## ***COPYRIGHT AND RESTRICTIONS***

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

## ***HISTORY***

### **1870s**

- Yellowstone National Park is established by Congress in 1872. The park's establishment followed several expeditions to the area, including the 1870 Washburn-Doane-Langford Expedition and the 1871 Hayden Survey. Following the park's creation, Hayden led surveys in the park in 1872 and 1878. In the summer of 1877, the Chief Joseph Band of the Nez Perce was pursued by the United States Cavalry through Yellowstone.

### **1880s**

- Expeditions in the park continued, including one led by General Phillip Sheridan in 1882 and several surveys led by Arnold Hague of the USGS between 1883 and 1889.
- In 1883, the United States Army Corps of Engineers began to design and develop the road system in Yellowstone under the direction of Lieutenant D.C. Kingman.
- In 1886, the Secretary of the Interior gave administrative control of Yellowstone to the United States Army. By the end of the decade, cavalry troops had established Camp Sheridan, a collection of buildings at the western base of the terraces at Mammoth Hot Springs.
- Several early hotels and other concessioner facilities were built throughout the park, including several at Mammoth Hot Springs, the Geyser Hotel at the Upper Geyser Basin, Marshall's Hotel on the Firehole River, and the first Canyon Hotel near the brink of the Lower Falls.

### **1890s**

- Construction on the buildings at Fort Yellowstone began in an area at Mammoth Hot Springs slightly to the north of the buildings at Camp Sheridan.
- Major Hiram Martin Chittenden began working with the United States Army Corps of Engineers in Yellowstone. Chittenden would eventually become one of the most important figures in Yellowstone's history. In the 1890s, under him, work on the Grand Loop, known then as Project Beltline, continued.
- Construction on Lake Hotel was originally completed in 1891. The Hotel's 125th anniversary in 2016 was commemorated with a grand celebration. The Fountain Hotel was also built in the 1890s.

### **1900s**

- Major Chittenden continued surveying and developing the roads system in Yellowstone.
- Old Faithful Inn and significant additions to Lake Hotel were constructed in the first half of the decade.
- At Mammoth, work on a hydroelectric power plant began. Additional buildings were constructed at Fort Yellowstone.

### **1910s**

- Work on the Canyon Hotel, the largest building ever constructed in Yellowstone, began at the beginning of the decade, as did additions and alterations to the hotels at Mammoth and Old Faithful.
- In 1916, the National Park Service was created, thus ending the era when the Army had administrative control of Yellowstone.

**1920s**

- Yellowstone's boundaries were a major topic. The northern boundary of the park was eventually extended. Instead of extending the southern boundary of Yellowstone, Grand Teton National Park was eventually created.
- The Bureau of Public Roads began a massive project in Yellowstone, which included paving the roads in Yellowstone.
- Hotels in the park were expanded. The Yellowstone Park Transportation Company began construction on buildings at Gardiner, Montana.

**1930s**

- The Yellowstone Park Company was established when Harry Child consolidated his concessioner businesses.
- Civilian Conservation Corps (CCC) crews worked on projects throughout the park.
- The current Mammoth Hotel was constructed.
- Park administrators began developing Master Plans.

**1940s**

- World War II impacted all facets of American life, including at Yellowstone, but progress still continued in the park.

**1950s**

- In anticipation of the 50<sup>th</sup> anniversary of the National Park Service in 1966, the ten-year Mission 66 program began in 1956. Mission 66 was an agency wide program that included additions and improvements to the infrastructure and facilities in the national parks. At Yellowstone, significant development occurred at Bridge Bay, Canyon Village, and Grant Village.

**1960s**

- The Yellowstone Park Company was sold, but did not change its name or lose control of its holdings in the park.
- Mission 66 projects continued.

**1970s**

- Building No. 1 at Fort Yellowstone, which had been home to park offices and a museum since the early 1920s, was updated and renovated to include a visitor center (VC). The new VC was named after Horace Albright.
- The Yellowstone Park Company lost its concessions contract. Management of the historic hotels in the park passed to Trans World Airlines Services, Inc. (TWA).

**1980s**

- The historic fires of 1988 burned through the Greater Yellowstone Ecosystem.

**1990s**

- The concessioner contract passed from Trans World to AMFAC.

**2000s**

- AMFAC changes its name to Xanterra.
- Work on Yellowstone's infrastructure continues annually.

