SANTA FE NATIONAL HISTORIC TRAIL

MISSOURI, KANSAS, OKLAHOMA, COLORADO, NEW MEXICO

MAPS

- 1-5 Central and Western Missouri
- 6-18 Western Missouri and Eastern Kansas
- 19-29 Eastern Kansas - Fort Leavenworth to the Main Trail
- 30-37 Central Kansas
- 38-51 Western Kansas
- 52-67 Southwestern Kansas, Oklahoma, Southeastern Colorado, and Northeastern New Mexico - Aubry Cutoff and Cimarron Route
- 68-79 Southeastern Colorado and Northeastern New Mexico - Cimarron and Mountain Routes
- 80-87, 97 Southeastern Colorado and Western Kansas - Mountain Route
- 71-72, 87-96, 98 Southeastern Colorado and Northeastern New Mexico - Military Road from Granada to Fort Union
- 98-99 Northeastern New Mexico - Ocate Crossing and Routes to Taos

INTRODUCTION

Once the main route of the Santa Fe Trail, including the Mountain and Cimarron routes, was designated by Congress in 1987 as a national historic trail, one of the most important tasks was to map the designated route. The legislative map depicting the trail had a scale of 1 inch to about 80 miles, which was not sufficient for planning and management purposes. This supplement to the *Santa Fe National Historic Trail Comprehensive Management and Use Plan* includes route maps for the designated main trail, plus major branches, cutoffs, and parallel routes, as well as areas of concentrated resources.

Altogether there are 109 maps, including large-scale area maps for locations where trail resources are concentrated; nine key panels identify the sequence of maps and indicate the designated national historic trail. Important sites are labeled and marked with a dot, while the main trail and its major branches are denoted with a dark black line. Identifiable ruts are marked with a series of wavy lines, and water crossings are marked with an X. Sections of the trail of undetermined location are noted with a dashed line. Further research has revealed no records of Santa Fe Trail caravans using the Independence to Westport Road; therefore, the map that previously showed this route segment (no. 10) has been deleted from this volume.

The trail mapping and inventory of cultural resources was performed by The Patrice Press, under a contract with the National Park Service. The first step in mapping the trail was to delineate on base maps the routes marked by Joseph C. Brown in the survey conducted by George C. Sibley in 1825 from Fort Osage on the Missouri River; the route identified by Hobart E. Stocking in his 1971 publication, *The Road to Santa Fe*; routes on cadastral maps showing landownership for the trail corridor; and routes from locality maps done by other interested mapmakers over the years. These lines were marked on county road maps at a scale of about 1/4" to 1 mile. (In the Kansas City metropolitan area, where U.S. Geological Survey maps were used, the scale is 2-1/2" to 1 mile.)

Once in the field, ground-truthing of previous trail mapping was done, and county road maps were validated or corrected. During this process important information was gathered from local experts, who willingly took the time and effort to show routes, ruts, and sites with which they were familiar. Several little known or unknown portions of the trail were mapped as a result.

Less than 10 percent of the designated trail is publicly owned. Therefore, visitors should make certain they have permission from private landowners before trying to gain access to trail resources. Likewise, public land managers should also be asked about access to the trail.

An official set of trail maps will be kept at the administrative office of the Santa Fe National Historic Trail (the NPS Southwest Regional Office in Santa Fe, New Mexico). As research findings indicate changes in trail locations or branches, or the need to add sites to or delete them from the inventory, then such changes will be officially documented in that office. Changes to the congressionally designated national historic trail route will be published in the *Federal Register*, in conformance with the National Trails System Act, and necessary revisions will be made to the *Comprehensive Management and Use Plan*.

Santa Fe, N. Mex., Topographic Map

The City of Santa Fe funded a study of the Santa Fe Trail within the city limits, executed during the summer of 1989 by Michael E. Pitel. He found a remarkable series of ruts leading toward the Plaza along the route known to be the Santa Fe Trail. These discontinuous segments are indicated on this 7.5-minute USGS quadrangle.

During that year Stephen Burt of Santa Fe con-

ducted archaeological surveys at the Quail Run development, between modern Old Pecos Road and Old Santa Fe Trail. Through the City of Santa Fe Archaeological Districts Ordinance, and with the cooperation of the developer of the property, protective easements have been established along the east border of the property, where highly visible ruts remain.

This map volume now returns to "the States," over the Mountain Branch of the Santa Fe Trail. The exit from Santa Fe is the reverse of the entrance. The road does not split until reaching Watrous, where the Mountain Branch separates from the Cimarron Cutoff.

This is a detailed topographic map of Big Horn County, Montana. The map features a prominent grid system with section numbers ranging from 1 to 36 across the top and bottom, and 1 to 30 along the sides. Key geographical features include John Martin Reservoir, which occupies a significant portion of the lower-left quadrant, and the Mountain Ranch area situated along its northern shore. Several towns are marked, including Kreybill, Hasty, McClave, and Old Fort Lyon. The map also shows various creeks such as Caddo Creek, Bird Creek, and Kicking Horse Creek. Infrastructure elements like the Northern Pacific Railway and several state highways (e.g., 50, 198) are depicted. A compass rose is located in the upper right corner, and another smaller one is in the lower left. The map is labeled with 'Big Horn' in large letters across the center-right. At the bottom, it indicates 'Sheet 85 of 99' and provides the reference number 'Mar 90-624/40000'. Section labels R51W, R50W, R49W, and R48W are visible at the very bottom edge.

As the nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural and cultural resources. This includes fostering wise use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people. The department also promotes the goals of the Take Pride in America campaign by encouraging stewardship and citizen responsibility for the public lands and promoting citizen participation in their care. The department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

Publication services were provided by the graphics and editorial staffs of the Denver Service Center.
