The Saguaro Wilderness Area was officially designated as wilderness in 1976. This large, roadless backcountry consists of 57,930 acres within the Rincon Mountain District of Saguaro National Park. It is bounded on three sides by the 38,590 acre Rincon Mountain Wilderness Area, which lies within the Coronado National Forest. Although these wilderness areas are adjacent to one another, management philosophies differ. This brochure was developed to provide users with the guidelines and regulations that govern the Saguaro Wilderness Area within Saguaro National Park.

For information regarding the Rincon Mountain Wilderness Area, located within the Coronado National Forest, call (520) 670-4552.

Plant communities within the Saguaro Wilderness Area vary from hot and dry desert scrub to cool and moist pine forest. Six different biotic communities are represented here including: desert scrub, desert grassland, oak woodland, pine-oak woodland, pine forest and mixed conifer forest. This biologically diverse area supports a tremendous variety of plant and animal species. Please help us protect this wild and wonderful place; leave all natural and cultural objects as you find them.
Camping

Camping is allowed at 6 designated campgrounds within the Saguaro Wilderness Area. These campgrounds are located throughout the wilderness area and a permit is required for all overnight stays. The fee for this permit is $8.00 per campsite, per night. Refunds for cancelled camping permits are not given for any reason. However, you may reschedule your trip within two months. Senior Pass and Access Pass holders receive a 50% discount on camping fees. Please include your pass number on the permit application when mailing or faxing in requests. The maximum number of people allowed per campsite is 6. The maximum size of any one group is 18 persons.

Douglas Spring, Grass Shack, Juniper Basin, Happy Valley Saddle and Spud Rock Spring Campgrounds each have a total of 3 campsites. Manning Camp Campground has 6 campsites.

Water

Without question, water will be your most important concern while visiting the Saguaro Wilderness Area. Surface water is generally scarce during most of the year. At times, it is non-existent. Start your trip with plenty of potable water, know where water sources are located and plan your trip according to water availability.

For current water reports, inquire at the visitor center - (520) 733-5153. It is recommended that you treat/filter all water used for human consumption.

All campgrounds within the Saguaro Wilderness Area are situated next to intermittent streams or springs. During dry seasons, water may not be available.

The water source at Manning Camp is a spring surrounded by chain link fencing. Please do not enter the fenced area. Water may be obtained a short distance down stream.

If your itinerary calls for you to exit on the same trail you entered on, you might consider caching potable water along the trail. This will assure you a source of drinking water on your way out. We recommend sealed water containers with your name and the date written on them.

Leave No Trace

The ethics and techniques of “Leave No Trace” camping were developed by the National Outdoor Leadership School to assist outdoor users in minimizing their impacts on wild places. When camping in the Saguaro Wilderness Area, we ask that you adopt these ethics and techniques to help us protect and preserve this Sonoran Desert treasure.

Principles of Leave No Trace

- Plan ahead and prepare.
- Camp and travel on durable surfaces.
- Pack it in, pack it out.
- Properly dispose of what you can’t pack out.
- Leave what you find.
- Minimize use and impact of fires.
- Protect and conserve water resources.

For additional information, a series of booklets are available from NOLS. Saguaro National Park recommends “Desert & Canyon Country” & “Backcountry Horse Use”.

Topographic Maps

All persons using the Saguaro Wilderness Area should have the necessary orienteering and map reading skills to safely get around.

We suggest that you carry National Geographic’s “Trails Illustrated Map”, which covers the entire park in one waterproof, tear-resistant map. This map is available at the visitor center.

Also available are three U.S.G.S. topographic maps, which encompass the majority of Saguaro National Park. They are: Tanque Verde Peak, Mica Mountain and Rincon Peak, Ariz. These maps are available at the visitor center.

To aid in planning your wilderness experience, the National Geographic Trails Illustrated map may be purchased by mail or phone prior to your arrival. Contact the Western National Parks Association bookstore at the address/phone below.

Five trailheads lead into the Saguaro Wilderness Area. To help you plan your trip, we have separated these trailheads by the level of difficulty it takes to reach a particular trailhead.

Access to the Saguaro Wilderness Area is available from the south boundary of the park, at Camino Loma Alta Trailhead. There is NO public access to Madrona, which is permanently closed and is not staffed at any time.

Access to the Saguaro Wilderness Area via the Miller Creek, Turkey Creek and Italian Spring Trailheads is through United States Forest Service (USFS) lands. For information about the Coronado National Forest, call (520) 670-4552.

Easy Access

The trailheads that offer the easiest, paved road access are as follows.

The Tanque Verde Ridge Trailhead is located off the park’s scenic loop drive, within the Javelina Picnic Area. Vehicle access to the Tanque Verde Ridge Trailhead is available from 7:00 a.m. to sunset daily. The scenic loop drive is closed and locked nightly.

