Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I am a nature photographer with many Pt. Reyes images published in a variety of media. I have been visiting the Seashore for over 20 years and have lived nearby, spending MANY DAYS exploring the park. I photographed Johnson's Oyster farm for Sierra Magazine..... I could go on and on. Pt. Reyes is one of my "spiritual homes;" a place to go to recharge emotionally, physically and spiritually. As much as I love oysters, the disruption caused by the operation outweighs the benefits, which are purely commercial.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine

wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended.
------------------------	--

We humans are too prone to messing up Ma Nature's millenia-long work in developing ecosystems, just for our own short-term profit. I love oysters as much as anyone, but I also love wilderness for the many benefits it provides, including many of which we humans have no awareness at all (until we change an area and find out to our dismay what we have wrought).

The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review

shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

As the beautiful and wild places in our world begin to dwindle, it is our responsibility to make sure that some of these are kept safe from human exploitation and destruction. Please help to keep pockets of the world wild and beautiful, free from the taint of human alteration.

***** I am a native Californian--in fact a native San Franciscan. My family has lived in the Bay Area since the 1870s. All my life my family and I have visited the Bay Area's wild places, from Mt. Tam to Pt. Reyes and to parks in the East Bay, and San Francisco's own ocean area. It was a wonderful day when the Point Reyes National Seashore was established, as well as the Golden Gate National Recreation Area. Those of us who have lived here our whole lives felt so relieved that those wild places we knew could remain so for posterity. Congress allowed existing commercial enterprises within these national areas to remain for a period of time, but it is important now to let the land and sea return to its natural state, while removing all exotic species. This special area must be preserved for the future. The health of the natural areas reflect the health of the planet. Greed and commerce must not be allowed to destroy the natural areas that belong to ALL of us.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review

shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long intended. As someone who values the wild places as nature's last refuge in an increasingly urbanized world, I urge you not to undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places. After all, commercial interests can develop anywhere. Nature cannot, and once we destroy a habitat, and consequently all life that depends on it, we can never get it back.
------------------------	--

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	<p>I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.</p> <p>I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.</p> <p>National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.</p>

Correspondence: I am an ardent supporter of the Sierra Club, but am sorry to say that they are mistaken on this one. I would support the removal of the oyster farm if the grazing in the watershed were halted also and the entire drainage were allowed to revert to its natural state. However, as long as the grazing increases the nutrient load into an area that does not get a lot of tidal flushing, anything that removes the excess biomass (which oysters will do quite effectively) resulting from nitrogen-driven plankton blooms. Every kilogram of oyster that leaves the estero represents a kilo of nutrient that would otherwise enter the microbial loop, likely resulting in anoxia (similar to that which caused the recent massive kill in Sonoma County) in bottom waters.

Until such time as the grazing leases are terminated in the park (which I would wholeheartedly support), I believe that the best way to maintain water clarity and oxygenation will be to allow continued operation of the farm.

Understand that I support cancellation of all grazing and farming leases in the park, and believe that this operation should be removed when the grazing is stopped.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine

wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: The Oyster Company knew the deadline. They had years to prepare and move their operation. But they didn't they do it? They pretended the deadline wasn't there. Now, they believe the the only wild coast protected area should bend the rules for them, again. That isn't the way it works. The protections at Drake Estero are precious, they are thin, and should not be compromised.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. ------------------------	---

As a Bay Area resident, I enjoy Pt. Reyes, including going there sometimes to eat oysters, but I did not realize that the commercial oyster farms there grew non-native species. I urge you not to extend the time limit of operations of the commercial oyster farm/factory beyond the previously delimited 2012 deadline. Please instead prioritize the preservation and restoration of the natural order of Drake's Estero.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am very concerned about the the future of the Drakes Estero wilderness. I've been there and enjoyed the natural beauty, and observed the migrating birds and harbor seals - it must be protected.

I strongly urge the National Park Service to protect Drakes Estero wilderness next year as was initially intended. The American public deserves to have this rare west coast marine wilderness area protected for future generations to enjoy.

The Estero deserves the highest level of protection - as Congress intended. Please support strong protections at Drakes Estero and don't allow private interests to exploit this special environment here in California.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. -----------------------------	----------

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing about my concern for Point Reyes National Park. I hear that you are considering opening it up to commercial enterprises. This would be a tragedy. Even if done with the best of intentions, commercial intrusion destroys wild spaces, something we have very little left of in the lower 48.

Please consider this letter as support for leaving Drakes Esteros protected as intended.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I live near the Point Reyes National Seashore, and am a volunteer there. It really is a National Treasure, and should be protected. Please help us restore the Estero.

