

Draft Gaviota Coast Feasibility Study

Alternative 2: Enhanced Local and State Management

Alternative 2 provides a menu of recommendations that could be pursued by the local community. Recommendations include:

1. Private landowners could take individual and cooperative action to protect the area's significant resources.
2. Non-profit organizations could partner to develop new programs and pursue new funding sources in order to enhance their resource conservation capabilities.
3. Additional private and governmental measures could be pursued to support agricultural land conservation and to enhance the viability of the area's farming and ranching operations.
4. Certain regulatory programs could be strengthened and new programs developed to support resource conservation.
5. Public land management agencies could enhance and expand their capacity for resource protection and public access.
6. Vandenberg AFB could develop partnerships with other organizations to expand and enhance public access and education programs.
