Whiskeytown is Bear Country!

Encounters with black bears at Whiskeytown are fairly frequent, especially at the campgrounds.

Black bears eat many natural foods, including grasses, berries, insects, fish, and carrion.

However, when bears find easily accessible human food at campgrounds and picnic sites, they may return again and again.

When Camping and Picnicking...

All food, pet food, beverage containers, cosmetics, toiletries, cooking utensils, dishes, and other items with food odor must be stored inside your bear-proof storage locker or in your vehicle unless they are in immediate use. Never store these items in your tent.

Keep a clean camp or picnic site. Dispose of all trash inside bear-proof garbage cans and make sure that the lid is latched. If you store food in your vehicle, store it out of sight and odor free. Bears can break into cars, so take care to store food properly.

Help Save a Bear's Life!

Bears that get human food sometimes become aggressive and dangerous and must be killed. You can prevent this by proper food storage.

Please help keep all wildlife healthy and wild by not feeding them or allowing them to get into your food or trash.

Report all bear incidents to the Visitor Center.

Citations

A law enforcement ranger may issue a citation for improper food storage or feeding wild animals.
