Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for

Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

None of the proposed alternatives are appropriate. I support a renewable special use permit for the Drakes Bay Oyster Company (DBOC).

The existing management policies of the National Park Service should be continued. This plan supports continuing operation of the DBOC.

I am an aquatic biologist. I have toured the DBOC and I am impressed with the care with which Mr. Lunny operates the DBOC. He seeks good technical and environmental advice and utilizes the best management practices, both for his farm on the Bay and the DBOC. Mr. Lunny is truly a steward of the Bay.

Oysters were historically part of the Drakes Bay ecosystem. As evidenced by the massive piles of oyster shells on the shore, native Americans harvested oysters there. The native oysters did not survive the degradation of Drakes Bay in more recent times.

Because oysters are filter feeders, Mr. Lunny's farming operation has led to the clarification of degraded Drakes Bay waters. Clear water allowed reestablishment of seagrass meadows. Seagrasses are important components of a healthy estuary. They provide food source and offer shelter to many organisms. They also efficiently remove nutrients, trap sediments and stabilize substrates.

The NPS draft EIS bases its assessment of impacts of oyster farming on faulty or non-existent evidence and does not recognize the oyster farm's contribution to habitat and wildlife restoration. A decision for the removal of the DBOC must not be based on faulty science.

Drakes Bay oysters have been a valued commodity for generations. The value of the DBOC to regional and national restaurants and to local tourism should be recognized.

Correspondence: I support the wilderness designation for Drakes Estero within the Point Reyes National Seashore. The National Park Service and Department of the Interior must uphold the 1976 Point Reyes Wilderness Act and select alternative A, which protects this important marine wilderness and is the environmentally preferred alternative. Drakes Estero is a unique and ecologically significant wildlife area. It is an important stop on the flyway for migrating birds, a refuge and birthplace for harbor seals and a critical native fish nursery. Congress and the public have long intended that Drakes Estero be given the highest federal level of protection as a wilderness area when the commercial oyster lease expires in 2012. This can only be accomplished by selecting Alternative "A" and ending commercial use of this sensitive wildlife refuge. Alternative A is the most consistent with National Park Service laws and policies. The Park Service's environmental review shows that alternative "A" best protects wildlife and the National Park experience. Our national parks are for the people and wildlife protection, and wilderness areas with our parks should not prioritize commercial exploitation. The American public deserves to have this unique marine wilderness protected in a natural state for future generations to enjoy. Drakes Estero is the only marine wilderness on the West Coast, and is irreplaceable, while oysters can be grown elsewhere. As someone who enjoys our spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: The Draft EIS makes clear that allowing the private, commercial oyster company to exploit Drakes Estero for ten more years would have numerous adverse impacts--most notably from the invasive species--on eelgrass habitat, native fish, harbor seals, resident and migratory birds, endangered species, wilderness values and the National Park experience. The No Action Alternative is the environmentally preferred alternative and would provide for the area to become Wilderness in 2012 as Congress intended since the 1970s. ? The Action Alternatives are a direct attack on the Wilderness Act of 1964, run counter to the 1962 Point Reyes enabling legislation and the 1976 Point Reyes Wilderness Act, and set a dangerous precedent for future commercialization of National Parks and Wilderness around the county. ? The oyster operation involves 3,700 motorboat trips per year through harbor seal and eelgrass habitat; promotes the spread of invasive species impacts to native oysters, eelgrass beds, bird, fish and endangered species habitat; and litters remote Point Reyes beaches with thousands of pieces of plastic trash.

