

Remembering Pearl Harbor: The USS Arizona Memorial

(National Park Service Photo by Jayme Pastoric)

Today the battle-scarred, submerged remains of the battleship *USS Arizona* rest on the silt of Pearl Harbor, just as they settled on December 7, 1941. The ship was one of many casualties from the deadly attack by the Japanese on a quiet Sunday that President Franklin Roosevelt called "a date which will live in infamy." The *Arizona's* burning bridge and listing mast and superstructure were photographed in the aftermath of the Japanese attack, and news of her sinking was emblazoned on the front page of newspapers across the land. The photograph symbolized the destruction of the United States Pacific Fleet at Pearl Harbor and the start of a war that was to take many thousands of American lives. Indelibly impressed into the national memory, the image could be recalled by most Americans when they heard the battle cry, "Remember Pearl Harbor."

More than a million people visit the USS Arizona Memorial each year. They file quietly through the building and toss flower wreaths and leis into the water. They watch the iridescent slick of oil that still leaks, a drop at a time, from ruptured bunkers after more than 50 years at the bottom of the sea, and they read the names of the dead carved in marble on the Memorial's walls.

Where this lesson fits into the curriculum

Time Period: 20th century American history

Topics: This lesson could be used in American history units on World War II or in courses dealing more generally with war and conflict. Students will better understand the logistics of the Japanese attack, the *Arizona's* destruction, and the significance of the Memorial to the people of the United States.

Relevant United States History Standards for Grades 5-12

This lesson relates to the following National Standards for History from the UCLA National Center for History in the Schools:

US History Era 8

- **Standard 3A:** The student understands the international background of World War II.
 - **Standard 3B:** The student understands World War II and how the Allies prevailed.
 - **Standard 3C:** The student understands the effects of World War II at home.
-

Relevant Curriculum Standards for Social Studies

This lesson relates to the following Curriculum Standards for Social Studies from the National Council for the Social Studies:

Theme I: Culture

- Standard B - The student explains how information and experiences may be interpreted by people from diverse cultural perspectives and frames of reference.

Theme II: Time, Continuity and Change

- Standard D - The student identifies and uses processes important to reconstructing and reinterpreting the past, such as using a variety of sources, providing, validating, and weighing evidence for claims, checking credibility of sources, and searching for causality.

Theme III: People, Places, and Environment

Remembering Pearl Harbor: The USS Arizona Memorial

- Standard A - The student elaborates mental maps of locales, regions, and the world that demonstrate understanding of relative location, direction, size, and shape.
- Standard D - The student estimates distance, calculates scale, and distinguishes other geographic relationships such as population density and spatial distribution patterns.
- Standard I - The student describes ways that historical events have been influenced by, and have influenced, physical and human geographic factors in local, regional, national, and global settings.

Theme VI: Power, Authority, and Governance

- Standard C - The student analyzes and explains ideas and governmental mechanisms to meet needs and wants of citizens, regulate territory, manage conflict and establish order and security.
- Standard F - The student explains conditions, actions, and motivations that contribute to conflict and cooperation within and among nations.
- Standard G - The student describes and analyzes the role of technology in communications, transportation, information-processing, weapons development, or other areas as it contributes to or helps resolve conflicts.
- Standard I - The student uses economic concepts to help explain historical and current developments and issues in local, national, or global contexts.

Theme VIII: Science, Technology, and Society

- Standard A - The student examines and describes the influence of culture on scientific and technological choices and advancement, such as in transportation, medicine, and warfare.

Theme IX: Global Connections

- Standard E - The student describes and explains the relationships and tensions between national sovereignty and global interests in such matters as territory, natural resources, trade, use of technology, and welfare of people.

Theme X: Civic Ideals, and Practices

- Standard C - The student locates, accesses, analyzes, organizes, and applies information about selected public issues - recognizing and explaining multiple points of view.
- Standard H - The student analyzes the effectiveness of selected public policies and citizen behaviors in realizing the stated ideals of a democratic republican form of government.

