NATIONAL GEOGRAPHIC MAPS

NATIONAL GEOGRAPHIC TRAILS ILLUSTRATED maps are revised regularly in cooperation with the National Park Service, US Forest Service, and others. Changes do occur between map revisions. Check with the local agency for information before your visit. We welcome your input if you discover conditions other than as shown on the map. Send an email to trailsillustrated@ngs.org or a copy by mail of the area in question noting your suggestion and it will be reviewed for the next revision.

NATIONAL GEOGRAPHIC maps are printed on synthetic paper. If the map gets wet and the pages freeze together, thaw the frozen map before opening. Keep your map away from petroleum products, such as solvents, stove fuel and sunscreens, which can potentially smear the map's ink.

No part of this map may be reproduced without the written permission of the publisher. NATIONAL GEOGRAPHIC MAPS and the NATIONAL GEOGRAPHIC SOCIETY are in no way responsible for personal injury, damage to property, or violation of the law in connection with the use of their maps.

Proceeds from the sale of this product help support our mission to increase global understanding through conservation, exploration, research, and education. VOYAGEURS NATIONAL PARK

Nearly 200 years ago voyageurs paddled birch bark canoes full of animal pelts and trade goods through this area on their way to Lake Athabasca, Canada. In summer, people explore the park by houseboat, motorboat, canoe, kayak, and in winter on snowmobile, snowshoe, and skis. Voyageurs is a water-based park where you must leave your car and take to the water to fully experience the lakes, islands, and shorelines of the park.

Voyageurs National Park is a mosaic of land and water, a place of interconnected waterways that flow west into the Rainy River, and eventually north as part of the arctic watershed of Hudson Bay. It's a place of transition, between upland and aquatic ecosystems; boreal and northern hardwoods forest types, and both wild and developed areas.

The foundation of the park's landscape was sculpted by a series of glaciers that have scoured and carved the area over hundreds of thousands of years. The most recent period of glaciation ended just over 10,000 years ago, exposing ancient Precambrian rocks that formed over two billion years ago. The forests that now drape the upland portions of the park exist on a thin layer of soil that has formed in the comparatively short period of time since the last glacier receded.

People entered this region following the retreat of the glaciers. Early Native Americans were the first to make use of the abundant resources the lakes and forests provided, followed by Europeans and other native groups drawn to the area during the fur trade period of the late 1700s and early 1800s. Mining, commercial fishing, logging and recreational use brought more people to the region in the years that followed, evidence of which may be found in the park today.

to convert feet to rods multiply by 0.0606

1 rod = 5.0292 meters or 16.5 feet

SAFETY INFORMATION

Boating Safety
Always wear your life jacket - Minnesota state law requires all watercraft (including canoes and kayaks) to have one wearable U.S. Coast Guard approved personal flotation device (PFD) on board and accessible for each person in the watercraft. The Coast Guard requires all children less than 10 years of age to wear a life preserver when in a recreational boat.

All passengers should stay seated within the boat while the boat is moving. **Riding on the bow or gunwale is prohibited!**

Know where you can re-fuel your boat.

Don't drink and drive. County Sheriff, U.S. Coast Guard staff and park rangers enforce laws prohibiting boat operations under the influence of drugs or alcohol.

Navigational charts are highly recommended.

Safe Boating Checklist
Plan on having a safe and enjoyable experience by making sure you have these items whenever boating in the park:

- A wearable life preserver readily accessible for each person
- Type IV throwable cushion or ring
- Navigational maps
- Navigation lights at night – use them!
- Whistle or horn
- Anchor, paddles or oars, and lines
- Spare propeller and shear pin
- Flashlight and first aid kit

Drinking Water
Always treat lake water before using it for drinking or cooking. Consider bringing water with you when camping in the park. Otherwise, use a high-quality water filter to remove potential contaminants.

Blue-Green Algae: The Minnesota Pollution Control Agency (MPCA) advises the public to approach lake areas with blue-green algae blooms with caution. During the right conditions these blooms can be toxic to pets and harmful to people. A blue-green algae bloom looks like pea soup and should be avoided. For detailed information visit the MPCA website (www.pca.state.mn.us/water/clmp-toxicalgae.html).

