

TABLE 21. Comparison of 1 year of cover growth (dm^2/m^2) in two habitats of *H. helix* from a completely randomized design experiment

Characteristics	Habitats	
	upland	flood plain
No. m^2 plots	10	7
Standard deviation	25.8	19.5
Mean dm^2/m^2	70.2	31.7

t test: $t_{15 \text{ df}} = 3.324$; significant at 0.005.

Variance ratio: $F_{9/6 \text{ df}} = 1.749$; not significant at 0.1.
