**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places. We have so few unsullied areas left in this beautiful country. We must preserve what we have.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time

to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

This national park wilderness is for visitors and wildlife conservation, not private commercial use.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

<b>Correspondence:</b>	<p>I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.</p> <p>I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I strongly urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for implementation of these protections. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource

and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Received:** Nov,12,2011 17:35:47  
**Correspondence Type:** Web Form  
**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under

widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero wilderness should receive the protection of full wilderness designation next year., and become the West Coast's only marine wilderness for the enjoyment of all. As you know, Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. Oyster suppliers can go elsewhere to make their money, but Drakes Estero is too precious to allow continued oyster fishing; to do so postpones the proposed designation as wilderness, and could become a precedent for other commercial uses that will ultimately alter the nature of this unique and delicate locale!				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Although I live in Maryland, I make it a point to visit and hike Pt. Reyes every time I'm in the region. It holds a very special place in my heart! I can't tell you how many times I have told friends, family and even strangers about the beauty of the park and have encouraged them to visit and explore. Please do not take it away from me, or them!

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

**Correspondence:** I urge you to protect Drakes Estero wilderness.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who treasures our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

The compromise has been made and now it's time to keep the agreement to return to this wilderness. There's been too much commercial use of our natural resources. Now is the time to preserve these most important areas for the future generations to enjoy. For the ecology. There has been a push to use federally protected areas for profitable gains and no regard for nature, and it's shameful.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. **Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. Future generations should be considered...it should not always be about making money and immediate gratification over a plate of oysters. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. We are obligated to protect our wildlife--biodiversity is essential to the health of the earth, our own species included. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred

Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I have visited Point Reyes and Drake's Estero many times over 40 years, and I view it as a truly unique and wonderful place for wildlife and human visitors alike. Its specialness should not be compromised, but protected and strengthened., I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

Decades have passed since the decision to convert the area to a protected marine wilderness over time. The timetable was clear. It should not be changed now! The desires of the oyster company should not be allowed to trump environmental, wildlife or public needs.

Please do not waver in implementing the much-needed and long-awaited protections to Drakes Estero by providing it with full wilderness designation on schedule in 2012.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. <b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in

and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park

resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. **Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. We need to conserve our precious resources for the future generations. What if our forefathers had not done all that they did do for us and our children?				

Warmest regards, San Billings

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of				

protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. Leave our wildlife something! Most has been compromised, ruined....we love our wildlife and so much of it from marine life to earth to sky is extinct now and more going extinct every day. Please protect Drakes Estero wilderness!				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review

shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. I urge the National Park Service and Department of the Interior to uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative.

Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012.

This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience.

Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy.

Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere.

As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. **Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I live for part of the year in an area of Maine where farming of oysters has become fairly successful. From what I have read, this practice has slight environmental impact. The areas where this oystering is taking place are residential (although medium- and low-density). Thus the human population is called upon to monitor the impact of commerce on the environment. Wildlife refuges are not the place for commercial use of the environment.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. **Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were

eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. <b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	Although commercial operations are inconsistent with the Wilderness Act, Congress allowed an existing oyster-growing business in Drakes Estero to stay, with the mandate that it had to cease operations in 2012.				

Now, the Drakes Bay Oyster Company, a commercial shellfish producer that bought the oyster company's remaining operating rights in 2005, wants to expand and extend the original special use permit within Drakes Estero wilderness for a minimum of 10 additional years. Backed by the powerful shellfish lobby, the company is waging an expensive misinformation campaign to attack the Wilderness Act and the National Park Service, and overturn the wilderness designation.

A deal is a deal. Drakes Bay Oyster Company bought the business in 2005, knowing the permit expired in 2012. It is not fair to change the rules now so they can make a profit from a public asset funded by taxpayers. But powerful political and special interests are pressuring Congress and spending millions of dollars to try to extend the lease and keep the long-promised wilderness protection from taking effect at Point Reyes National Seashore.

If we lose the wilderness status at Drakes Estero, it opens the door for industry to do the same in our wilderness areas and national parks across the country.

Our national parks and wilderness areas don't belong to big business. They belong to the American people. You can help.

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be

implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Sincerely, Sharon Pate 8 Mouse Creek Court Howell, NJ 07731-2914 United States

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. I was in San Francisco, Ca. in September 2010 to receive a Special Service Award from the Sierra Club. After the Award ceremony my brother Alan and myself decided to tour the coast north of San Francisco and visited the Point Reyes National Seashore. As a resident of Cape Cod, Ma. I appreciated the natural environment on display at this national seashore. We have a national seashore on Cape Cod that allows damaging ORV usage and saltwater angling in selected regions. There are areas that allow only passive recreation at the Cape Cod National Seashore and bans on commercial fishing activities (even though some saltwater anglers sell their fish to local restaurants). I feel that the Point Reyes National Seashore would be wise to establish a wilderness area for the Drakes Estero region which could serve as a baseline region to evaluate climate change effects (to compare with human use impacts elsewhere).

