

## Come learn about coastal dunes in Point Reyes National Seashore

Friday, January 8, 2016

6 – 7:30 pm

Red Barn Classroom

Point Reyes National Seashore

Point Reyes National Seashore and Point Reyes National Seashore Association present an evening of discovery about dunes and the plants and animals that live there.

### “Of Mice and Plants”

Dr. Tiffany Knight and Dr. Eleanor Pardini,  
Washington University, St. Louis, MO.

Recent research at Point Reyes National Seashore has shown that invasive European beachgrass provides shelter that allows mice to consume large quantities of fruits of the endangered plant, Tidestrom’s lupine.

### “Secretive inhabitant of the beach and dunes: Snowy Plovers on the West Coast”

Dr. Lynne Stenzel, Point Blue Conservation Science  
Learn the intriguing life-history of snowy plovers  
and hear how the public, government agencies,

and nonprofit organizations have collaborated to recover their populations in many locations along the coast.
