Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

The seals don't understand what's going on around them. Hopefully, humans do.

PLEASE REJECT THE NEW PERMIT BY COMMERCIAL OYSTER OPERATIONS;

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Hello!

Today I am writing to you for the area of Drakes Estero. It is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations. These harbor seals depend upon us to take care of them and this area is important to my family, friends and relatives to support it in every way possible.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I personally feel this is only the right thing to do and I count on you to make the right decision. Thanks so much for your time and hard work.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for

Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Bay Oyster Farm should be granted a renewable Special Use Permit. None of the options are acceptable in this instance. The Park Service's action represents another confiscatory action to destroy a legitimate California business activity which has existed since the days of native americans. There is no environmental advantage here and such action would hold due process hostage.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Please help to protect the seals and other wildlife by protecting Drakes Estero.

If you're looking for areas to cut, how about the \$5TRILLION so far spent on the illegal war in Iraq and the war of choice in Afghanistan? Or how about the unfunded tax cuts to useless and morally-depraved rich a-holes to the tune of \$12 TRILLION in this country?

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore. It belongs to all Americans. In 1976 Congress promised the Estero would receive full wilderness protection when the current lease for commercial oyster harvesting expires in 2012. As an emeritus member of the American Institute of Biological Sciences (AIBS), I ask the Park Service to honor this promise & protect Drakes Estero for the present & future generations.

It is home to 20% of the mainland breeding population of harbor seals in CA & supports 10s of 1000s of shorebirds & waterfowl & dozens of species of native fish. Your draft EIS makes clear that existing commercial oyster harvesting damages Drakes Estero & the Seashore's beaches. Your environmental review also indicates that alternative "A", no new permit for commercial oyster operations & protection of the Estero as full wilderness, is the environmentally preferred alternative, that best protects harbor seals, birds, fish, & the world we live in.

Return Drakes Estero to all Americans by selecting alternative "A", finally designating full wilderness protection for Drakes Estero in 2012, as Congress intended, to create the West Coast's only undegraded marine wilderness for the benefit of people & wildlife.

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Correspondence:	I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.				

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Thomas O. Nass' Paraphrase and Enhancement of W.C. Lowdermilk's , U.S. Dept of Agriculture 1948, "Conquest of the Land Through 7,000 Years" This Holy Earth

Thou shall inherit this Holy Earth as a Faithful Steward, respecting, protecting and conserving its Environment, its Resources and its Productivity for future generations. Thou shall safeguard its Fields from erosion; its Soils and sub-Surface from Chemical Saturation; its Waters, its Ground Waters and its Air from Pollution and over-heating. Its Oceans from over fishing; its Forests from desolation; its Mineral Resources from depletion; its Hills from overgrazing by thy herds and its Creatures from extinction, so that thy descendants may enjoy its abundance as once did thee. As All Nations do share in the Ownership of this Holy Earth. Ergo, if any Nation or its leaders should fail in the responsibilities of their Stewardship, then all of thy Crop land shall become sterile ground with wasting gullies; thy waters unfit to drink; thy air too thick to breathe; the meat of thy herds and thy flocks, as the spawn of thy waters and thy oceans, unfit to eat. If any of the above should come to pass, then thy descendants shall gradually diminish in their number and eventually depart from off the face of this Holy Earth. Why? Because thy insatiable Greed and thy ignorance of thy ignorance shall have decreed it so. And it will be thy insatiable Greed, if allowed to continue, that shall eventually take this Country down!

Thomas O. Nass, 5th Marine Division - WWII www.sciline.com

Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster				

operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Please keep the wilderness protection for the Drakes Estero area of the Point Reyes National Seashore. It's so important to protect the harbor seals that breed there, and allowing commercial oyster operations will put the area at serious risk.

Thank you.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: This is one of the most beautiful areas of the entire California Coast. It is an important decision about whether to preserve and its wildlife or proceed with continued commercialization..at point, oyster farming and the equipment required for its tending and harvesting....a boiling pot of busy boats and structures for this activity that harms all wildlife... and the viewers admiration of natures work.

Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Dear National Park Service

This message comments on the Drake's Bay Oyster Farm Operation and continued use permit. The present document with a ten year lease option is not good enough to allow prudent business operation. Longer time frame with renewal option needs to be in the final document. The Bay Area population density, immediately contiguous cattle ranching, benefit(s) to the estuary of the oyster, area economic positive activity, educational and cultural benefits of the present operation, food and labor needs all weigh heavily in favor of granting this vendor a renewal as well as argue mightily against establishment of a marine wilderness area . Please allow this operation further opportunity.

Very truly yours,

Randall R. Smith 26 Nov 2011

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches,

and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to express to you that Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to ALL Americans. In 1976, Congress PROMISED that the Estero would receive FULL wilderness protection when the current lease for commercial oyster operations expires in 2012. I URGE the Park Service to PLEASE HONOR the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I URGE you to PLEASE return Drakes Estero to ALL Americans by selecting alternative "A" and ENSURING FULL WILDERNESS PROTECTION for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

THANK YOU!

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

You know it does NOT make any sense for me to have to write to protect the American wilderness FROM other Americans!!! Why would anyone not consider this a no brainer?? Why are those "Americans " so hell bent on ruining all the blessings given to this great country by GOD ?? It should not be happening.. except they are looking out for their pockets & the dam bottom line ! I am not happy about theses things, it breaks my heart to see all that is going on by people that were elected to do good. I urge the folks who have the chance to make some big changes .. protect what we have , keep it for our heirs .. and see the suffering that will ensue if it is not maintained. Thank you =))

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Whenever I go to Fisherman's Wharf in San Francisco I always stop to watch the seals. They're one of my favorite aspects of the city. Please protect them!

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for

Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

The Seals lived in Their ocean, long before "man discovered" the continent. Please, show compassion & Ethics, INSURE DRAKE ESTERO RECEIVES THE FULL PROTECTION IT WAS PROMISED! The Promise was made in the NAME OF ALL AMERICANS!!!

Thank You, for reading my PLEA!

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence:	Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.				

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches,

and that allowing these operations to continue would cause even more long-term harm.
