

Saguaro National Park - Saguaro Census Plot #17
November 7, 2009 – Sky Island Alliance

In this figure, green columns are the number of saguaros counted in 1990 and blue columns are the ones we counted in 2009. Each column represents a size range, with small ones (less than 1 meter tall) on the far left side and large ones to the right, with the total number on the far right. There are about 100 more saguaros in 2009 than there were in 1990.