RECREATION

The North Woods
Voyageurs National Park contains 218,054 acres, with 134,265 acres of land and 83,789 acres of water. Voyageurs provides outstanding opportunities for year-round recreation. The late-summer months of August and September are often the best time of year to explore the park's hiking trails. The weather is often warm and pleasant, and the biting insects have mostly gone away.

The long northern winter provides ample time for outdoor enthusiasts to ski, snowshoe, snowmobile, and ice fish in the park. The Rainy Lake Visitor Center is open year round and offers a cross-country ski and snowshoe loan program for all ages during the winter months. Ranger programs are also offered during the fall, winter and spring months at the Rainy Lake Visitor Center.

Spring is a time of transition. As winter snow and ice melts, the lakes open up the way for boaters to begin exploring the interconnected waters of the park again.

Summer brings many water-loving people to the park for houseboating, fishing, kayaking and canoeing the interconnected waterways here. All three visitor centers are open daily and boat tours and ranger programs are offered throughout the summer.

Camping
Sleep under a sky full of stars at one of over 170 designated campsites at Voyageurs National Park. Be serenaded by loons and listen for a chance to hear wolves howling.

All campsites in the park are only accessible by water; you will need a boat to camp in the park. You may bring your own boat or rent one from an area resort.

Frontcountry camping in the park is limited to 14 consecutive nights at a specific site between May 15th and September 15th and a maximum of 30 nights in a calendar year. Backcountry camping within the park is limited to 7 consecutive nights at a specific site and a maximum of 30 nights in a calendar year.

You will need a reservation to camp in Voyageurs National Park. See the **Fees, Reservations, and Permits** section to find out more about how to obtain camping reservations.

Outside the park, there are drive up campgrounds, Woodenfrog and Ash River State Forest Campgrounds. Both campgrounds are first come-first serve and do not accept reservations. For more information call (218) 365-7229.

Winter Activities
Winter visitors enjoy the beauty of Voyageurs National Park by snowmobile, on cross-country skis, in an auto on the ice road, on snowshoes or in ice-fishing houses. Voyageurs invites visitors who want to get out of the cold to come to the Rainy Lake Visitor Center.

The visitor center offers:

- Voyageurs National Park information
- Convenient snowmobile parking
- Winter Ice and Trail Conditions Report
- Hot cocoa
- A children's corner
- Maps of ski, snowshoe, and snowmobile trails
- Winter programs
- Bookstore
- Exhibits and films
- Snowshoes and cross-country skis for free loan, adult and child sizes

Cross-Country Ski and Snowshoe Loan Program
Explore the winter landscape on one of the park's three snowshoe trails. For more information, see **Winter Trails** section.

Voyageurs National Park offers cross-country skis, poles, boots, and snowshoes for loan at the Rainy Lake Visitor Center free-of-charge during regular visitor center hours. Adult and child sized equipment is available. Call the Rainy Lake Visitor Center for availability (218) 286-5258.

Ice Roads
The Rainy Lake Ice Road begins at the boat launch ramp at Rainy Lake Visitor Center. Routes vary depending on conditions.

Kabetogama Lake Ice Road travels between the Kabetogama Lake Visitor Center boat launch ramp and the Ash River Visitor Center boat launch ramp. Routes vary depending on conditions.

- The ice roads are open to cars and trucks of less than 7,000 lbs. gross vehicle weight. SNOWMOBILES are NOT permitted on the ice road.
- The speed limit is 30 MPH
- When heavy snow, slush, or thin ice exists, the ice road may be closed or shortened for safety. Travel beyond the plowed section is unsafe.

Ice Fishing
Ghostly winter quiet, rugged piney shorelines, and outstanding angling make Voyageurs National Park an ice angler's dream. All ice blocks are to be immediately chopped up, submerged, or hauled to land. Placement of holes, equipment, or any type of structure must be greater than 50 feet off the edge of all ice roads and 50 feet off the centerline of all snowmobile trails. Written authorization from the park is required for individuals to plow greater than 300 feet on any lake surfaces within the park. Fishing license and icehouse registration is required.