------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places. Please stay on task and committed to the original plan. Interfering with the natural environment only helps destroy it. Introducing new things can be very harmful. We've seen it happen in many states. Before you know it something else will be introduced to accommodate what has happened. Or the environments natural ways has been abused to reach a state of dysfunction slowly causing death to itself. Please help this estuary be protected and stay natural to itself.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	Dear Sir, at a time of tremendous and irrevocable environmental damage and catastrophe it is our duty to protect all of Nature that remains.				

I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not				

undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

------------------------	---

For 50 years I have been drawn to the wildness of Point Reyes: biking, hiking, or just being there. Recently I took my 90 year old mother to visit the area (it had been 30 years since she was there) -- she cried with the beauty and vastness of it all. We napped by the seashore and saw the elk herds.

Although I appreciate the value of commerce, please let us not be distracted by the commerce of the commercial oyster farm there -- it is more important to protect all aspects of Point Reyes because once that protection is compromised, it almost never can be regained.

Thank you. Mari Tustin

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

There is a thriving oyster farming industry in Humboldt Bay. That is an appropriate place for such an activity.

Correspondence: I'm writing to urge you to protect Drakes Estero wilderness next year. The West Coast's only marine wilderness has to be protected for us and for future generations. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero. Succumbing to special interests seeking to commercialize these special places only encourages them to go for more.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness

and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review

shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

My family and I have spent many enjoyable hours at Drakes Estero and have come to appreciate that it is deserving of the full protections- and enforcement of these protections- that wilderness designation offers.

Thank you for your consideration of this issue.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. Correspondence: I am writing to urge the National Park Service to protect the current situation in Drakes Estero.

I am an environmentalist and a vegetarian, I was looking forward to the future implementation of the wilderness, and the replacement of the oysters with eelgrass as I grew up in Kentfield (only a few miles away on Sir Francis Drake Boulevard).

However, now that the global environmental situation has gotten worse, I think that the oyster farming at the Estero provides a vital point of connection in non-environmentalists who do like seafood, to protect the oceans.

Let Hog Island stay so they can enlist more people to save the environment.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Please, the marine wilderness is so essential to the health of our coast which is our legacy to our children and grandchildren. It should never have been allowed to be compromised in the first place and now is our chance to right the wrongs of our ancestors. Our precious eco-system is so much more important than any greedy businesses.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

Correspondence:	Regional Parks Association, a 60 year old organization with emphasis on on preservation of East Bay parklands and regional open space strongly endorses Alternative A as presented in the Draft Environmental Impact Statement Drakes Bay Oyster Company Special Use Permit document. The 1976 Congressional promise of eliminating this commercial use in the Marine wilderness area must be honored, not just because it is a promise to the American people, but because it is the right thing to do. Every incursion however small into wilderness areas is an affront to Americans not matter where they live. Our 150+ membership although centered in the Alameda-Contra Costa counties area, like all the San Francisco Bay area counties, uses Point Reyes National park and understands the environmental issues associated with continued Oyster farming, no matter the scope of the commercial use. There are other places where such farming is appropriate and therefore does not eliminate the company's opportunity to carry on its business. Drake's Estero must be preserved as the wilderness intended, free from the invasive species impacts, chemical pollution, garbage, and wildlife disturbance. Other experts and organizations have given you reams of scientific professional information to make denial of the permit extension a no-brainer decision. We shall not repeat those here. We simply add all our voices to the chorus of those who plea that this special place be returned to its intended wilderness state.

Correspondence:	I am from Kentfield, in the heart of Marin county and although in Berkeley now, I am still close to the hills and shores there.
------------------------	---

I supported the original plan for the wilderness of Drake's Estero (though too young to vote) and lamented that it was so far in the future.

I am writing to you now as a local environmentalist in support of the continued aquaculture in the area, specifically the family operated Hog Island Oyster Farm. They are an important staple in the local economy, and an international draw for foodies.

Those oysters are prompting more people to take an interest in the health of the Oceans, which are at a critical point in history right now. I sacrifice the wilderness designation for the estero and the loss to the local ecology to the greater good of larger environmental support for the larger environment.

I have always thought that eating a creature raw, guts and all was disgusting, and do not personally benefit from aquaculture as a vegetarian. But I am also a locavore, regular visitor to the area, and I benefit greatly from aquaculture's attractions to others.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence:	Sorry to say Oystering is not a critical undertaking. Let it go! Take your lumps like everyone else these days and find another enterprise.				

I urge the National Park Service to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. As someone who enjoys our nation's spectacular national parks and their wildlife, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge Secretary Salazar to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help other commercial interests seek special exemptions from national park laws.

Correspondence:	Dear Folks,				

I have been hiking, backpacking and paddling in Pt. Reyes Seashore since it opened. I believe that in its founding, the seashore planned to take over Drake's Estero when the current oyster lease ran out. Later, the Estero was designated as wilderness and has been planned to revert to same when the lease for the Oyster Farm ran out. I support this and therefore support Alternative A in the present EIR. No loopholes should be allowed and the precedent set will wrong.