The Douglas Spring Trailhead is located at the east end of Speedway Boulevard and is accessible 24 hours per day. Due to this easy access, vehicle break-ins have occurred at this trailhead. Do not leave valuables inside your vehicle - visible or otherwise. Many wilderness users choose to have a friend drop them off and pick them up rather than leaving a vehicle at this trailhead.

Moderate Access

The Miller Creek and Turkey Creek Trailheads are generally accessible by light truck or car. However, during or after heavy rainfall, access to these trailheads can be restricted or impassable. To reach either of these trailheads, get off Interstate 10 at exit #297 and head north. The road is paved for the first two miles and graded gravel for the remainder of its length. When you enter the Coronado National Forest, the road is named USFS Route #35. The turnoff to the Miller Creek Trailhead is 16 miles north of I-10.

The Turkey Creek Trailhead turnoff is one-half mile beyond the Miller Creek turnoff. Look for USFS Route #4408 and turn left. Vehicles without high clearance and 4-wheel-drive will not be able to negotiate the last 1.6 miles of road leading to the Turkey Creek Trailhead.

Both the Miller Creek and Turkey Creek Trailheads are located on USFS lands; you must hike an additional 1.5 miles on either trail to reach the boundary of Saguaro National Park.

The Loma Alta trailhead is at the north-end of Camino Loma Alta, north of Old Spanish Trail. Horse parking is at pavement end; hikers may proceed one half mile further on a dirt road.

Difficult Access

The Italian Spring Trailhead is the most difficult trailhead to access. To reach this trailhead, drive east on Tanque Verde Road. At the intersection with Wentworth Road, Tanque Verde Road will change names to Redington Road. At the boundary of the Coronado National Forest, the surface of Redington Road will change from pavement to gravel. While the gravel portion of Redington Road does not require 4-wheel-drive, high clearance is recommended as it is not regularly maintained and is usually in poor condition.

From the beginning of the gravel, travel 9.6 miles to USFS Route #37 and turn right. Vehicles with 4-wheel-drive and high clearance may drive an additional 2.6 miles to the Italian Spring Trailhead. This trailhead is located on USFS Trail; you must hike an additional 5.1 miles to reach the boundary of Saguaro National Park.
Livestock Regulations

- At Saguaro National Park, livestock is defined as mules, donkeys and horses only. All other animals, including pets and other livestock, are prohibited.
- Livestock are prohibited on the Tanque Verde Ridge and Miller Creek Trails and the last half mile of the Rincon Peak Trail.
- The maximum number of livestock allowed overnight at the Douglas Spring, Grass Shack, Spud Rock Spring and Happy Valley Saddle Campgrounds is 5 head.
- Free-trailing, loose herding or tying livestock to trees is prohibited.
- Grazing livestock is prohibited within the park. You must provide your own feed. Weed-free pellets are recommended.
- Livestock droppings must be removed and scattered away from campgrounds.

Wilderness Regulations

- Off trail travel is only permissible above 4,500 feet in elevation.
- Campfires are prohibited at the Douglas Spring and Grass Shack Campgrounds. Gas stoves are encouraged at all campgrounds.
- Where campfires are allowed, make sure your fire is completely extinguished before departing.
- Only dead and downed wood may be collected and burned.
- Mechanized (bikes) or motorized vehicles are prohibited in the wilderness area.
- Pets are prohibited on all trails within Saguaro National Park.
- Outhouses are provided at all six designated campgrounds. Elsewhere, bury human waste at least 150 feet from trails, meadows and water sources.
- Do not put trash in the outhouses.
- The use of firearms and other weapons is prohibited in Saguaro National Park.
- Digging trenches around tents or modifying camp areas is prohibited.
- Camping is allowed in designated campgrounds only. Do not deviate from your itinerary.
- Pack out everything you pack in.
- Camping permits must be visible while hiking in/out of the wilderness area. At all other times, leave permit on your tent.
- Persons under 16 years of age must be accompanied by an adult.
- Permits may be issued up to two months in advance, but no later than 12:00 noon the day of departure.
- The total length of stay may not exceed 10 days, with no more than 5 consecutive days at any one campground.
- Maximum group size is 18 persons.
- Camping permit applications received by mail or fax must be fully complete to have the camping permit mailed back to you.

Know Before You Go

- Carry at least one gallon of water per person, per day. Additional water is recommended during the summer as temperatures can be extremely high, especially in the lower elevations of the park.
- Treat all water collected for human consumption. Water is generally scarce throughout the year.
- Be careful with campfires. Check with the visitor center regarding fire restrictions prior to your trip.
- Be cautious around all wildlife. Know what to do if you encounter Africanized bees, black bears and mountain lions.
- Do not leave valuables in vehicles.
- Pace yourself according to your own physical condition.
- Wear appropriate clothing and footwear.
- Respect the weather in all seasons.
- Do not cross flooded streams. Wait until the flow subsides.
- Use biodegradable soap and wash away from water sources.
- Cellular phones work in many parts of the Saguaro Wilderness Area, but not in all. High points with a view of Tucson work best.

