

Raptor Closures

The following formations are closed
March 1 through July 31, 2011

Closure Areas Include:

Twin Owls

Rock One

**Thunder Buttress
(The Parish)**

Closures include the named rock formations and the areas extending 100 yards surrounding the base of the formations including all climbing routes, outcroppings, cliffs, faces, ascent and descent routes, and climbers' access trails to the formations.

- Each year Rocky Mountain National Park initiates temporary closures in certain areas of the park to ensure birds of prey (raptors) will be undisturbed during their breeding and nesting seasons.
- Closure notices will also be posted at key access points in the park.
- As breeding and nesting data are collected, additional closures may be necessary, or closures may be lifted.

Areas not listed above are presumed to be open. These closures will be lifted or extended as conditions dictate. Check nps.gov/romo for more information about raptor protection and closure updates.

When necessary park rangers will issue citations to persons violating the terms of this closure under the authority of
16 USC 3, 36 CFR 1.5 (f)