Thank you for your consideration of my comments.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting

this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

I understand that your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches,

and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Please do everything in your power to protect and preserve our wildlife and resources both animate and inanimate. We need to teach our children to treat our Earth with conservationism. Thank you for your time in this matter.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: You (the NPS) could have just said, "Hey Lunny,a deals a deal" and kcked him out in 2012/ But NO....you had to rig up cameras out in the woods, and make up a bunch of crap science....If oysters are so bad then why are they trying to raise them in San Rafael? And if no private businesses are allowed on Park land then what are you gonna do, get rid of Yosemite's Curry Village? I suppose Drakes Beach Cafe should go? You'll notice that the State Park System recognizes China Camp as a historical landmark....Well to me so is Johnson's (I mean DBOC)....Nuebacher is RETARDED!!! Look what you did to the WHITE DEER!....You could've had a lottery for hunters...they woulda paid BIG BUCKS to cull your herd...you coulda made MONEY instead you PAID money...to...well, you know what you did to those poor fuckin' things...Yeah great....return it all to wilderness...wipe it all out! Pulling non-native plants from 10 mile beach? Are you NUTS? Think that won't bug the SNOWY PLOVERS? Wanna restore some sand dunes? You can start with SEADRIFT, let's see you restore THOSE DUNES! You won't. You suck. Let Lunny and his Mexicans stay another 10 years.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Let the Drakes Bay Oyster Company continue its operations. It's important that the community continues to provide sustainable food sources and sustainable business in this rural area. The Park Service claims that the business disturbs the harbor seals, but wants to continue opening the area to hikers, kayakers, and the general public, which disturbs the harbor seals MORE than this business. Ego's run rampant at the Park Service, who run false studies to support it's claim that it wants to return the land to it's original state. That is not possible, and there's no logical reason to support this. Humans have been here for a long time, effecting the environment for hundreds of years -- if we need to return it to it's natural state, we need to get rid of the Park

Service as well. This land can support coexistence between the natural environment and humans. Most of the Point Reyes National Seashore is natural -- let it be that people can be part of the environment, not only as visitors, but as living stewards and co-habitants of the area.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of

thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches,

and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for

Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places.

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I am writing to urge the National Park Service to protect Drakes Estero wilderness next year as long-intended. The American public deserves to have the West Coast's only marine wilderness protected for future generations to enjoy. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish spawn. It deserves the highest level of protection as Congress long-intended. As someone who enjoys our nation's spectacular national parks, I urge you to not undermine protections at Drakes Estero and succumb to special interests seeking to commercialize these special places. the beauty is personal. My nephew works up there.. I grew up in the forsts of montana// save it, please..

I urge the National Park Service and the Department of the Interior to select alternative "A", which protects marine wilderness and is the environmentally preferred alternative. The NPS is mandated to provide maximum protection to the natural resources, as stated in the Seashore's legislation, and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are for the people and wildlife protection, not commercial exploitation. The environmental review shows that alternative "A" best protects harbor seals, fish, birds and other wildlife and plants. Drakes Estero is our only marine wilderness on the West Coast, and it is irreplaceable, while oysters can be grown elsewhere.

National Parks and wilderness areas are treasured by the majority of Americans and are for the public interest, not for private commercial exploitation. By protecting wilderness, the National Park Service will set a positive policy example while commercializing it will set a negative example and help others seek their special exemptions from national park laws.

Correspondence: The commercial oyster industry benefits only a few. The public deserves to have important wilderness areas protected as a heritage to our children and grandchildren.

Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Support the NO ACTION Alternative. It is the Environmentally Preferred Alternative and would provide for the area to become Wilderness in 2012 as Congress intended since the 1970s. ? The Action Alternatives have significant long-term adverse impacts to the Drakes Estero environment, including to wetlands, birds, fish, harbor seals, native mollusks, endangered species, eelgrass beds and to wilderness and the national park experience. ? The Action Alternatives are a direct attack on the Wilderness Act of 1964, run counter to the 1962 Point Reyes enabling legislation and the 1976 Point Reyes Wilderness Act, and set a dangerous

precedent for future commercialization of National Parks and Wilderness around the county. ? The oyster operation involves 3,700 motorboat trips per year through harbor seal and eelgrass habitat; promotes the spread of invasive species impacts to native oysters, eelgrass beds, bird, fish and endangered species habitat; and litters remote Point Reyes beaches with thousands of pieces of plastic trash.

