Strength in Diversity

What does the word “diversity” mean to you? It can define our society’s broad spectrum of culture and ethnicity, or the wide range of choices in the toothpaste aisle. At Olympic National Park, diverse ecosystems invite exploration on a grand scale. The park’s variety of life—its biodiversity—also provides strength and resilience for the future.

Olympic is renowned for its coast, rain forest and mountain ecosystems. Visitors often ask rangers, “What’s your favorite place in the park?” We typically dodge the question, because we don’t have just one. We have many favorites, and rarely are two alike. That’s diversity! This variety not only presents the challenge of where to explore on an all-too-short visit, it also influences the future of the park’s plants and animals.

Biologically diverse communities, such as those found on the Olympic Peninsula, confer resilience to the ecosystem. This diversity is illustrated by the glacier-capped mountains towering just miles from the ocean, as well as the sodden temperate rain forest growing only 34 miles from dry oak savanna.

In diverse communities, it is more likely that some plants and animals may have traits enabling them to cope with our changing climate. Or nearby habitats may provide suitable refuge, especially in a park of nearly one million acres. For instance, some species might move upslope as the climate warms. Such adaptable plants and animals could buffer the system against the loss of other less resilient species. In other words, diverse places don’t have all of their biological eggs in one basket.

Sample the park’s diversity as you explore. Look for an Olympic marmot in a mountain meadow, or peer into a tide pool teeming with anemones, urchins, sea stars and more! With the challenges ahead, careful stewardship of our public lands will help protect the variety of life and landscapes for future generations.

Every scrap of biological diversity is priceless, to be learned and cherished, and never to be surrendered without a struggle.

Edward O. Wilson
TRIP TIPS
1 Stop by visitor centers or ranger stations for information and park brochures.

2 Plan your travel using the park area descriptions below and the map and chart on page 3.

3 Check park program schedules on pages 4 and 5 for ranger-guided walks and talks.

MOUNTAINS
Hurricane Ridge (3) is the most easily accessed mountain area in the park. At 5,242 feet, it is located 17 miles up a gently winding road from Port Angeles. Hurricane Ridge Visitor Center offers information, exhibits, a 20-minute film, deli and gift shop. Picnic areas provide a chance to relax amid the breathtaking scenery. Along the trails you can capture views of glacier-clad mountains crowning miles of wilderness. Avalanche and glacier lilies, hawks, blue jays and tiger lilies dance beneath subalpine fir trees. Highpitched whistles announce the Olympic marmot, found only on the Olympic Peninsula. Black-tailed deer feed in summer meadows and migrate downhill when cold recaptures the high country.

LAKES, LOWLAND FORESTS and RIVERS
Olympic National Park Visitor Center and Wilderness Information Center (1) provide information, exhibits, Discovery Room, wilderness camping permits, bear cans, park passes, bookshop and trails. Heart O’ the Hills campground, five miles south, has salvin beauty and nearby forest trails.
Elwha (2) has many trails. Madison Falls, an accessible self-guiding trail, provides an easy interpretive visit. Glines Canyon Spillway Overlook to learn about Elwha River restoration. A nearby trail leads through revegetated areas that were once under a reservoir. Note: river damage and boat rentals. Visitors enjoy Fairholme Campground and boat rentals. Visitors enjoy Fairholme Campground carved jewel. Stroll the shore or the Marymere Falls, Spruce Canyon Spillway Overlook to learn about Elwha River damage and boat rentals. Visitors enjoy Fairholme Campground

Sol Duc (5) has many trails including Sol Duc Falls, a 1.6-mile round-trip walk from the end of the road. The campground has some reserved sites. Call (877) 444-6777 or visit www.recreation.gov for reservations. Sol Duc Hot Springs offers warm and cool pools, food and lodging. Ozette (9) offers boating opportunities, a small campground on the lake and trails to the coast.

Staircase (12) offers a riverside campground, old-growth forest, a ranger station with exhibits, and several trails.

Lakes Crescent (4) has many trails. Madison Falls, an accessible self-guiding trail, provides an easy interpretive visit. Glines Canyon Spillway Overlook to learn about Elwha River restoration. A nearby trail leads through revegetated areas that were once under a reservoir. Note: river damage

CONSIDER THE COAST
The wilderness coast provides a dynamic scene. Lower tides expose sea anemones, sea urchins, sea stars and limpets strategically arranged on the rocks. It is important to leave tide pool animals in their homes, as moving just one animal can injure it and disrupt an entire community.
Kalahaloch (7) offers an expansive sandy beach. Kalaloch Ranger Station has information, exhibits and a bookshop. Visitors also enjoy campgrounds, Kalaloch Lodge, a restaurant and convenience store. For advance reservations at Kalaloch Campground during summer call (877) 444-6777 or visit www.recreation.gov. Beach 4 and Ruby Beach are popular sites for tide pool exploration.

