INTRODUCTION

Congress designated the Trail of Tears National Historic Trail in December 1987 (Public Law 100-192). In accordance with the National Trails System Act, the National Park Service has prepared an official set of trail maps for the *Comprehensive Management and Use Plan,* which are included in this *Map Supplement.*

The base maps were U.S. Geological Survey planimetric maps, 1:100,000 (scale of about 1" to 1.5 miles). The water route and the three principal overland routes, as well as variations, were mapped. Each section of maps is preceded by a foldout index panel indicating the sequence of individual segment maps. Important sites are labeled, and the locations are marked with a dot (●). A black line (——) is used to designate the known land routes, and a dashed black line (- - -) denotes a land route where the exact alignment is unknown. A line of open dots (○○○○) marks the water route.

The National Park Service contracted with Duane H. King to map the trail and to identify significant sites along it. Research encompassed primary and secondary sources at a variety of archives, including the National Archives, the Library of Congress, Gilcrease Museum, plus state and university repositories. Several historic maps depicting early roads and trails contained useful information, as did original land survey maps.

Fieldwork to ground-truth the maps proved invaluable, and many local residents in the nine trail states volunteered to identify route segments and historic sites with which they were familiar. Several unknown portions of the trail were thus located during the fieldwork.

Almost all of the trail followed existing roads, many of which are still used as county, state, or federal roads. Some abandoned portions of old roads and historic sites are now in private ownership, and landowner permission must be obtained to see them.

An official set of trail maps will be kept in the administrative office of the Trail of Tears National Historic Trail at the NPS Southwest Regional Office in Santa Fe, New Mexico. As new information becomes available about trail routes, and as new sites are identified, revisions of the routes and sites will be documented in the regional office. Any changes to the congressionally designated national historic trail route will be published in the *Federal Register,* in conformance with the National Trails System Act, and necessary revisions will be made to the *Comprehensive Management and Use Plan.*

Supposed Places, Forts, Posts, Routes
and
Distances in the Cherokee Nation.