Remembering Pearl Harbor: The USS Arizona Memorial

About This Lesson

This lesson is based on the National Register of Historic Places registration file "[USS Arizona Wreck](http://pdfhost.focus.nps.gov/docs/NHLS/Text/89001083.pdf)" [http://pdfhost.focus.nps.gov/docs/NHLS/Text/89001083.pdf] (with [photographs](https://npgallery.nps.gov/pdfhost/docs/NHLS/Photos/89001083.pdf), https://npgallery.nps.gov/pdfhost/docs/NHLS/Photos/89001083.pdf) and other materials from the park. It was written by John Vierra, Jr., park ranger, USS Arizona Memorial. TwHP is sponsored, in part, by the Cultural Resources Training Initiative and Parks as Classrooms programs of the National Park Service. This lesson is one in a series that brings the important stories of historic places into the classrooms across the country.

Objectives

1. To describe the destruction at Pearl Harbor, the sinking of the USS Arizona, and the consequent loss of life;
2. To explain the important role of the USS Arizona as part of the Pacific Fleet;
3. To explain the significance of the USS Arizona Memorial and other war memorials;
4. To determine the impact of World War II on their own community.

Materials for students

The materials listed below can either be used directly on the computer or can be printed out, photocopied, and distributed to students.

1. Three maps showing the Japanese deployment and targets;
2. Two readings about the attack on Pearl Harbor and the USS Arizona Memorial;
3. Two charts showing casualties of the attack; and
4. Five photos of the USS Arizona and the Memorial.

Visiting the site

The visitor center and the USS *Arizona* are located on the Pearl Harbor Navy Base and are operated and maintained by the National Park Service. The visitor center is located on the shoreline overlooking Pearl Harbor directly off State Highway 99 (Kamehameha Highway), about a 45-minute drive west of Waikiki. The visitor center is open daily from 7:00 a.m. to 5 p.m., except Thanksgiving, Christmas, and New Year's days. For further information, [visit the park web pages](#).

Getting Started

What is happening in this photo? Can you identify what significant event in U.S. history is taking place?

Teaching with Historic Places

National Park Service
U.S. Department of the Interior

Remembering Pearl Harbor: The USS Arizona Memorial

Photo Analysis Worksheet

Step 1:

Examine the photograph for 10 seconds. How would you describe the photograph?

Step 2:

Divide the photograph into quadrants and study each section individually. What details--such as people, objects, activities--do you notice?

Step 3:

What other information--such as time period, location, season, reason photo was taken--can you gather from the photo?

Step 4:

How would you revise your first description of the photo using the information noted in Steps 2 and 3?

Step 5:

What questions do you have about the photograph? How might you find answers to these questions?

Teaching with Historic Places

Remembering Pearl Harbor: The USS Arizona Memorial

Setting the Stage

The attack on Pearl Harbor thrust the United States into World War II. The attack had significant and far-reaching political effects on the United States, changing the minds of many who had been philosophically opposed to war or who had taken a passive stance towards the war in Europe. The increasing diplomatic confrontations and economic sanctions against Japan by the United States and others, compounded by Japan's undeclared war in China and the weakening of European control in Asian colonies, precipitated the war in the Pacific. The Japanese felt that the time was opportune to conquer British, American, French, Chinese, and Dutch territories in Southeast Asia. This belief pushed militaristic factions in Japan to provoke war with the United States. Fearing that the United States Pacific Fleet would pose a formidable obstacle to Japanese conquest of Southeast Asia, Admiral Isoruko Yamamoto, Commander-in-Chief of the Japanese Combined Fleet, visualized a bold attack on the Pacific Fleet while it lay at anchor at Pearl Harbor. Such a surprise strategical attack, bold and daring in its execution, would, he believed, secure the Pacific.

Determining the Facts

Reading 1: The Attack on Pearl Harbor

(Refer to Maps 1, 2, and 3 as you read the description of the attack.)

The attack on Pearl Harbor was the culmination of a decade of deteriorating relations between Japan and the United States over the status of China and the security of Southeast Asia. This breakdown began in 1931 when Japanese army extremists, in defiance of government policy, invaded and overran the northern-most Chinese province of Manchuria. Japan ignored American protests, and in the summer of 1937 launched a full-scale attack on the rest of China. Although alarmed by this action, neither the United States nor any other nation with interests in the Far East was willing to use military force to halt Japanese expansion.