TEMPERATE RAINFOREST
Drenched in over 12 feet of rain a year, west side valleys nurture giant western hemlock, Douglas-fir and Sitka spruce trees. Moss-draped bigleaf maples create a magical scene that obliterates all sense of time. Roosevelt elk may linger along riverbanks at dawn and dusk.

Hoh Rain Forest (6) offers a visitor center, exhibits, bookshop, maps, self-guiding nature trails and a campground.

Quinault Rain Forest (10) Ranger Station on the Quinault North Shore Road is not staffed, but has information and self-guiding trails. The USFS NFS Ranger Station and additional trails are located on the south shore of Lake Quinault. Throughout the valley, visitors enjoy rain forest hikes, lake activities, several campgrounds, lodging and restaurants.

PROGRAMS & INFORMATION

JUNE 24 - SEPTEMBER 3

See bulletin boards for additional programs and visit www.nps.gov/olym

ROAD CONSTRUCTION AHEAD

Road & bridge work will affect several areas this summer. Call (360) 565-3131 for current status.

Elwha: There will be no public access above Glines Canyon for trail bridge work into mid summer.

Lake Crescent: Starting mid July, expect weekday delays of up to 30 minutes on Highway 101, longer after Labor Day. Work will impact access to East Beach Road beginning in August. Check https://www.wsdot.wa.gov/traffic/trafficalerts/ or follow @OlympicNP on Twitter.

Mora: The road to Rialto Beach will be closed for 4 to 6 weeks in May and June for flood damage repairs.

PORT ANGELES

NOTE: the main visitor center and WIC are being remodeled beginning fall 2017. These services will relocate around the corner to 600 East Ave. on September 5.

Olympic National Park Visitor Center - Open daily
May 1 - June 24: 9 a.m. - 4 p.m.; June 25 - September 4: 9 a.m. - 5 p.m.
Information, children’s Discovery Room, park maps, exhibits, nature trails.
Park information: (360) 565-3130. Recorded 24-hour road and weather updates: (360) 565-3131.

Wilderness Information Center (WIC) - Open daily
May 12 - September 30: 8 a.m. - 5 p.m. (until 6 p.m. Friday, Saturday from June 30 to September 9).
Backpacking, information, wilderness permits, bear cans.

HEART O’ THE HILLS

Evening Program - Saturday 7:30 p.m.
Heart O’ the Hills campground amphitheater. Topics on bulletin boards.
Junior Ranger Forest Activities - Saturday 10 a.m. beginning July 1
Join us for one hour of forest activities. Meet at the campground amphitheater.

HURRICANE RIDGE

Hurricane Ridge Visitor Center - Open daily 9 a.m. - 5:30 p.m.
Information, maps, exhibits, orientation film, trails. The information desk is staffed daily 10 a.m. - 5:30 p.m. The deli and gift shop are open daily 10 a.m. - 6 p.m. Shorter hours in October; closes for season after October 15.

Terrace Talk - Daily 10:30 a.m. and 4 p.m.
Learn about this amazing wilderness park at a 20-minute talk. Topics vary.

Meadow Walk - Daily 11:30 a.m. and 2 p.m.
Join this easy one-hour guided walk to explore life in the mountains. Discover wildlife, wildflowers and other features of the Olympic landscape.

FULL MOON ON HURRICANE HILL

Learn constellations from astronomer John Goar on Hurricane Hill. Meet at the Hurricane Hill trailhead. As the sun sets and the full moon rises, hike at your own pace up the 1.6 mile, partially paved trail, climbing 700 feet to the summit. John will point out constellations at the top. Bring flashlights and wear sturdy shoes.

June 8 and 9 - 9:15 p.m. to about 11:30 p.m.
August 6 and 7 - 7:30 p.m. to about 10:00 p.m.
August 12 through August 19 - 10:00 p.m.
August 22 through August 26 - 9:30 p.m.

HURRICANE RIDGE ASTRONOMY PROGRAMS

Meet Master Observer John Goar at Hurricane Ridge Visitor Center for a one-hour astronomy program with telescopes. Look for the rings of Saturn or a distant galaxy.

June 22 through June 26 and July 13 through July 17 - 11:00 p.m.
July 21 through July 26 - 10:30 p.m.
August 12 through August 19 - 10:00 p.m.
August 22 through August 26 - 9:30 p.m.

