

Plovers at a Glance 2010

Snowy plover nest and eggs

Current Stats

Nest Success

- 15 nests
 - 9 nests hatched (with at least 1 egg)
 - 5 nests lost (2 to predation, 3 abandoned)
 - 1 nest currently being incubated

Egg Hatch Success

- 42 eggs laid
 - 18 eggs hatched
 - 6 eggs failed to hatch
 - 2 eggs currently being incubated
 - 16 eggs lost (6 to predation, 7 abandoned)

Chick Success

- 18 chicks hatched
 - 3 chicks have fledged
 - 7 chicks currently on the beach (in 3 broods)
 - 8 chicks lost (due to predation or unknown)

August Update

The snowy plover breeding season has now entered the home stretch. Of the 15 recorded nests this year, only 1 has yet to hatch. With a number of chicks on the beach and a couple eggs being incubated, the success of the plover season has yet to be determined. We hope to add many more chicks to our count of 3 fledglings so far this year. Check back again next month for another update.

NPS Photo

On weekends and holidays throughout the summer, **snowy plover docents** give their time by informing park visitors about the status of the “snowies”.