Over the next three years, war broke out in Europe and Japan joined Nazi Germany and Fascist Italy in the Axis Alliance. The United States applied both diplomatic and economic pressures to try to resolve the Sino-Japanese conflict. The Japanese government viewed these measures, especially an embargo on oil, as threats to their national security. By the summer of 1941, both countries had taken positions from which they could not retreat without a serious loss of national prestige. Although both governments continued to negotiate their differences, Japan had already decided on war. The attack on Pearl Harbor was part of a grand strategy of conquest in the western Pacific. The objective was to immobilize the Pacific Fleet so that the United States could not interfere with invasion plans. The principal architect of the attack was Admiral Isoroku Yamamoto, Commander-in-Chief of the Japanese Combined Fleet. Though personally opposed to war with America, Yamamoto knew that Japan's only hope of success in such a war was to achieve quick and decisive victory. If there were a prolonged conflict, America's superior economic and industrial power would likely tip the scales in her favor.

On November 26, the Japanese attack fleet of 33 warships and auxiliary craft, including 6 aircraft carriers, sailed from northern Japan for the Hawaiian Islands. It followed a route that took it far to the north of the normal shipping lanes. By early morning, December 7, 1941, the ships had reached their launch position, 230 miles north of Oahu. At 6 a.m., the first wave of fighters, bombers, and torpedo planes took off. The night before, some 10 miles outside the entrance to Pearl Harbor, five midget submarines carrying two crewmen and two torpedoes each were launched from larger "mother" subs. Their mission: enter Pearl Harbor before the air strike, remain submerged until the attack got underway, then cause as much damage as possible.

Meanwhile at Pearl Harbor, the 130 vessels of the U.S. Pacific Fleet lay calm and serene. Seven of the fleet's nine battleships were tied up along "Battleship Row" on the southeast shore of Ford Island. Naval aircraft were lined up at Ford Island and Kaneohe Bay Naval Air Stations, and Marine aircraft at Ewa Marine Corps Air Station. At Hickam, Wheeler, and Bellows airfields, aircraft of the U.S. Army Air Corps were parked in groups as defense against possible saboteurs.

At 6:40 a.m., the crew of the destroyer USS *Ward* spotted the conning tower of one of the midget subs headed for the entrance to Pearl Harbor. The *Ward* sank the sub with depth charges and gunfire, then radioed the information to headquarters. Before 7 a.m. the radar station at Opana Point picked up a signal indicating a large flight of planes approaching from the north. These were thought to be either aircraft flying in from the carrier *Enterprise* or an anticipated flight of B-17s from the mainland, so no action was taken.

Teaching with Historic Places

National Park Service
U.S. Department of the Interior

Remembering Pearl Harbor: The USS Arizona Memorial

The first wave of Japanese aircraft arrived over their target areas shortly before 7:55 a.m. Their leader, Commander Mitsuo Fuchida, sent the coded messages "To, To, To" and "Tora, Tora, Tora," telling the fleet that the attack had begun and that surprise had been achieved.

At approximately 8:10, the USS *Arizona* exploded, hit by a 1,760-pound armor-piercing shell that slammed through her deck and ignited her forward ammunition magazine. In less than nine minutes, she sank with 1,177 of her crew. The USS *Oklahoma*, hit by several torpedoes, rolled over, trapping more than 400 men inside. The USS *California* and USS *West Virginia* sank at their moorings, while the USS *Utah*, converted to a training ship, capsized with more than 50 of her crew. The USS *Maryland*, USS *Pennsylvania*, and USS *Tennessee* all suffered significant damage. The USS *Nevada* attempted to run out to sea but took several hits and had to be run aground to avoid sinking and blocking the harbor entrance.

While the attack on Pearl Harbor intensified, other military installations on Oahu were hit. Hickam, Wheeler, and Bellows airfields, Ewa Marine Corps Air Station, Kaneohe Bay Naval Air Station, and Schofield Barracks suffered varying degrees of damage, with hundreds of planes destroyed on the ground and hundreds of men killed or wounded.

After about five minutes, American anti-aircraft fire began to register hits, although many of the shells that had been improperly fused fell on Honolulu, where residents assumed them to be Japanese bombs. After a lull, at 8:40 a.m. the second wave of attacking planes focused on continuing the destruction inside the harbor, destroying the USS *Shaw*, *Sotoyomo*, a dry dock, and heavily damaging the *Nevada*, forcing her aground. The Japanese also attacked Hickam and Kaneohe airfields, causing heavy loss of life and reducing American ability to retaliate.