Snowmobiling
Snowmobiling is allowed on frozen lake surfaces and designated safety portages in Voyageurs National Park. The park provides 110 miles of staked and groomed trails for snowmobiling.

All land areas, including rock faces, are closed to snowmobiles with the exception of designated safety portages. Hill climbing is prohibited.

Obey all closure signs. Areas are closed to protect your safety and to protect sensitive resources.

Be Safe!

- Carry a trail map with you
- Keep to the right on trails
- Leave a route plan with someone

Watch For:

- Pressure ridges–they can change the surface of the lake. Always stop and inspect ridge areas before crossing. Pressure ridges are marked with two crossed orange caution stakes on each side.
- Slush and open water–avoid them by staying on staked and groomed trails.

Trail Conditions
Read the latest Winter Ice and Trail Conditions Report on the park's website for the most updated ice and trail conditions: www.nps.gov/voya/planyourvisit/winter-ice-and-trail-conditions.htm. For additional trail condition information, please call:

- International Falls, (800) FALLS MN
- Kabetogama Lake, (800) 524-9085
- Ash River, (800) 950-2061
- Crane Lake, (877) 466-7669 (466-SNOW)

WINTER TRAILS

Cross-Country Ski Trails
Black Bay Trail - Located one mile north of the Rainy Lake Visitor Center on the Rainy Lake Ice Road and offers 6 miles of trail.

Tilson Creek Ski Trails - The Minnesota Department of Natural Resources manages this 10-mile network of interconnected ski trails. A Great Minnesota Ski Pass is required. Several routes are possible, ranging from short loops to longer excursions. You can access this system from the Rainy Lake Visitor Center area on the park's Tilson Connector Trail.

Echo Bay Trail - This 3.5 mile loop trail is located a few miles from the Kabetogama Lake Visitor Center (closed winter). Follow County Road 122 north toward the Woodenfrog State Forest campground to access the trailhead.

Kab-Ash Trail - This challenging backcountry trail system is 27.87 miles of ungroomed trail and is for the experienced skier. Bring a map and be prepared for winter travel in a remote area if exploring the Kab-Ash trail in winter.

Snowshoe Trails
Explore the winter landscape on one of the park's four snowshoe trails.

Black Bay Beaver Pond Trail - (1.2 miles round trip) Located one mile north of the Rainy Lake Visitor Center. In summer, access is via watercraft only. In winter, access is via the Rainy Lake Ice Road.

Blind Ash Bay Trail - (2.5 miles round trip) The trailhead is at the Kabetogama Lake Overlook parking lot along the road to the Ash River Visitor Center.

Sullivan Bay Trail - (1.5 miles round- trip). Follow signs to the Ash River Visitor Center. The trailhead is just past the Beaver Pond Overlook on the north side of Sullivan Bay.

Oberholtzer Trail - (2 miles round-trip) The trailhead is just outside the Rainy Lake Visitor Center.

FEES, RESERVATIONS, AND PERMITS

Entrance Fee
There is no entrance fee to Voyageurs National Park.

Camping Fees and Reservations
A reservation is required for all tent camping in Voyageurs National Park. Advanced reservations must be made at least 1 day prior to the day you want to occupy the site. Reservations can be made online at www.recreation.gov or by phone at (877) 444-6777. The National Call Center hours are 10 am to 12 am March through October and 10 am to 10 pm November through February.

For more information on the campsite reservation program, visit the park website at www.nps.gov/voya.

The universally accessible campsite is located at Voyageur Narrows on Namakan Lake. Call the Kabetogama Lake Visitor Center at (218) 875-2111 to reserve the universally accessible site from late May through late September.

Overnight Permits
All overnight use in Voyageurs National Park requires a permit. Tent camping permits may be obtained through the reservation system. Houseboat permits are available at park visitor centers or local area commercial houseboat companies. One permit per party per overnight stay is required.