---

## ***SCOPE AND CONTENT***

### MAPS AND DRAWINGS COLLECTION 1883-2010 (bulk dates: 1916-2001)

*CATALOG NUMBER*      YELL 145676

*VOLUME*                8,000 EA

*DESCRIPTION*            This collection contains over 8,000 individual maps, drawings, and plans which illustrate the rich history of exploration, development, and scientific research in Yellowstone National Park. The maps and drawings document the construction projects, development plans, and the research and protection of the park's natural and cultural resources that have shaped the history of Yellowstone since its establishment in 1872.

Most of the earliest maps and drawings originated in the period between 1886 and 1916 when the US Army had administrative control of the park. While a few maps in the collection predate the arrival of the US Army, they are mostly reproductions of maps that are housed in other repositories.

There are several hundred maps and drawings in the collection that have come from the resource management offices and fire management offices in the park.

The majority of the collection is related to the design, construction, and management of the park's infrastructure since 1916. This includes the blueprints and construction drawings for many of the concessioner facilities in the park. It also includes the maps and drawings for the buildings, roads, and utilities systems built by the National Park Service and other agencies within the federal government.

While this collection houses most of the maps and drawings in the Yellowstone Archives, some have not been separated from, and therefore are still in, their original record groups.

*ORGANIZATION*

The Maps and Drawings Collection is organized into six series:

- I. Army Era
- II. Master & Area Plans
- III. Resource Management
- IV. Interpretation & Education
- IV. Facilities & Maintenance
- V. Fire Management

Most of these series are further organized into subseries.

*PROVENANCE*

Transferred by various park offices and divisions, often as part of a larger group of records. Because the collection was separated over time, the original location for each map and drawing within the record groups is often hard to trace. Despite this, efforts were made during processing to properly note the original locations of the maps and drawings in the records.

Most of the maps and drawings in this collection are accessioned by the National Archives and Records Administration (NARA) and placed on deposit at its affiliated repository, the Yellowstone National Park Archives. These records correspond to the NARA Record Group 79, Records of the National Park Service.

*RESTRICTIONS*

YES

*ASSOCIATED MATERIALS*

Yellowstone Combined Archives: Record Group 00, Army Era Records; Record Group 01, Resource Management Records; Record Group 03, Fire Management Records; Record Group 04, Facilities & Maintenance Records; Record Group 06, Interpretation & Education Records

A large number of maps and drawings from this collection have been digitized by the NPS Technical Information Center (TIC). TIC's digital database, eTIC, is available online at <http://etic.nps.gov/>. At this time, it can only be accessed from NPS networked computers.

Maps and drawings related to Yellowstone can also be found in records and manuscripts collections not held at Yellowstone, examples being Record Group 57, Records of the United States Geological Survey, National Archives and Records Administration.

## ***HIERARCHY***

### **SERIES I: ARMY ERA, 1883-1918**

- SUBSERIES 01.01: LAND SURVEY & BOUNDARY MAPS, 1883-1918
- SUBSERIES 01.02: ROADS, 1892-1905, 1916
- SUBSERIES 01.03: BUILDINGS, SERVICES, & UTILITIES, circa 1891-1915
- SUBSERIES 01.04: CONCESSIONERS & PARTNERS, 1885-1915

### **SERIES II: MASTER & AREA PLANS, 1930-1995, and undated**

### **SERIES III: RESOURCE MANAGEMENT, circa 1916-2010, and undated**

- SUBSERIES 03.01: GEOLOGY, circa 1917-2010, and undated
- SUBSERIES 03.02: WILDLIFE, 1918-2003, and undated
- SUBSERIES 03.03: VEGETATION, circa 1924-2000, and undated
- SUBSERIES 03.04: WEATHER, 1970-1991
- SUBSERIES 03.05: ARCHEOLOGY, 1967-1996, and undated
- SUBSERIES 03.06: HISTORY, circa 1930-2000, and undated
- SUBSERIES 03.07: LAND USE, circa 1916-1994, and undated

### **SERIES IV: INTERPRETATION & EDUCATION, 1961-1994, 2005, and undated**

### **SERIES V: FACILITIES & MAINTENANCE, 1916-2006, and undated**

- SUBSERIES 05.01: BUILDINGS, 1918-2004
- SUBSERIES 05.02: STRUCTURES, 1930-2002
- SUBSERIES 05.03: ROADS & TRAILS, 1916-2000
- SUBSERIES 05.04: GROUNDS & SHORELINES, 1936-1972, and undated
- SUBSERIES 05.05: SERVICES & UTILITIES, circa 1919-circa 2000