Army Air Corps pilots managed to take off in a few fighters and may have shot down 12 enemy planes. At 10 a.m. the second wave of attacking planes withdrew to the north, and the assault was over. The Japanese lost 29 planes and five midget submarines, one of which was captured when it ran aground off Bellows Field.

The attack was a great, but not total, success. Although the U.S. Pacific Fleet was shattered, its aircraft carriers (not in port at the time of the attack) were still afloat and Pearl Harbor was surprisingly intact. The shipyards, fuel storage areas, and submarine base suffered no more than slight damage. More importantly, the American people, previously divided over the issue of U.S. involvement in World War II, rallied together with a total commitment to victory over Japan and her Axis partners.

Remembering Pearl Harbor: The USS Arizona Memorial

Questions for Reading 1

- 1) List the factors that led to the surprise strategical attack of Pearl Harbor. How did the Japanese justify such an attack?

- 2) What did the Japanese regard as the main purpose of the attack?

- 3) Why were the United States Pacific Fleet and other military installations caught off guard?

- 4) Why had diplomatic negotiations broken down?

- 5) Why was there no declaration of war before the attack?

- 6) How many battleships were in the area known as "Battleship Row"? What happened to each of them? What happened at other military installations?

- 7) What damage did the U.S. military inflict on the Japanese?

- 8) Why was the success of the attack on Pearl Harbor considered "great, but not total"?

Remembering Pearl Harbor: The USS Arizona Memorial

Determining the Facts

Reading 2: The USS Arizona Memorial

The USS *Arizona* is the final resting place for many of the ship's 1,177 crewmen who lost their lives on December 7, 1941. The 184-foot-long Memorial structure spanning the mid-portion of the sunken battleship consists of three sections: 1) the entry and assembly rooms, 2) a central area designed for ceremonies and general observation, and 3) the shrine room, where the names of those killed on the USS *Arizona* are engraved on the marble wall.

The primary concern of the U.S. Navy immediately after the attack had been to repair the damaged ships as quickly as possible. Early on, it became clear that the USS *Arizona* would never sail again. While other ships were restored, she lay under the water, a silent reminder of the "date which will live in infamy." When the navy began to consider raising the ship and recovering the dead, medical examiners advised that many of the men had been cremated by the blast and ensuing fire, and others would be unrecognizable after being submerged for a long time. The navy then decided to maintain the old custom of sailing men: those who die at sea are buried at sea. They would not, however, be forgotten.

The USS *Arizona* Memorial grew out of the desire to establish some sort of shrine at Pearl Harbor to honor those of the USS *Arizona* and all others who died in the attack. Suggestions for such a memorial began in 1943, but it was not until 1949, when the Territory of Hawaii established the Pacific War Memorial Commission, that the first concrete steps were taken to bring it about. Initial recognition came in 1950 when Admiral Arthur Radford, Commander in Chief, Pacific (CINCPAC), ordered that a flagstaff be erected over the sunken battleship. On the ninth anniversary of the attack, a commemorative plaque was placed at the base of the flagstaff.

President Dwight D. Eisenhower, who helped achieve Allied victory in Europe during World War II, approved the creation of the national Memorial in 1958. Its construction was completed in 1961 with private donations and public funds appropriated by Congress. The Memorial was dedicated in 1962.

According to its architect, Alfred Preis, the design of the Memorial, "wherein the structure sags in the center but stands strong and vigorous at the ends, expresses initial defeat and ultimate victory....The overall effect is one of serenity. Overtones of sadness have been omitted to permit the individual to contemplate his own personal responses...his innermost feelings."

Contrary to popular belief, the USS *Arizona* is no longer in commission. As a special tribute to the ship and her lost crew, the United States flag flies from the flagstaff, which is attached to the severed mainmast of the sunken battleship. The USS *Arizona* Memorial has come to commemorate all military personnel killed in the Pearl Harbor attack.

Remembering Pearl Harbor: The USS Arizona Memorial

Determining the Facts

Chart 1: December 7, 1941, Losses

<u>Personnel Killed</u>	United States	Japan
Navy	1998	64
Marine Corps	109	
Army	233	
Civilian	48	

<u>Personnel Wounded</u>	United States	Japan
Navy	710	Unknown
Marine Corps	69	
Army	364	
Civilian	35	

<u>Ships</u>	United States	Japan
Sunk or beached *	12	5
Damaged	9	

<u>Aircraft</u>	United States	Japan
Destroyed	164	29
Damaged	159	74

*All U.S. ships, except the USS *Arizona*, the USS *Utah*, and the USS *Oklahoma*, were salvaged and later saw action. *Figures are subject to change according to new evidence.*

Of the total number of men killed at Pearl Harbor, approximately 1,177 were sailors and marines serving on the USS *Arizona*. Approximately 333 men aboard the USS *Arizona* survived the attack.

