

pH Before, During, and After Restoration in Major Study Areas

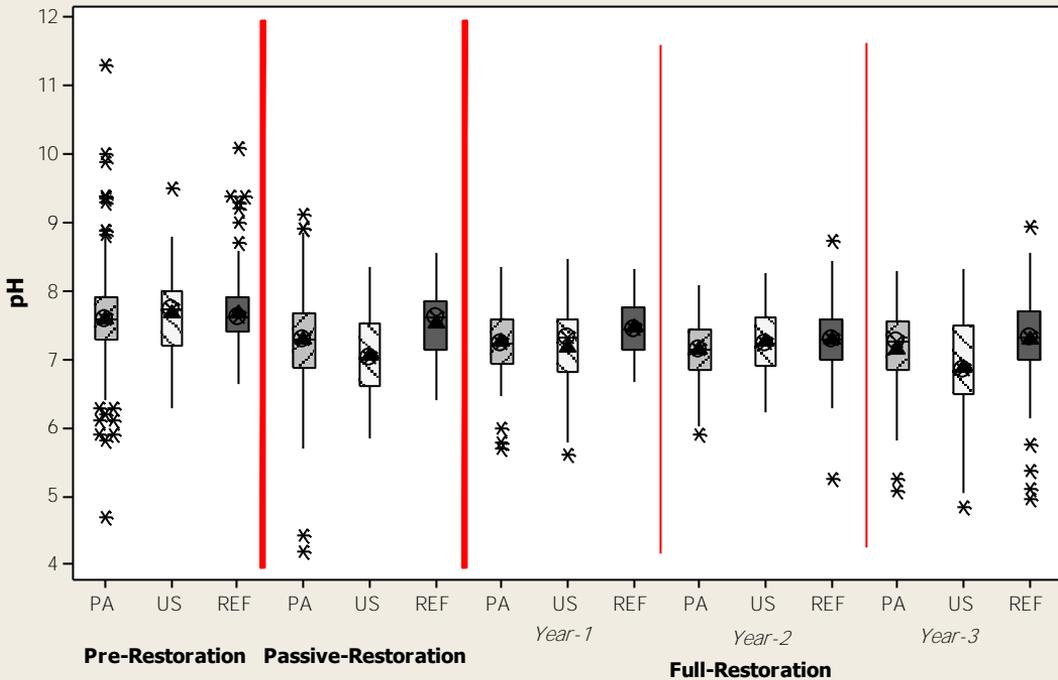

Figure 2. Average, median, and other summary statistics for pH for Study Areas Pre-Restoration, during Passive Restoration, and in the first three years of Full Restoration. *Boxplots indicate first and third quartiles (25%, 75%). Lines indicate 10th and 90th percentiles. Medians are indicated by diagonal-hatched circle, with means designate by black triangles.*