- SUBSERIES 05.06: PARKWIDE, 1938-2006

**SERIES VI: FIRE MANAGEMENT, circa 1930-2003, and undated**

- SUBSERIES 06.01: SUPPRESSION & PREVENTION, HISTORY, OCCURRENCES, & PROGRESSIONS (NON-1988), circa 1930-2003, and undated
- SUBSERIES 06.02: 1988 FIRES, 1988, and undated

## ***SERIES DESCRIPTIONS***

### *I. SERIES I: ARMY ERA, 1883-1918, and undated*

This series contains maps and drawings from the era when the U.S. Army managed Yellowstone National Park. Highlights of this series include maps related to the discussions between Army officials and the U.S. Department of the Interior regarding the boundary of Fort Yellowstone, land and road survey maps generated under Major Hiram M. Chittenden, and blueprints for early concession properties in the park. There are reproductions of some maps and drawings that originated during this era in the History subseries of Series III: Resource Management.

#### *1. SUBSERIES 01.01: LAND SURVEY & BOUNDARY MAPS, 1883-1918*

This subseries contains maps of Yellowstone National Park, maps of Fort Yellowstone and Mammoth Hot Springs, and maps of the park's north entrance at Gardiner, Montana. There are also maps of the park's north, south, and east boundaries and maps of the townships which abutted the park's boundaries in that period. Many of the maps of Fort Yellowstone and the vicinity were surveyed and drawn under the direction of Major H.M. Chittenden. As official maps of Fort Yellowstone, these maps were used for a variety of reasons by park officials. This subseries is arranged chronologically.

#### *2. SUBSERIES 01.02: ROADS, 1892-1905, 1916, and undated*

All of the maps and drawings in this subseries relate to the survey and construction of the park's road system. Now known colloquially as the "Grand Loop," the early name for the road that circles Yellowstone was the "Beltline" and its construction was referred to as "Project Beltline." In addition to maps for Project Beltline, this subseries also contains maps produced through the road survey projects led by Major H.M. Chittenden. The 1905 road survey project was a collaborative effort between the U.S. Army Corps of Engineers and the Civil Engineering Department of Ohio State University. Over four weeks, under the guidance of Chittenden, three survey parties consisting of students and professors mapped 42 miles of roads in the park. Once work was completed, the members of each survey party were treated to a one week stage coach tour of the park. Although the maps in this subseries range in date from 1892 to 1916, most are from the period between 1892 and 1905. This subseries is arranged chronologically.

#### *3. SUBSERIES 01.03: BUILDINGS, SERVICES, & UTILITIES, circa 1891-1915*

The maps and drawings in this subseries are mostly related to construction and utility projects at Fort Yellowstone. In addition to architectural blueprints for officer housing, there are also maps of the Fort's water and sewage systems. Additionally, there are engineering drawings of components of the Fort's water system and plans related to the Fort's hydroelectric power plant. There are also information maps indicating services and utilities throughout the park. For drawings and blueprints of the hotels and other concessioner properties built in the park before 1916, see the Army Era: Concessioners

& Partners subseries. There are also maps and drawings that originated during this era in the History subseries of Series III: Resource Management. This subseries is arranged chronologically.

#### *4. SUBSERIES 01.04: CONCESSIONERS & PARTNERS, 1885-1915*

The maps and drawings in this subseries all originated in the offices of the early park concessioners and partners. Outline plans and layouts for many of the early hotels are in this subseries. There are also original blueprints and building plans drawn by Robert C. Reamer for the hotels at Canyon, Lake, and Mammoth, as well as other concessioner buildings that were built in the Army Era. Other maps and drawings in this subseries were produced by the railroad companies or drawn for the camping companies by a contracted engineer. The maps and drawings are included in this subseries because they were likely submitted to the park offices for approval or as part of their contract arrangements with the park. This subseries is arranged chronologically.

