

Annual Percentage of Rainfall Compared to the 50-year Running Average from 1987-2021

Percentage of running average rainfall from 1987–2021 based on data from Point Reyes National Seashore Bear Valley (Olema OVYC1) weather station. The annual rainfall data is a sum of daily rainfall for each water year October 1–September 30. Two additional local weather stations, BBEC1 (located on Mt. Barnabe), or Point Reyes Station (Marin County OneRain 38029) were used to fill in any data gaps.