FULL MOON ON HURRICANE RIDGE

Learn constellations from astronomer John Goar on Hurricane Hill. Meet at the Hurricane Hill trailhead. As the sun sets and the full moon rises, hike at your own pace up the 1.6 mile, partially paved trail, climbing 700 feet to the summit. John will point out constellations at the top. Bring flashlights and wear sturdy shoes.

June 8 and 9 - 9:15 p.m. to about 11:30 p.m.
August 6 and 7 - 7:30 p.m. to about 10:00 p.m.
August 12 through August 19 - 10:00 p.m.
August 22 through August 26 - 9:30 p.m.

INFORMATION

ENTRANCE AND RECREATION FEES

Your fees support facilities and services at Olympic National Park. These projects include repair of damaged trails and roads, and new exhibits at the Hoh Visitor Center. Thank YOU!

ENTRANCE FEES - single visit up to seven consecutive days
$25 - Vehicle (private) or $10 - Individual (foot, bicycle)

CAMPING FEES - per site, per night, 50% discount with Interagency Senior/Access, Golden Age/Access Passes.
$15 - Deer Park, Queets, North Fork, South Beach
$20 - Kalaloch, Heart O’ the Hills, Hoh, Mora, Onsete, Statinme
$24 + tax – Sol Duc (if reserved via www.recreation.gov or (877) 444-6777; +$2 tax & +$3 optional donation if not.)
$22 - Kalaloch reservations purchased 23 to September 24; make reservations at least three days in advance at www.recreation.gov or (877) 444-6777 .
$10 - RV septic dump station in park campgrounds (Kalaloch, Kaloch, Mora, Sol Duc)

WILDERNESS USE FEES - overnight trips require permit
$10 - RV septic dump station in park campgrounds
$22 - Kalaloch (reservation period June 21 to September 24; (877) 444-6777; $21+ tax & $3 optional donation if not.)

$15 - Deer Park, Queets, North Fork, South Beach
$22 - Kalaloch (reservations purchased 23 to September 24; make reservations at least three days in advance at www.recreation.gov or (877) 444-6777 .)
$10 - RV septic dump station in park campgrounds (Kalaloch, Kaloch, Mora, Sol Duc)

Camping Fees

Parks are on sale at visitor centers and entrance stations throughout the park.

50% discount with Interagency Senior/Access, Golden Age/Access Passes.
$15 - Deer Park, Queets, North Fork, South Beach
$20 - Kalaloch, Heart O’ the Hills, Hoh, Mora, Onsete, Statinme

$10 - RV septic dump station in park campgrounds (Kalaloch, Kaloch, Mora, Sol Duc)

Entrance Passes

Passed on sale at visitor centers and entrance stations throughout the park.

150 - Olympic National Park Annual Pass

$80 - Interagency Annual Pass (multipurpose only)
$10* - Interagency Senior Pass (lifetime, age 62+ U.S. citizen/resident and dependents)
Free - Interagency Annual Pass - Military (certain military personnel and dependents)
Free - Interagency Access Pass - lifetime, disabled, U.S. citizen/resident

PARK CONCESSION SERVICES

Park concessions offer food services, lodging and gift items at Lake Crescent Lodge, Log Cabin Resort, Sol Duc Hot Springs Resort and Kalaloch Lodge. Food and gift items are available at Hurricane Ridge Visitor Center and Farthome Store. Boat rentals are offered at Lake Crescent. All facilities are operated seasonally, except Kalaloch, which is open year-round and Lake Crescent, which has reduced winter facilities.

Fairholme Store (Lake Crescent) ………… (360) 928-3020
Kalaloch Lodge ………… (360) 962-2271
Lake Crescent Lodge ………… (360) 928-3211
Log Cabin Resort (Lake Crescent) ………… (360) 928-3323
Sol Duc Hot Springs Resort ………… (360) 327-3583

SAFETY

In an emergency dial 911.

Please protect marine life.

All living organisms on the beach and in tide pools are protected. If you encounter a seal pup on the beach, do not touch it. The pup does not need help and your actions could lead to abandonment by its mother.

Safely pack your gear and clothing.

In a small area similar to Olympic National Park, while limited recreational use is legal in the state, possession of any amount of marijuana or other illegal drugs remains illegal on all federal lands.

In case of an emergency dial 911.

Packs are on sale at visitor centers and entrance stations throughout the park.

This is because they inhabit all elevations of the park where there is not dense, elk and other prey are plentiful. Sightings are rare and usually fleeting. But if you encounter a cougar, make yourself large and loud, wave your arms or a stick, face the cougar and slowly back away. Please report all cougar observations at the nearest ranger station.