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero

and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

When my daughters were young I remember our visit to the area on a vacation up the California coast. We had a wonderful time and the beauty of this wilderness area helped my daughters mature into thoughtful adults concerned about the preservation of nature. It would be such a shame to lose one more area on earth to commercialization.

**Correspondence:** Having just visited the California coast twice this year from Maine, it is a truly spectacular region! Please protect this environment- oysters are delicious-I love them, but oysters are replaceable, the environment is not.

I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West

Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I have travelled throughout the world, but Point Reyes still remains one of my all-time favorite spots. I was visiting California from Virginia just last month and I took care to spend an entire day at Point Reyes. Such a magnificent wild area yet so close to a major metropolitan area, Point Reyes simply must be protected in its entirety

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

If we do not preserve what is left of our wildlife today, there will be no wildlife for the future generations to enjoy. I don't know about you, but every time I see any animal in its natural habitat, I am taken aback by the beauty and peace that surrounds them. I grew up in the mountains, so I know what it is like to see animals up close, to be able to share the same space on a peaceful level, and to be respected by them as much as I also respect them. It would do a great disservice to the animals, as well as to the future of our planet to take this land that was rightfully theirs in the first place. There should not be a compromise for the sake of money. Our purpose is to respect and enjoy our natural world, not to worry about where the next dollar is coming from. We need to learn to share the space without making a sacrifice of our link to life itself - the animals. Whether the animals live on the land or in the sea, they do not have a way to fight for their rights. We must fight for their rights to show that we are capable of more than just destruction of habitats and entire species of animals. I want my grandchildren to be able to enjoy what I have in my lifetime, but if we continue to push animals away from their habitats, there will be no joy for our future descendants. I implore you to look deep into your heart and soul. Then, I implore you to look into your children's or your neighbor's children's eyes. Do you really want to take this away from them? If you look deep enough, I am sure you find the answer that you know is right with every inch of your being.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. **Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. **Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. <b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West

Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

<b>Correspondence:</b>	<p>I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.</p> <p>I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.
------------------------	---

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. **Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				
	I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.				
	Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.				

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero in Point Reyes National Seashore is scheduled to receive full wilderness designation in 2012 and I urge you to do everything possible to see that this happens as intended.				

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As a strong and longtime supporter of our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under

widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

Many wilderness areas are threatened, and so it is increasingly important to maintain those that we have. Point Reyes is a very special place, with many important ecological purposes that should be protected. I myself live in Missouri, but my family has been to Point Reyes, and there's really no place quite like it.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero

and selecting this alternative is the most consistent with the laws and policies affecting this park. **Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Dear Superintendent Cicely Muldoon, I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. I am a native northern Californian. Over my life I have witnessed acre after acre of wild, unique, and magnificent ecosystems succumb to development and encroachment. We are in the honored role of stewards to the Drakes Estero wilderness. This ecosystem draws many people the world over to enjoy its beauty, to study its secrets (through university laboratories), and is the home to migrating birds, harbor seals and eelgrass fish nurseries. Please use every means possible to help ensure it is protected for future generations. Thank you for all of your efforts towards this important and worthy goal. Sincerely, Deborah Morrison 246 West K St Benicia, CA 94510

Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of				

protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended, by selecting alternative "A". It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness. Thank you for reading.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	<p>I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.</p> <p>I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.</p> <p>Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.</p>

We have visited this area several times and it is the highlight of our coastal trips. Keep this area pristine! Once it is violated, it cannot be returned to its original status.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. WITHOUT ESTUARIES MARINE LIFE IS DIMINISHED IN NUMBER AND TYPES OF SPECIES. The United States has lost a significant number of estuaries. Not protecting what estuaries are left is shortsighted.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I have visited this beautiful area with my family. I have spent time here with friends. Please do what is necessary to preserve this pristine area of the west coast. We have over-fished most marine life. Here is an opportunity to further protect so much for future generations. I urge you to uphold the longstanding plan to convert this very special resource to wilderness. I will continue to travel the west coast, provided there is still marine life, birds, whales, seals and beaches to see and interact with. Thank you, Jan Hunter, NPE

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

<b>Correspondence:</b>	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

**Correspondence:** Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

**Correspondence:** For almost 40 years after Congress approved the Point Reyes Wilderness Act, the NPS was charged with eliminating non-conforming uses so that Drakes Estero could formally become a wilderness area. The elimination of commercial oyster operations - growing non-native oysters and clams in Drakes Estero - is long overdue.

Your own draft EIS reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. And the Park Service's Organic Act mandates protection of park resources and values, and strictly limits commercial operations.

Approving the proposal to extend oystering operations would be contrary to the Point Reyes Wilderness Act and a step backward in time. It's time for NPS to let that permit to expire and honor Congress' commitment to the Point Reyes seashore.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

**Correspondence:** I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

<b>Correspondence:</b>	Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.				

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

**Correspondence:** I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.
