### Safety Tips

- Check river conditions before launching [www.nps.gov/sacn/planyourvisit/current-conditions](http://www.nps.gov/sacn/planyourvisit/current-conditions).
- Know your paddling ability. Not all stretches of the Riverway are suitable for beginners.
- Avoid trees that have fallen into the river. They can catch and overturn your vessel.
- Wear sunscreen, sunglasses, and a hat to prevent sunburn.
- Use alcohol responsibly.
- Do not bring glass containers to the Riverway. Broken glass cuts bare feet.
- Protect your feet with river shoes or sandals
- Bring your own drinking water. River water is not safe to drink unless purified.
- Check for ticks.
- Watch for poison ivy.

## St. Croix River Map 6: Sand Creek Landing to Highway 70

common merganser

*Hundreds of baby mergansers are raised on the river every summer. Look for babysitter females with lots of babies following along.*

### In This Stretch

- Rapids begin downstream of **Nelsons Landing**.
- Stay to the left if you want to be in the deeper main channel at the place where the river splits around large islands.
- To paddle the **Kettle River Slough**, take the right channel at the split and then go right again near the first big island. Near the Kettle River confluence with the St. Croix there is a ledge and a series of fast and steep rapids that are regularly Class II. You will miss **Fox Landing** when taking this route.
- Wide, shallow and easy rapids characterize the St. Croix after the Kettle River joins it.
- The **Sandrock Cliffs** channel is two miles past **Soderbeck Landing** on the left. It can dry up in low water.