Remembering Pearl Harbor: The USS Arizona Memorial

Putting It All Together

Most Americans who were alive in 1941 can remember exactly where they were when they first learned of the Japanese attack on Pearl Harbor. For many of those who served in the armed forces, and families of those who served, the Second World War was the central event of their lives--a source of both pain and pride. The following activities are designed to help students understand some of these feelings. They will also compare how opposite sides in a battle differ in their remembrances of that battle.

Activity 1: Pearl Harbor and the Casualties of War

The attack on Pearl Harbor propelled the nation into a war that lasted for almost four years. On the first day of that war, more than 2,400 Americans died; their average age was 23. Have students consider the impact such enormous losses would have on the American public. Then ask them to imagine they are reporters at the time of the attack on Pearl Harbor. Have each student write a short paper describing how they would have covered the news for their local daily papers. They should include information about the surprise attack, the sinking of the *Arizona*, and the statistics about the casualties. Have students work in pairs to correct rough drafts. Have three or four students read their completed features aloud and then hold a discussion on the attack and its results.

Remembering Pearl Harbor: The USS Arizona Memorial

Activity 2: Comparing Textbook Accounts

Using a typical U.S. history textbook, have students read the account of Pearl Harbor. Then have students read the following paragraph that has been translated from a Japanese history textbook of the late 1960s:

*In April 1941, Japan agreed to a Japan-USSR Neutrality Treaty in order to lessen the military threat to the north. This was followed by the occupation of the southern half of Indo-China by Japanese military forces. In consequence, the American attitude towards Japan hardened, and diplomatic relations between the two countries came to a dead end. The Tojo Cabinet conducted its business in extreme secrecy, and in the pre-dawn hours of December 8, 1941 [December 7, Honolulu time], Pearl Harbor in Hawaii was attacked and war was simultaneously declared against the United States and England. The Pacific War was thus begun. (Donald W. Robinson, Editor, *As Others See Us, International Views of American History*. Boston: Houghton Mifflin, 1969.)*

Ask students to cite differences between the two textbook accounts and discuss why they would differ to such a great degree. Have them develop an outline of the information they think should be included in both U.S. and Japanese textbooks. Compare the outlines and discuss differences in treatment.

Teaching with Historic Places

National Park Service
U.S. Department of the Interior

Remembering Pearl Harbor: The USS Arizona Memorial

Activity 3: Survivors of War

Have students meet in small groups to suggest a list of questions they would like to ask a veteran--of any war. List questions on the chalkboard as each group reports and then have the class refine the list and copy the final questions. Either have students use the list during interviews they set up for after school, or for one conducted in the classroom. (Veterans' organizations such as the American Legion, Veterans of Foreign Wars, etc., can usually provide speakers who are willing to go out to classrooms.) When interviews are complete, have students compare responses.

Remembering Pearl Harbor: The USS Arizona Memorial

Activity 4: Examining War Memorials

The USS Arizona Memorial records the names of the dead on a white marble wall. The Vietnam Memorial is a black marble wall that rises from the ground. Both commemorate the ultimate sacrifice that is often demanded of our nation's military personnel. Have students look for war memorials in their community. Is there a statue? Lists of the dead? A cannon mounted outside a public building? A special type of tombstone used in the local cemetery for those who served in the military? Are there any World War II memorials? What can students learn about their community's participation in World War II from these memorials (names of those who served, number of people who served, what branch of the military they represented and where they served, etc.)?

Some students may have visited Revolutionary or Civil War battlefields and may have pictures to bring to class. Other students may use library books to find examples of war memorials. Have them compare memorials from different wars by listing the materials they are made of, the size of the monument, the prominence of the memorial in its surroundings, and the dedicatory inscriptions found on the memorial. Then ask them to consider why some wars have been better remembered than others. Does the type of war fought make a difference? Have styles of memorials changed over time? Do all memorials seem fitting to the event? Do they feel the USS Arizona Memorial is appropriate for its purpose?
