Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. We need to stop building on and destroying every inch of land in this country, before it's too late, if it isn't already. Besides being bad for humans, it's a disaster for wildlife.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: For almost 20 years my family has visited Point Reyes regularly. It is a truly unique and wonderful wild place. I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Correspondence:

Please protect Drakes Estero wilderness next year, as has been long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all and for protection of all marine life. We have waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. Therefore it is very, very important that you uphold the longstanding plan to convert this very special resource to wilderness. Please, no more delay and no more damage to this irreplaceable ecosystem.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's

only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I enjoy getting to a quiet and peaceful environment whenever possible to regroup and connect with nature as a means of

releasing tension and sensory overload. There are thousands of others who do the same. We need this outlet. We depend on our officials to protect this environment. That is you.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

As someone who values the beauty and magnificence of the natural world, I hope that we as citizens, will do all we can to protect and preserve for future generations, and for our own appreciation. We have already destroyed so much of what God has given us. May we step back from harmful impacts. Please help protect this treasured area.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Please take action to protect the Drakes Estero estuary within Point Reyes National Seashore. Drakes Estero is a rare wildlife refuge for migratory birds and harbor seals, and it provides shelter for fish. Please uphold the plan to designate and protect this unique resource as a marine wilderness. Reject the Drakes Bay Oyster Company's application for a Special Use Permit.

As much as I love to eat oysters and love oyster sauce as a delicious addition to Thanksgiving turkey dressing, there are other places where oysters can be harvested, but the number of unique marine sanctuaries is indeed limited. We must act now to safeguard these special places to regenerate wildlife and to protect biodiversity already threatened by climate change. The West Coast will be enriched by protecting Drakes Estero estuary for future generations of species to enjoy the life it supports.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be

implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred

Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. As someone who grew up in the San Francisco Bay Area and hiked, biked and just enjoyed the Point Reyes National Seashore, I urge you to protect this precious area now.

Sincerely, Robert Tompkins

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: There is a rare opportunity to permanently protect a wild treasure, to allow American public lands to exist unexploited, to do, for a change, one with lasting benefits for the people and the land, the right thing. Protect Point Reyes; as a former long-time resident of the area while I was teaching at UC, I am intimately familiar with the area and cherish it.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I did not grow up having access to beautiful natural spaces and it wasn't until I became an adult that I began to appreciate the

beauty and necessity of spaces like Drakes Estero. I am also a public health professional and Ecotherapist and in a world of increasing stress and disconnection the evidence overwhelmingly points to the connection between healthy natural spaces and healthy people. When we encourage people to learn to build a relationship with the natural world like Drakes Estero through outdoor engagement, and spiritual wellness activities we increase the potential for community restoration and support of protection of these precious areas.

Therefore, I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Protecting the small fraction of the California coast which has already been designated as a National Wildlife Refuge should have no effect on the total oyster harvesting resource.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I'll stop eating oysters as a protest!!!

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended.

Do not renew the special use permit for the Drakes Bay Oyster Company. Why should a single company be permitted to enrich themselves at the expense of the people of California?

This area is enchantingly beautiful and should be left alone!

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: The estuary is on track to receive full wilderness designation in 2012. A special interest private oyster company would like to extend its operating permit, contrary to law passed to protect the area as wilderness.

Drakes Estero is a refuge for wildlife. Visitors should be able to enjoy it in its full glory instead of watching commercial oyster operations that include thousands of motorized boat trips each year.

Birds, fish, and seals all rely on this wilderness area during migratory patterns and as a specific ecological niche.

I urge you to protect Drakes Estero wilderness next year. The public has waited almost four decades for this promise to complete the wildlife area.

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all.

Thank you

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred

Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: 1) I support ALTERNATIVE A, which allows the oyster company operating permit to expire and finally establishes wilderness at Point Reyes National Seashore, as Congress legislated thirty-five years ago

2) ALTERNATIVE A is the "environmentally preferred alternative" and is the only option consistent with national park policies.

3) I believe the NPS should prioritize the long-standing wilderness designation vision over commercial exploitation of our protected public lands.

4) There are other places to commercially grow oysters, but no replacement for Drakes Estero Wilderness.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

We need these protected areas for the animals & birds. Else we end up destroying every place on earth by commercial, greedy companies.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred

Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero estuary next year by supporting full wilderness designation. It is in the best interest of our fragile planet to preserve what few pristine, functioning ecosystems we have. A healthy, peaceful, undisturbed estuary is physically, chemically and spiritually, in the best public interest. The West Coast's only marine wilderness must be preserved for the well being and enjoyment of humans and animals alike.

Drakes Estero estuary is a rare wildlife refuge where migrating birds rest and feed, harbor seals give birth, and fish take shelter in eelgrass. Estuaries are the reservoir of many sources of animal and human foods. They are nurseries of the sea, safe harbors for migratory animals, and are important biofilters to help purify our water, soil and air.

As someone who knows the importance of estuaries and wilderness to the replenishment of the oceans and sustenance of wildlife, I implore you to reject any and all commercial special use permits within Point Reyes National Seashore.

Please, uphold the long delayed plan to convert this very special resource to protected wilderness status.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

California has an amazingly LONG coastline. This oyster company can find another area to harvest their oysters.

I am tired of this constant commercialization of parks, forest campgrounds, sanctuaries and reserves by the Conservative element. These are places that need to be protected and not turned into money making opportunity for a selected few. I speak as one of the "99%" who are watching the actions of our elected. To date these activities produce little for the benefit of all and seem to offer a great open and friendly hand to the more affluent requestors via their lobbying interests.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop

over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Oyster farming can be done anywhere there are oysters. This estuary cannot exist side by side with Drakes Bay Oyster Company. Please do not extend the Special Use Permit that can destroy the estuary.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Correspondence: QUESTIONS: 1) Is the Drakes Bay O.C. requesting a special use permit that is denied without exception at all other N.P.s? 2) Does its activity damage the park anymore than other commercial activities that may be permitted in this N.P. or in other N.P.s? 3) For example, how does its activity compare "damage-wise" with allowing: a) snowmobiles to enter N.P.s? b) culling animal or plant life in N.P.s? 4) What action(s) do(es) your most reputable scientific advisors recommend?

Peter D. Reimer Hayward, CA

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. I am a native Californian who has seen my state exploited and damaged, in some cases beyond repair, by special interests with short-sighted, selfish goals. It is time to live up to our potential as world leaders in ecological and environmental responsibility.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Please, protect Drakes Estero wilderness next year. The public has waited nearly four decades for the West Coast's only marine wilderness to finally be protected. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I ask you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred

Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Point Reyes is one of my favorite places. Lets preserve that area....PLEASE

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: PLEASE protect Drakes Estero wilderness next year, as long intended. For the quality of life for us and our children we must create the West Coast's only marine wilderness for the enjoyment of all. We have waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, but also knows their importance to our environmental health, I urge you to uphold the longstanding plan to convert this very special resource to wilderness, please select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park.

Thank you for your service to all Americans.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Long ago, while a student at Sonoma State U., I performed an ecological/botanic study at Pt. Reyes. It was one of the great experiences of my life. I implore to protect it.

William R. Feldman, PhD.

Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. This is an area that must remain protected from commercial use! Invasion by oyster-seeking companies will destroy this marine wilderness so long sought and needed to protect this refuge. PLEASE do not allow our opportunity to keep this pristine area safe to be sold out to commercial enterprises.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.
