

Saguaro National Park - Saguaro Census Plot #75J
 November 11, 2009 – University of Arizona GIS Class

Plot #75J

In this figure, orange columns are the number of saguaros counted in 1975, purple columns are the ones counted in 2001, and blue columns are the ones we counted in 2009. Each column represents a size range, with small ones (less than 1 meter tall) on the far left side and large ones to the right, with the total number on the far right. There has been an increase of more than 50 saguaros on the plot since 2001.
