

Warming Up to Adaptation: Big Bend National Park. This new video from the NPS Climate Change Response Program explores how future climate scenarios helped guide important decisions about how best to adapt water infrastructure. Click the image to watch.

With fire and flood, the climate crisis has forced itself into the public mind this summer. More than ever before, people are asking, *"How should we respond?"* This newsletter offers opportunities for you to join the climate conversation.

### Upcoming Webinar: The Risks of Managed Relocation

Wednesday, August 11, 2021 from 1:00–2:00 MDT.

## New Publication: Should You Resist, Accept, or Direct?

"Ecosystem changes are expected to continue across many biomes even under A webinar exploring the risks of <u>managed relocation</u>. Some parks are considering helping sensitive species relocate to escape the worst of global warming but this approach is not without risks. There are potential downsides to both the species being moved and the recipient ecosystems.

# Community Science Fellowship: Community Science Helps NPS and Neighbors Understand Climate Change

Climate change affects everyone, including parks and local communities. Would you like to help a community do the science that helps it, and a park, understand climate change? NPS employees can get trained as Community Science Fellows through AGU's <u>Thriving Earth Exchange Program</u>. **Applications are due Sept. 7. See** <u>recorded webinar</u> **for details.** 

### Planning for a Changing Climate Coverage:

The National Park Service's "Planning for a Changing Climate" report has been receiving a lot of media coverage this summer. You can see a few examples below and <u>the report itself here.</u>
