

Bear Valley Area

Be On The Lookout For

Poison Oak
Toxicodendron diversilobum

Contact with any part of the poison oak plant causes a blistering rash. Generally this can be treated at home. More severe cases may need to see a doctor. If you know you have had contact with poison oak, thoroughly wash the affected area and your clothing as soon as possible to remove the active oils. Preventive lotions are available to help avoid reactions to poison oak.

Stinging Nettle
Urtica dioica

Bare skin brushing up against a stinging nettle plant tends to break delicate defensive hairs on the leaves and stems that protect the plant from browsing animals. This releases a trio of chemicals, usually resulting in a painful skin rash, typically lasting less than 24 hours. A topical analgesic (used to treat poison oak or bug bites) can be applied to help alleviate the sting.

Deer Ticks

Ticks that carry Lyme disease are known to occur in this area. Stay on trails and check your clothing frequently. To prevent infection, remove the ticks with their heads intact using tweezers. Wearing light-colored, long pants helps you spot them; tuck your pants legs inside your socks to keep them from crawling up the inside of your pants legs. Always check your body completely at the end of your hike.

Fire Permits

Hiking Tips

You may obtain a free permit for a beach fire at Point Reyes National Seashore from any park visitor center. You must follow regulations as described on the permit. On high fire days, all permits are null and void. For current fire conditions, call: 415-464-5100 x2 x1.

- Take plenty of water and snacks.
- Bring extra layers in case the weather changes
- Check for current trail conditions.
- Allow a 2-mile/hour (3-km/hour) pace for an average hiker.
- When the days are short, carry a flashlight or headlamp.

- If you hike alone, tell a friend where you are going and when you expect to return, or leave your information in your glove compartment.
- For tide and weather information, inquire at the visitor center, or call 415-464-5100.

ONE HOUR WALKS

Trail/Trailhead	Distance (roundtrip) Time/Difficulty	Description
EARTHQUAKE TRAIL Bear Valley picnic area	0.6 mi./1 km (15 min./easy)	DISCOVER the geology of the San Andreas Fault Zone through interpretive signs on this paved loop. A fence along the trail illustrates the 16 feet (3 meters) of displacement that occurred during the 1906 earthquake.
WOODPECKER TRAIL Bear Valley parking lot	0.9 mi./1.4 km (15 min./easy)	EXPLORE the ecology of the Bear Valley forest and meadow ecosystems using a free booklet you can pick up at the visitor center. The trail is a lovely, fragrant uphill stroll in bay laurel forest.
