

HAVE YOU SEEN ME IN SAGUARO NATIONAL PARK?

If you see a Gila monster **inside the park** and can photograph it from a safe distance, please send photos to us!

Each individual color pattern is unique, like a fingerprint. We use visitor photos to study home range, activity, and survival.

What to include:

- Good quality **photos** (can see marking pattern)
- **Time**
- **Date**
- **Location** (GPS coordinates or trail description)

REMEMBER!
Gila monsters are **venomous** and **protected** in Arizona. Never try to touch or harass them - keep your distance!

Send photos to:
gilamonsterresearch@gmail.com
