

November 2020

Welcome to Wylie Carr!

The newest member of the CCRP team

Wylie is the new Environmental Protection Specialist for the Climate Change Response Program, and will serve as liaison with the planning community in the Denver Service Center, the regions, and parks. He comes to us from the U.S. Fish and Wildlife Service in Atlanta, where he served for almost five years as the first social scientist for the region. His Ph.D. and post-doctoral work focused on social, political, and ethical aspects of climate change.

For now Wylie can be reached through his FWS e-mail (wylie_carr@fws.gov) as we work to get him set up on an NPS computer. Wylie will work remotely from Atlanta for the next few weeks and will move with his family to Fort Collins later this year, hopefully just in time to be ready for snowboarding season!

Round 3: Catch-a-Pecha-Kucha!

See more Summer 2020 project results

The 2020 Future Park Leaders of Emerging Change interns have been doing great work! Coming up, we'll be hosting another session to highlight their efforts with three presentations on **November 17**. This is a great opportunity to learn about cutting edge science being done by our interns.

November 17, 2020
3pm EDT | 12pm PDT

REGISTER NOW

Impacts of Everglades Restoration on Tree Island Archeological Sites
Everglades National Park
Guadalupe Maldonado Andrade, PhD Candidate, UC Riverside

Climate Smart Conservation for Aquatic Resources
Greater Yellowstone Network
Janelle Christensen, MS Candidate, UC Santa Barbara

Vulnerability of Coastal Cultural Resources in Jean Lafitte NHP
National Center for Preservation Technology and Training
Macy Linton, BS, Louisiana State University

Apply to Climate Academy 2021

Climate Academy 2021 still has space available! This 8 week online course is designed to cover the fundamentals of climate science, provide tools and resources for climate adaptation, and increase climate literacy and communication. Course participants will then develop a final product (such as a report or presentation) addressing climate and adaptation in their management of natural resources. Registration closes November 12, 2020. The tuition fee of \$200 is prepaid for NPS and USFWS employees.

[Register here](#) on DOITalent. For registration questions, please contact Amanda Cucchi at amanda_cucchi@fws.gov. For content questions, please contact Ashley Fortune Isham at ashley_fortune_isham@fws.gov. You can also [download the course announcement](#) [PDF].

Apply to the Climate Ambassadors Program

Administered by the American Fisheries Society, the Climate Ambassador Program will provide a specialized communication skills training program that focusses on climate change. This training will then be applied to informing and educating others about climate change and the impact on aquatic environments. Founded on the latest research on science communications, program trainings will be in-depth, interactive, and provide the tools for fisheries scientists to more effectively communicate with thought leaders, journalists, stakeholders, and lay audiences.

[Learn more and apply](#) before the November 13, 2020 deadline!
