

Visitor Guide: Winter 2011-2012

National Park Service
U.S. Department of the Interior

Sequoia & Kings Canyon National Parks & Sequoia National Forest/Giant Sequoia National Monument

Welcome to the Land of Giants

YOU EXPECT GIANT TREES and huge canyons—and you won't be disappointed. What may surprise you is that the whole of these parks is even greater than the sum of its famous parts.

Rising from 1300' to 14,494' (the highest elevation in the lower 48 states), these parks protect a spectacular elevational range. This span from low to high means dramatic shifts from warm foothills to cool forests to the cold High Sierra. It means diverse plants and animals living in extremely varied conditions. It means steep roads and trails that climb mountains, and cold rivers that plunge down from their heights.

The caretakers of this landscape are also diverse. This is not one, but two national parks—Sequoia and Kings Canyon—managed by the National Park Service as one. A national monument, which is part of a national forest, borders the two parks. Researchers

with the U.S. Geological Survey conduct scientific studies on park resources here. The Sequoia Natural History Association runs bookstores at visitor centers, then plows those funds into park education and research efforts. Another non-profit, the Sequoia Parks Foundation, supports important projects, from outreach to trails.

All park partners, public and private, cooperate to meet a challenging mission—providing for public enjoyment while keeping the parks unimpaired for future generations. *You* are the most important partner! Experience these parks and learn all you can. Your help is needed to preserve and share these treasured landscapes.

SIMULTANEOUS SEASONS: Winter and spring overlap here, with winter snows blanketing the peaks and forests while the foothills turn green with new growth. Be prepared for winter's frosty air and slick roads when you head uphill. If you're not up for snow, explore the foothills. They offer year-round camping and hiking, plus wildflower displays that start in January when higher elevations lie cold and ice-bound.