Weather

The temperatures below are monthly averages for Manning Camp, which is located at an elevation of 8,000 feet, and the visitor center, which is located at an elevation of 3,080 feet.

Winter Rainy Season:
The typical winter rainy season occurs from December through February. Rainfall is generally light and gentle, but may fall for extended periods. Expect snow at higher elevations.

Summer Rainy Season:
The typical summer rainy season occurs from July through September. Rainfall can be intense and heavy. Lightning and flash flooding are common - extra caution is advised.

Cellular phones work in many parts of the Saguaro Wilderness Area, but not in all. High points with a view of Tucson work best.
The Rincon Mountains are home to a small population of black bears. To prevent these bears from associating food with humans, bear-proof storage containers are provided at all six designated campgrounds.

Store all scented items, including food, garbage or toiletries, inside these bear-proof containers. Improperly stored items may lead to property damage and/or possible human injury. Do not leave food or trash inside the bear-proof container when departing.

Keep clothes, sleeping bags and tents as odor free as possible, do not cook or take food inside your tent. Clean up thoroughly after each meal and never burn food scraps in your campfire.

For your safety, and that of other wilderness users, do not feed, touch or approach any bear.

---

**Bear-Proof Containers**

**Black Bears**

If approached by a black bear:

Make Yourself Look Large
Raise your shirt or jacket above your head to give the impression of size.

Scream Loudly
Make sure the bear knows you are a human. Scream loudly.

Fight Back
If a bear attacks, fight back vigorously.

---

**Africanized Honey Bees**

If attacked by bees:

Get Away Quickly
Run from attacking bees and seek shelter in an enclosed space such as a vehicle or building. If cover is not available, continue running until the bees stop chasing you. In some cases this distance may be as much as one-half mile.

Cover Your Head
Africanized honey bees target the eyes, ears, nose and mouth when attacking. Use your shirt or jacket to cover your head while running away. Keep the hole you are looking out of as small as possible, without impairing your vision.

Do Not Kill Attacking Bees
If you kill an attacking bee, it will release an alarm scent that will attract other bees from the colony.

Do Not Flail Your Arms
Flailing your arms or swatting at bees will only make the attack worse.

Seek Medical Attention
If you are attacked by Africanized honey bees, call 911 and seek medical attention immediately.

---

**Mountain Lions**

If approached by a mountain lion:

Make Yourself Look Large
Raise your shirt or jacket above your head to give the impression of size.

Scream Loudly
Make sure the mountain lion knows you are a human. Scream loudly.

Back Away Slowly
Do not turn your back on the animal. Back away slowly, and do not run. If you turn and run, instinct may trigger the animal to chase after you and attack.
Livestock at Manning Camp

Manning Camp, located in the heart of the Saguaro Wilderness Area, is the primary staging area for a variety of wilderness management functions. During the summer, both fire and trail crews use Manning Camp as their base of operation. Throughout the year, a variety of researchers also stay at Manning Camp while studying the plants and animals of the park.

The supplies needed to support these operations are carried into the Saguaro Wilderness Area by pack mules. Due to the number of livestock at Manning Camp, additional rules apply.

- All livestock at Manning Camp must be kept in the corrals. There are two small corrals and one large corral.
- When government-owned livestock are at Manning Camp, privately-owned livestock are not permitted.
- The maximum number of livestock allowed overnight at Manning Camp is 10 head.
- Water for livestock is available at the troughs in the corrals during the summer months only.
- When water is not available in the troughs, livestock must be watered at the creek below the corrals.
- Livestock and people are not allowed within the fenced water storage pond above the dam.
- Livestock are not allowed in camp sites at any time.
- Hitching rails are provided for loading/unloading only. Livestock must be loaded/unloaded at the hitching rail and supplies carried to/from your campsite.
- Do not put saddles on hitching rails or tie livestock to corral fences.
- Picketing or hobbling of livestock is not allowed at Manning Camp.
- Grazing livestock is prohibited within the park. You must provide your own feed. Weed-free pellets are recommended.
A camping permit is required for each group or individual staying overnight in the Saguaro Wilderness Area. By signing the permit, you agree to abide by the regulations as set forth on page 6 of this brochure. If using livestock at Manning Camp, additional regulations apply, please refer to page 9 for this information.

Permits may be issued up to two months in advance, but no later than noon on the day of departure. All applications by mail or fax must be complete to process. Questions? Call the visitor center at (520) 733-5153.

Permits may be obtained:

1. In person. Stop by the visitor center, located at 3693 South Old Spanish Trail, Tucson AZ. Hours are 9:00 a.m. to 5:00 p.m. daily.

2. By mail. Complete this camping permit application and mail to the address on the lower-rear portion of the application. Payment must be included with application. Allow 2-3 weeks for mail in applications.

3. By fax. Fax completed applications to (520) 733-5195. Payment must be included -credit card only.
Manning Camp is only staffed during the summer.