Correspondence: Drakes Estero is a national ecological treasure and should become a protected wilderness area. It has outstanding natural resources, including one of California's largest harbor seal colonies and tens of thousands of shorebirds, waterfowl, native fish and endangered species that use its wetlands, mudflats and eelgrass beds.

In the 1976 Point Reyes Wilderness Act, Congress recognized Drakes Estero as a unique recreational and biological resource and promised that this irreplaceable resource would formally become a wilderness area when non-conforming uses were eliminated. Your agency permitted a commercial oyster company to grow non-native oysters and clams on 1,050 acres in Drakes Estero for 40 years, or until 2012.

Your own draft environmental impact statement reveals the extensive damage that the existing operation has caused to Drakes Estero and Point Reyes National Seashore's beaches. As you know, commercial operations of any kind are not permitted in designated wilderness areas because of such damage. Further, the Park Service's Organic Act mandates protection of park resources and values and strictly limits commercial operations.

Your approval of the proposal to extend the oyster company's permit would be contrary to the Point Reyes Wilderness Act and would establish a dangerous precedent at a time when America's public lands and environmental laws are already under widespread attacks in Congress and elsewhere.

We've been waiting long enough. It is time to allow that permit to expire and to honor Congress' commitment. We want our bay back.

I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish

and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for

Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: I urge you to protect Drakes Estero wilderness next year, as long intended. It is in the public interest to create the West Coast's only marine wilderness for the enjoyment of all. The public has waited nearly four decades for these protections to be implemented, which is an immense compromise in itself. Drakes Estero is a rare wildlife refuge where migrating birds stop over, harbor seals give birth, and fish take shelter in eelgrass. As someone who enjoys our nation's national parks and their wildlife, I urge you to uphold the longstanding plan to convert this very special resource to wilderness.

I urge you to select alternative "A", which protects marine wilderness next year and is the Environmentally Preferred Alternative. The National Park Service is mandated to provide maximum protection to the natural resources at Drakes Estero and selecting this alternative is the most consistent with the laws and policies affecting this park. Our national parks are set aside for the public and for wildlife protection, and after waiting nearly 40 years for private commercial use rights to expire, it's time to give the estuary the protection it needs. The environmental review shows that alternative "A" is best for public policy, and best protects harbor seals, fish, birds and other natural resources. Drakes Estero is our only marine wilderness on the West Coast, and is irreplaceable, while oysters can be commercially grown elsewhere.

Please honor the promise made for a protected marine wilderness at Drakes Estero. In doing so, you will set a good policy example and reward the public with an enduring legacy feat found nowhere else on the West Coast.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes

clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.

Your environmental review also shows that alternative "A"--no new permit for commercial oyster operations and protection of the Estero as full wilderness--is the environmentally preferred alternative and the one that best protects harbor seals, birds, fish and other natural resources.

I urge you to return Drakes Estero to all Americans by selecting alternative "A" and ensuring full wilderness protection for Drakes Estero in 2012. It is time to protect Drakes Estero as Congress intended and to create the West Coast's only marine wilderness for the benefit of people and wildlife.

Correspondence: Drakes Estero is the ecological heart of Point Reyes National Seashore and a treasure that belongs to all Americans. In 1976, Congress promised that the Estero would receive full wilderness protection when the current lease for commercial oyster operations expires in 2012. I urge the Park Service to honor the wilderness promise and protect Drakes Estero for future generations.

Drakes Estero is home to 20 percent of the mainland breeding population of harbor seals in California and is used by tens of thousands of shorebirds and waterfowl and dozens of species of native fish. Your draft environmental impact statement makes clear that the existing commercial oyster operation is causing extensive damage to Drakes Estero and the Seashore's beaches, and that allowing these operations to continue would cause even more long-term harm.
