, such as metal panels. Interior framing is generally wood and/or steel. Windows are primarily double-hung wood sash, often with multiple lights, but there are some examples of industrial metal sash and windows that operate on a pivotal opening. Roofing materials vary, but include, primarily, asphalt shingle and rolled built-up roofing materials.

Stylistically, the oldest buildings (those constructed before 1908) show styles that were popular during their time of construction. Those constructed between about 1909 and the mid-1940s show elements of a restrained classical approach with detailing limited primarily to entrance surrounds and cornices. Occasionally (as in the Memorial Union or Weatherford Hall) there is a higher degree of exterior ornamentation, but for the most part, buildings from this time period are fairly uniform in overall architecture. Ornamentation on these buildings is largely created from stone or terra cotta, although there appears to be an occasional example of concrete as ornamentation. Buildings constructed after the mid-1940s show a movement toward a more modernist

Section number 10 Page 1

VERBAL BOUNDARY DESCRIPTION

Beginning at a point at the southeast intersection of NW 26th Street and SW Monroe Avenue in the city of Corvallis, Benton County, Oregon, the boundary line runs southeasterly along the south side of SW Monroe Avenue to the southwest corner of the intersection with NW 11th Street. Turning south, the boundary line proceeds along the west side of NW 11th Street to the northwest corner of the intersection with SW Jefferson Way. From this intersection, the boundary runs 1250 feet west along the north side of SW Jefferson Way, then turns south and runs 150 feet to a point. From this point, the boundary proceeds east 40 feet, then south 635 feet (around McAlexander Fieldhouse), and then in a westerly direction to the west side of SW 26th Street (the boundary runs south of the Goss Stadium outfield and north of the Navy ROTC Armory). The boundary line then turns south and runs along the west side of SW 26th to the northwest corner of the intersection with Ralph Miller Lane. Turning west, the boundary proceeds west 360 feet along the north side of Ralph Miller Lane before turning north to the north side of SW Washington Way. From this point, the boundary runs west approximately 1485 feet along the north side of SW Washington Way and then turns north 250 feet to a point. The boundary then proceeds 420 feet to the east, then turns north 180 feet, and then turns east again to the west side of the sidewalk on the west side of SW 30th Street. From this point, the boundary proceeds north along the west side of the sidewalk to the north side of SW Campus Way. From here, the boundary runs 505 feet west along the north side of SW Campus Way before turning north for 135 feet, then 60 feet west, then 75 feet north, then 65 feet east, and then north to the south side of NW Orchard Avenue. From this point, the boundary proceeds east along the north side of NW Orchard Avenue. It then proceeds 353 feet east, then 120 feet south, turns 150 east and then north to the south side of NW Orchard Avenue. The boundary then proceeds east approximately 1,290 feet along the south side of NW Orchard Avenue. Finally, it proceeds north along the east side of SW 26th Street, returning to the point of origin.

BOUNDARY JUSTIFICATION

The district boundary includes the highest concentration of buildings from the identified period of significance and that are historically associated with Oregon State University, as well as significant open spaces near the west and eastern boundaries of the district that maintain historic integrity. The northern and eastern boundaries abut SW Monroe Avenue, NW Orchard Avenue and NW 11th Street, which are the edge of residential and commercial neighborhoods, distinct from the university. The northern boundary excludes two properties along Orchard Avenue that are not owned by Oregon State University and are not part of campus. In general, the southern and western boundaries abut newer construction, except where included within the boundaries.
