

Project Locations for 2014

The parks are planning **11 projects** this year totaling up to **3,628 acres**. They are designed to improve protection of communities and restore or maintain forest health. Remember, the ultimate timing and completion of burns depends on funding, air quality, local and national fire activity, fuel moisture, and weather.

What About Unplanned Fires?

Lightning fires and human-caused fires are unplanned events. NPS crews are trained to respond to these situations. When necessary, the parks shift priorities from planned projects to respond to other fires.