Know Canadian and U.S. fishing and customs regulations before you cross the border. For Canadian customs call (807) 274-3655 and for United States customs call (218) 283-0769.

JEFFERSON NATIONAL PARKS ASSOCIATION

Jefferson National Parks Association
One Memorial Drive, Suite 1900
St. Louis, MO 63102
(314) 678-1500
www.jnpa.com

Jefferson National Parks Association (JNPA) is one of the non-profit partners to Voyageurs National Park. Since 1961 JNPA has operated visitor center stores and provided educational programs for the benefit of the public and our park partners. JNPA provides quality educational products and related services that enrich public understanding and appreciation of America's national parks, public lands and historic places.

VOYAGEURS NATIONAL PARK ASSOCIATION

This map was published with the assistance of Voyageurs National Park Association, a nonprofit organization that protects and promotes the natural, recreational, and historic resources of Voyageurs National Park. Citizen memberships support education and volunteer conservation programs, as well as grassroots advocacy for resource protection and land preservation. For information contact:

LEAVE NO TRACE OUTDOOR ETHICS©

- Plan ahead and prepare
- Travel and camp on durable surfaces
- Dispose of waste properly
- Leave what you find
- Minimize campfire impacts
- Respect wildlife
- Be considerate of other visitors

Leave No Trace
Center for Outdoor Ethics | LNT.org

Please learn, practice, and pass on **Leave No Trace** outdoor skills and ethics. Following these principles will help protect precious backcountry resources. For more information on Leave No Trace, call (800) 332-4100, or visit **www.LNT.org**.

WAYPOINTS

N48° 25.27' W109° 33.74'
or
14 3739E 5382 5509N

Selected waypoints are located on this map. Latitude/longitude and UTM coordinates are located along the map border. In addition to the border coordinates, a 1000 meter UTM grid, Zone 15 (shown in blue) is located throughout the map. When used with map datum NAD 27, these coordinates provide an approximate location fix.

HOUSEBOATING

In 2015, houseboats may stay overnight in the park, either at one of the 88 designated houseboat sites or at an undesignated site, as long as it is at least 200 yards from a developed campsite or houseboat site. To stay overnight on a houseboat in the park requires a permit. Permits are available free of charge at park visitor centers or the local area commercial houseboat companies. Houseboats may stay in the park a maximum of 30 days in a calendar year.

In 2016, houseboats will be required to have a permit through www.recreation.gov. Fees apply.

BEARS AND FOOD STORAGE

Approximately 150 black bears live in Voyageurs National Park. These bears symbolize the wilderness quality of northern Minnesota and can be a memorable wildlife observation. Unfortunately, each summer numerous human-bear incidents occur. While human injuries are rare, black bears can cause significant property damage.

Voyageurs National Park tries to provide an environment where bears can live with minimal human interference. Please do your part. Help prevent bear problems by following the procedures below. Report human-bear incidents to park personnel as soon as possible.

Preventing Problems
When camping:

- Food must be properly stored in a park bear-proof locker or hung fourteen feet from the ground and four feet from a tree. Bear-proof food lockers hold two standard coolers.
- Put in a bear-proof locker or hang anything that has an odor (toothpaste, bug repellent, soap, garbage, etc.).
- Store or hang items that a bear might think is food, such as water jugs.
- Cook food away from your tent. Food odors on a tent may attract a bear.
- Clothes worn while cooking foods with strong odors should be stored or hung away from the tent.
- Store or hang all garbage, including shore lunch grease, empty cans and jars, aluminum foil and plastic wrap.
- Pack out your garbage when you leave; don't bury it.
- Dispose of fish entrails in deep water.
- Keep a clean site. Pick up food scraps and wipe off picnic tables.
- Don't camp at a site with recent bear sign. Report garbage-strewn sites to a ranger.
- If a bear approaches your site, do not feed it. Frighten the bear by yelling, banging pans together or throwing rocks or sticks. Make sure the bear has an escape route. If the bear is persistent, pack up your food and trash and retreat slowly to a secure area.
- Report all human-bear incidents at a park visitor center.
