Submitted October 2015

Summary:

The intent of this document is to alter the boundary of the Chenoweth-Coulter Farmstead. The owner has realized that the boundary submitted by the consultant and accepted by our office in 2009 does not properly reflect the nature of land uses on the farm. The boundary accepted in 2009 impinges closely to the farmhouse on the north, while including parts of cultivated fields at the northeast corner of the boundary. The boundary of the farmhouse yard and barnyards are delineated by fences and remnant hedgerows. The boundary adjustment reflects these land uses and follows these man-made features.

Verbal Boundary Description:

See 1"=100' scale map. It is the intent of the map to express the following:

- The boundary along Etna Road is the edge of the road, subject to all recorded easements and rights-of-way.
- The north boundary follows a fence and hedgerow remnant, beginning as a roughly east-west line that is roughly parallel but about 50 feet north of the north wall of the house for about 175 feet, then the line angles about 90 degrees south/southwest. The line turns roughly east-west and roughly parallels the north wall of the corn crib, about 10 to 15 feet north of the north wall of the corn crib.
- The east line follows a fence line about 25 feet east of the east wall of the barn.
- The south line is about 25 feet south of the south wall of the barn, and angles northwesterly to follow a fence line that runs roughly east-west toward Etna Road.

Boundary Justification:

The new boundary proposed in this document follows decades-old fence and hedgerow lines that have defined the farmhouse yard, barnyard, and otherwise mown lawn areas set aside from crop cultivation on the Chenoweth-Coulter Farmstead.

Acreage:

The new boundary proposed in this document will include **roughly 2.10 acres**, slightly less than was listed on the National Register in 2009.

UTM point:

Remains unchanged from the 2009 document.