### *II. SERIES II: MASTER & AREA PLANS, 1930-1995, and undated*

This series contains Yellowstone National Park Master Plans, preliminary and draft maps and drawings that are classified as interim master plans, and planning maps and drawings for specific areas of the park. The Master Plans were issued two to three times a decade beginning in 1932 and ending in 1965. They were an integral part of building the infrastructure of the park and ensuring that each area of the park was accessible and visitor-oriented. Each Master Plan typically includes park wide administrative maps, road maps, and trail maps. They also include maps specific to the main visitor areas in the park. The maps and drawings correspond to written plans. In the years when formal Master Plans were not issued, the park planning offices were still drafting planning maps and drawings. Those drafts are included in this subseries as interim master plans. Beyond the Master Plans and interim plans, there are also area plans in this subseries. Some of these area plans were created during the decades when Master Plans were issued but were not part of the Master Plan process. Others were issued after Master Plans were discontinued. Some of these area plans have corresponding narratives, as well. The Master Plans are from the period between 1932 and 1965. The interim master plans are from the 1950s and 1960s. The area plans were created between 1930 and 1995. In this subseries, the Master Plans and interim master plans are arranged chronologically and followed by the area plans, which are also arranged chronologically.

### *III. SERIES III: RESOURCE MANAGEMENT, circa 1916-2010, and undated*

This series contains maps and drawings which have originated from or are directly related to the study and management of Yellowstone's natural, cultural, and historic resources. This series is divided into seven subseries based on the general organization and divisions within the Yellowstone Center for Resources, the branch founded in 1993 to unite all of the park's science and resource management offices. The organization and contents of this series and the subseries within are also derived from the organization of the Resource Management

Record Group Collection (RG-01) within the Yellowstone Archives. The seven subseries are Geology, Wildlife, Vegetation, Weather, Archeology, History, and Land Use.

1. *SUBSERIES 03.01: GEOLOGY, circa 1917-2010, and undated*

The maps and drawings in the Geology subseries all relate to the study and mapping of Yellowstone's physical landforms and thermal features. Many of the maps identify the various surficial landforms that make up Yellowstone's landscape. Others originated from studies of the depth and composition of the lakebeds of Yellowstone Lake and other lakes throughout the park. There are also several maps of the park's many thermal features, hotspots, and basins. Within this subseries, the maps are arranged chronologically.

2. *SUBSERIES 03.02: WILDLIFE, 1918-2003, and undated*

In this subseries, the maps and drawings are related to the study and management of Yellowstone's wildlife. The maps and drawings are organized and grouped in a manner derived from the organization of the wildlife records in RG-01 and the divisions of research at the Yellowstone Center for Resources. There are general wildlife management maps and drawings. There are also subcategories for bear management maps and drawings and for those related to the study of birds. The bison management maps and drawings have been listed separately from the maps and drawings related to elk and other ungulates. Maps and drawings related to fish and those related to predators other than bears are also listed in separate subcategories. Within each of these subcategories – Wildlife Management (Mgmt), Bear Management (Mgmt), Birds, Bison Management (Mgmt), Elk and Other Ungulates, Fish, and Other Predators – the maps and drawings are arranged chronologically.

3. *SUBSERIES 03.03: VEGETATION, circa 1924-2000, and undated*

This subseries covers a diverse array of topics related to the many fields of study within the Vegetation program at Yellowstone. A few maps and drawings relate to forestry management, while several others were created during the study and management of the various diseases and insects that plague the park's vegetation, including Blister Rust and the mountain pine beetle. There are also maps that document park wetlands and vegetation zones and types. The organization of this subseries is based on the organization of the Vegetation record group (RG-01 Veg). Therefore, the maps and drawings related to forestry management are listed first and then alphabetically. They are followed by the maps and drawings related to the study and control of diseases and insects, which are also arranged alphabetically. The maps and drawings related to the park's rare plants, wetlands, vegetation types, and general vegetation management follow the disease and insect maps and drawings and are also arranged alphabetically.

4. *SUBSERIES 03.04: WEATHER, 1970-2002*

This subseries has maps related to precipitation in the park in the last decades of the twentieth century. Most of the maps were created by the Soil Conservation Survey in

Bozeman using compiled precipitation data gathered in the park. One of the maps illustrates storm systems based on data gathered from the lookout on Mount Sheridan. The maps in this subseries are arranged chronologically.

*5. SUBSERIES 03.05: ARCHEOLOGY, 1967-1996, and undated [RESTRICTED]*

The maps and drawings in this subseries document archeological sites located in or near Yellowstone National Park. Many of the maps were produced by the National Park Service's Midwest Archeological Center. The others were likely produced in the offices of the park archeologist. This subseries is arranged chronologically. The maps and drawings in this subseries are subject to access restrictions due to the following federal laws: National Historic Preservation Act (NHPA) and Archeological Resources Protection Act (ARPA). Access must be approved by the Archivist.