Pack rain gear and warm clothing.

Use tide charts to plan your safest hiking times.

Avoid walking on kelp and trees.

Bicyclists beware.

Dred logs are dangerous! Avoid swimming or wading near the ocean during storms or heavy surf. Tides change daily and can prevent hikers from safely traversing certain areas along the coast.

Use tide charts to plan your safest hiking times.

Filter or boil all backcountry water.

Cougars inhabit all elevations of the park where there is not dense, elk and other prey are plentiful. Sightings are rare and usually fleeting. But if you encounter a cougar, make yourself large and loud, wave your arms or a stick, face the cougar and slowly back away. Please report all cougar observations at the nearest ranger station.

Pits are not allowed on park trails. This is for the safety of your pet, park wildlife and you! Ask for our pet regulations handout.

The largest dam removal project in history was completed in 2014 and the Elwha River flows freely once again. After over 100 years, salmon have access to over 70 miles of habitat protected within Olympic National Park. For biologists and the public it is exciting to watch fish and plants colonize historic habitat.

Biologists have observed Chinook, sockeye, steelhead, coho and bull trout swimming in the upper reaches of the Elwha River after passing through both the former Elwha and Glines Canyon dam sites. Snorkel surveys noted fish as far up as Hayes River, over 30 miles from the ocean! Pink and chum salmon, and Pacific lamprey were seen upstream of the former Elwha Dam site. Pink and chum salmon, and Pacific lamprey were seen upstream of the former Elwha Dam site. The park and its partners continue monitoring fish numbers and distribution with snorkeling and radio tagging as well as an exciting new tool—environmental DNA (eDNA). Fish eggs, sperm, feces, carcasses and even mucous leave behind an eDNA trail. Biologists believe analyzing river water for these eDNA clues could be a quick, cost-effective way to gather fish data.

Rebuilding Habitat

As fish recolonized upstream habitat, sediment and logs once trapped behind the dams headed downstream. All the stored sediment expected to erode downstream has been released. Along the way it is creating a more braided, meandering river and restoring spawning habitat. Of the millions of cubic yards of sediment, 90 percent has reached the Strait of Juan de Fuca, adding over 80 acres to the estuary. It is replenishing beaches, creating critical habitat for marine life including juvenile salmon and forage fish.

Life Returns to the Elwha

Biologists are helping natural revegetation with greening the once barren reservoirs by planting over 311,000 seedlings and sowing about 6,000 pounds of native seeds. Thickets of 25-foot alders, cottonwoods and willows, and carpets of other plants are helping to stabilize slopes and control erosion. Roosevelt elk, black-tailed deer and black bears are feeding in the rich new habitat.

Visiting the Valley

The story of Elwha River restoration is ongoing. The now wild river is rebuilding habitat. But it is also moving across its floodplain; it washed away part of the road and forced closure of the valley’s two campgrounds.

With a new temporary bridge and patched road, the valley is open to cars again. Stroll the accessible Glines Canyon Spillway Overlook with its exhibits on Elwha restoration and dramatic views to the river below. In late summer look for spawning Chinook salmon. Spend an hour or a day—the Elwha Valley has a lifetime of tales to tell.

A Mountainous Challenge

When local sportsmen released mountain goats from British Columbia and Alaska near Lake Crescent in the 1920s, they had no way of knowing the repercussions nearly 100 years later. Along with bighorn sheep, pikas, ground squirrels, lynx and others, mountain goats were not native to the island-like Olympic Peninsula.

After 1938, when Olympic National Park was established, these goats and their descendants were protected from hunting. By the 1980s, over 1,000 mountain goats were impacting mountain plant communities.

A park mandate is to protect native species and control or eliminate non-native species, so mountain goats presented a challenge. The park has managed mountain goats with sterilization, live capture, active hazing in public use areas, and other techniques. Mountain goats crave salt and can become hazardous when they associate people with salt.

In 2014, the National Park Service began developing a new plan to address goat impacts on park resources and visitor safety. Comments were gathered at public meetings. A draft environmental impact statement analyzing alternatives, ranging from no action to eliminating mountain goats in the park by live capture and/or shooting, should be released in 2017. There will be opportunities for more public input at that time.

Managing non-native species is challenging, whether it’s Scot’s broom, Burmese pythons in the Everglades, or feral pigs in Hawaiian parks. This plan examines alternatives that will help Olympic National Park protect unique mountain communities and the visitors who enjoy them, while also contributing toward conservation goals for mountain goats in their native range in the Washington Cascades.
