Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American				

public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness

and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.
------------------------	---

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.				

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I've visited Point Reyes many times, and know how valuable this area is. I'm now living on the Oregon Coast, and see our Pacific Ocean every day. Please convert this special spot in our National Park back to the wilderness, as intended.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all.

Waiting 40 years for the full designation is almost over. It isn't like the Oyster Company didn't see this coming. Let's honor the long standing agreement and protect the only marine wilderness our West Coast has.

I'm sure you know that Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Thank you for your consideration.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: Please don't allow the plan to designate Drakes Estero as wilderness to be delayed. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. As someone who enjoys our nation's national parks and their wildlife, and also one who studies the justification for national parks due to the public goods they protect, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. We enjoy our nation's national parks and their wildlife. We urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Some compensation is due the oyster farmers/fishermen to move their operation and should not be overlooked. They will lose their livelihood at least for a while until they can reestablish their operation.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be

implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I like oysters as much as anyone. But the estero is one of the greatest places on earth and to see it fouled with plastic from oyster farming and to allow industrial agriculture is just bad for wildlife and the environment.

Drakes Estero is our only marine wilderness on the West

Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Dear Ms. Muldoon,

I encourage you to continue the plan to discontinue oyster farming on the Drakes Estuary and that has been planned and proceed with plans to preserve the estuary to its natural state.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	<p>I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.</p> <p>I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

Correspondence:	<p>Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.</p> <p>In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.</p>				

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American				

public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.				

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under

widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior? to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Oyster company get out. Stick by the agreement. The animals, fish and birds are more important. The time has come to honor your agreement; the public has waited long enough; we've been more than patient.

Correspondence:

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. My family visited the Point Reyes National Seashore in 1993 and I do not want to see it farmed any longer for oystering or any other sea product. It is the one and only marine estuary being saved on the West Coast. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The environmental review shows that alternative "A" is best for public policy, and

best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. THIS IS A VERY IMPORTANT MATTER ! ! ! !				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: As a former resident of California and visitor to the Point Reyes area as part of a photography club, I urge you to uphold the longstanding plan to convert this very special area to wilderness and not extend the oyster operating permit. I also just 2 years ago, on a vacation back to California stopped in this area to enjoy the seals.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I believe it is in the public interest to create this West Coast marine wilderness (the only one) for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise already. It is time---please protect Drakes Estero wilderness next year.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I have never had the opportunity to view Drakes Bay, but I would appreciate its being kept in good condition so that many MAY view it - and that it and the earth endure.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Correspondence:	I have been visiting Point Reyes since the 1970's, though I live on the East coast, and find it a very special wildlife habitat with scenery that is truly an inspiration for human visitors as well. I urge you to bear these facts in mind before allowing commercial interests to compromise the unique value of this area.

Over my lifetime of 70 years, I have watched the steady dwindling of wilderness all over the world. I know that here on the

West Coast, that there is no justification for delaying protection of this priceless resource any longer. As someone acutely conscious of how easily we have lost wild land and wildlife everywhere on earth over the last several decades, I implore you to uphold the longstanding plan to convert this very special resource to wilderness.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

I've long heard about the importance of this area as a have for many waterbird species. We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. Please allow the bay to recover and be off limits to commercial operations.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back. REMEMBER THE ANIMALS GO FIRST AND THEN WE ARE NEXT!

Correspondence:	I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.				

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

Most commercial fisheries have relocated elsewhere. The one remaining has not demonstrated any need for this particular piece of coastline, whereas Congress long ago deemed the arguments sufficiently compelling to slate the area for protection as a Wilderness Area. If anything, the need for these protections has increased. There is no conceivable reason to retract their commitment.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while

commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

We need to be allowed to enjoy our coastal waters and the peace and beauty that comes with them. It is a unique experience to share with our children to cherish what our country has to offer. When I did this with my children when they were young, they grew to appreciate what this country has to offer and 2 have now gone on to become environmental researchers. I never knew what impact our trips had on them. They now are doing what they can to protect our natural resources for the next generation and you must do the same!

Correspondence:	Dear Superintendent,				

Please register my support for Alternative A, or conversion of the existing facility to wilderness. The existing lease holder bought these rights knowing full well the conditions under which they were granted. Their current attempt to subvert your management plan through cynical politics is reprehensible and I urge you to restore the integrity of these lands, as you are mandated to do.

Northern California does not lack for commercial oyster farms, but coastal wilderness is a rare and vanishing resource. Please do the right thing.

Sincerely, David Dresser 826 Neilson Street Berkeley, CA 94707-1816 United States

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. I believe it is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. I understand that the public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. I'm told that Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. Thank you.

As a former National Parks Service ranger, I remember that our mandate was twofold: to preserve and protect our national treasures both natural and historical, and to provide for the public enjoyment of these treasures. NOWHERE was there a mandate to support businesses and/or development. When the permit expires for the oyster company next year, do not renew it for Drakes Estero. America needs all of its wilderness, especially this one on the West Coast.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all.				

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I have been a bay area resident for over a decade and can attest to the need to maintain our marine wilderness and the importance of preserving animal habitats.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	Point Reyes is a personal refuge for me --physically when i can get there and spiritually in my heart always. You cannot protect it from the radiation blowing in from Japan but PLEASE DO PROTECT IT by preventing commercial use. The peace and serenity in addition to the interconnections between the biological systems must be preserved! I understand that YOU HAVE THE POWER AND AUTHORITY TO PROTECT IT...Please DO! Do not allow commercial use of any part of the land or water or air or organisms in this important biosystem! Thank you so much.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop				

over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.
------------------------	---

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Correspondence: To whom it may concern:

I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Sincerely, Catherine Nelson

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under

widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: Kindly regard my opinion as valid even though I am sending this fantastic letter drafted by an organization I support. I work full time, I care deeply about many, many issues and do not have time to draft personalized letters about them all. Do not fault me for this. I am a hard working American who cares about our oceans. Try to imagine how little time I have to draft and send letters... I'm single and I work full time. We are talking zero time for letter writing. I am sure I am not alone. You must not disregard ANY of the form letters you receive. You would be wrong to assume that just because it's a form letter that that individual does not care that much about the issue. I do care! We all care! Every single person who sends this form letter cares deeply about this issue!

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources,

as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	Dear Sir or Madam:				

I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Warmest regards, Cathy Ruperti

Correspondence:	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural				

resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. Our children and grandchildren will benefit from keeping this wilderness around for years to come.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be				

implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, and not allow oystering operations to be extended. I have visited this area on a trip to Point Reyes and was awed by its beauty. I remember reading about the delicate balance of this marine ecosystem. This area should be preserved as a marine wilderness for the enjoyment of the public and preservation of many species unique to this beautiful area.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes

Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence:	<p>I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.</p> <p>I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Our world's wilderness is essential, even for human survival. Without wildlife of all kinds, the world would enter a self-destruct mode, and in our children's and grandchildren's future all life on earth would be endangered. Our world cannot be devoured for greed and still leave an environment that would support human life. All life is interdependent. All species need each other.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside

for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop				

over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource

and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. There is but one course of action that will satisfy the laws governing this valuable marine wilderness and that is to end now all commercial operations within its boundaries. The way is clear for positive action at this point. Save Drakes Estero in the way that the law prescribes and in keeping with public sentiments. Please be as transparent as you can in publicizing your decision. Your position as Steward in Chief demands that you be open and above board when dealing with the interests of the people and this unique wilderness.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I understand that commercial "fishing" needs to exist but places like this can not be replaced and should be protected.

Correspondence:	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.