Thank you.

Sincerely,

John P. McCormack

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I enjoy monthly visits to D.Estero and spend approximately \$400 each time with the local economies. These areas are becoming fewer and more visited as my 10 years there can attest. With pressures of visitors come the ecological challenges to preserve. We saw this at Torrey Pines and other splendid locales which draw the greedy eyes of developers. People who know these sites revere them.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

PLEASE BE SURE TO SELECT ALTERNATIVE "A"; it's absolutely unconscionable to continue SELLING OUT OUR NATIONAL PARKS AND PRECIOUS PRESERVES to industry. Especially anything having to do with the sea at this point, when the radiation from the disasters in Japan is permeating ALL our oceans (despite the spin and coverup, some of us know what is actually occurring; I no longer eat ANY kind of seafood).

It has always been my understanding that the National Park Service exists in order to protect our parks and wild places, so it makes me seriously doubt your commitment and intention that you would even CONSIDER the extension of this company's right to continue operating a commercial business in the area. The only thing that makes sense is that the company is bribing someone on your side--sorry, that is not an actual accusation, just letting you know how it looks from outside when a commercial business seems to have more power and influence than the organization which is responsible for protecting our wild places.

DO NOT EXTEND THIS COMMERCIAL FISHERY'S RIGHT TO DO BUSINESS IN THE ESTUARY BEYOND THE LONG-AGO AGREED-UPON DEADLINE OF 2012. That was already a terrible compromise. Now they are pressuring you again and it needs to STOP.

Sincerely, Naima Shea

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for

future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places. When the oyster operation lease expires in 2012, I urge you to deny it's renewal. The presence of debris from the operation contributes to contamination to this otherwise fairly pristine section of the coast and it should remain off-limits to commercial uses.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

As a bay area resident, Point Reyes has been my place of refuge for 10 years because of its pristine beauty. It would be a sin to open it up to development. Why would you even consider destroying this refuge? I will fight tooth and nail along with the residents of Point Reyes to prevent this from happening!

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

IT'S VERY SIMPLE. THE OWNERS OF THE OYSTER COMPANY KNEW WHEN THEY BOUGHT THE BUSINESS THAT THEIR LEASE HAD A TERMINATION DATE. IT'S NOW TIME TO ACT ON THAT DATE.

Is destruction of the planet the only process that Capitalism understands. Make money (a man made value structure that has no real value) from anything, regardless of the cost. The next thing to follow is the loss of the right to walk on this location because it will be private. Like the illegal closing of coast line for private property.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: As a Bay Area resident for over half my life, I have long enjoyed the the special wild places we have so close to densely populated urban areas. These areas are part of a vital national and natural heritage, and once gone, will never be able to be replaced. I urge that you conserve this area to the full extent of alternative A. Commercial interests benefit only a few, and the exploitation that these interests use in the area always have unintended consequences. This area is unique as the only marine wilderness on the West Coast. I intend to do all I can to make sure it is there for future generations of wildlife, as well as people. In this era of climate change, rising population and pollution, and accelerating species eradication, this is an easy and obvious thing we can do to protect what we have left of the wilderness. Don't let it pass you by.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

This issue perfectly exemplifies the potential corruption of national interests by special interests. The stalling tactics that have been used represent the typical "putting off" of hard decisions that will certainly disappoint these special interests, but must be made. Government needs to stop this delay and be willing to make this necessary change and not further avoid resolution of this issue.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: You may not know this, but Drakes Bay and estuary are potentially great resources for important learning environments. I participate with an organization called the Regenerative Design Institute in Bolinas, CA that helps build tangible connections to nature in people and children of all ages. We also work with urban public school classrooms to establish an understanding of, appreciation of, and relationship to the natural ecosystems we call home.

They are only the protected areas of California's coastline where such relationships and learning experiences can be established. Even within the National Seashore, these areas are limited. Please allow this human appreciation of our natural world to strengthen, with the new addition of Drakes Estero as part of that project.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. However, I fail to see how the commercial dairy operations at Pt. Reyes are different than the oyster farming. So, if you ban oyster farming, ban dairy operations!

The oyster farm discharges countless plastic items into the Leatherback Conservation Area of Drakes Bay, ocean that is proposed also as critical habitat for these endangered sea turtles. Plastic pollution is killing seabirds, marine mammals and sea turtles, and allowing this continued marine pollution is unacceptable. Please take immediate action to remove the oyster operation.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: I urge the National Park Service to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. As someone who enjoys our nation's spectacular national parks and their wildlife, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge Secretary Salazar to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help other commercial interests seek special exemptions from national park laws.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects

this important marine wilderness and is the environmentally preferred alternative. Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012. This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience. Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy. Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere. As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting

this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation.