*6. SUBSERIES 03.06: HISTORY, circa 1930-2000, and undated*

This subseries contains reproductions of maps and drawings related to the early exploration of the Yellowstone area, as well as maps and drawings which were created in the process of researching and documenting the history of the park. Many of the maps and drawings in this subseries are records of other government agencies or located in other private collections. There are copies of several maps that were drawn after the Washburn-Langford-Doane expedition and the Hayden expeditions of the 1870s. Annotated historical research maps indicating the routes of these expeditions and others are also in this subseries. Additionally, there are copies of maps that were drawn based on the surveys of Arnold Hague. There are also copies of architectural drawings of some of the buildings that were erected at Mammoth Hot Springs by the U.S. Army. There are maps of the Nez Perce Campaign of 1877 and copies of historical maps of Fort Yellowstone featuring research notes on the history of the Fort and its buildings. Many of these maps likely originated in the office of the prominent park historian, Aubrey Haines. Of the newer drawings, there are several featuring the historic roads and bridges in the park created as part of the documentation for the Historic American Engineering Record. The arrangement of this subseries is based chronologically on the dates of creation of the original maps. If the map is a reproduction, the date of the copy is noted.

*7. SUBSERIES 03.07: LAND USE, circa 1916-1994, and undated*

The maps and drawings in this sub-series are related to the survey and management of land within the boundaries of Yellowstone National Park and the lands along the park's borders. Many of the maps, drawings, and surveys in this subseries relate to the revisions and additions to the park's northern boundary in the 1920s and 1930s. Several document the ownership status of the lands abutting the northern boundary. There are also maps, drawings, and surveys of proposed and approved additions to the park's south and east boundaries, as well topographic maps and surveys of specific areas in the park, including Bridge Bay, the East Entrance, and West Thumb. The maps and drawings in this subseries are arranged chronologically.

*IV. SERIES IV: INTERPRETATION & EDUCATION, 1961-1994, 2005, and undated*

This series contains maps and drawings of roadside interpretive exhibits, signs, and devices, as well as museum and visitor center exhibits plans and designs. The maps and drawings in this subseries are arranged chronologically.

*V. SERIES V: FACILITIES & MAINTENANCE, 1916-2006, and undated*

This series contains maps, drawings, blueprints, and other plans for the buildings, structures, roads and trails, grounds and shorelines, and services and utilities that have been designed, developed, constructed, and renovated since the National Park Service was founded in 1916. In this collection, maps and drawings for buildings, roads and trails, and other facilities that were developed and constructed before the National Park Service took charge of Yellowstone can be found in Series I: Army Era. Maps and drawings related to facilities in the park can also be found in the History subseries of Series III: Resource Management.

There are six subseries in the Facilities & Maintenance series. These are Buildings, Structures, Roads & Trails, Grounds & Shorelines, Services & Utilities, and Parkwide. The organization of the Facilities & Maintenance series is based on the organization of the Facilities & Maintenance record group (RG-04) in the Yellowstone Archives.

*1. SUBSERIES 05.01: BUILDINGS, 1918-2004*

This subseries contains drawings, blueprints, renderings, and maps of buildings in Yellowstone. The buildings drawn up and laid out in the blueprints and drawings in this subseries were designed and built by the National Park Service and by the concessioners that have operated in Yellowstone since the NPS was founded. The National Park Service has designed and constructed a wide variety of buildings within the park over the decades, including barns & stables, campground facilities, clinics & hospitals, comfort stations & wash houses, employee housing & facilities, entrance & ranger stations, fire lookouts, utility buildings, and visitor centers. The NPS has also been involved with the design and construction of buildings for the concessioners in the park. Most of the concession buildings in the park were constructed by the Yellowstone Park Company (YPC), which was formed in 1936, when several businesses owned by the family of Harry W. Child were consolidated. The businesses included in the consolidation were the Yellowstone Park Boat Company, Yellowstone Park Hotel Company, Yellowstone Park Lodge & Camps Company, and Yellowstone Park Transportation Company. These companies were responsible for the construction, additions, and renovations to the hotels, lodges, and other guest facilities at locations throughout the park. Many of the blueprints and design plans for concession buildings in this subseries were done by Robert C. Reamer. The YPC also worked extensively with the architect Fred W. Willson in the 1920s, 1930s, and 1940s, and his designs and blueprints can be found throughout this subseries.

This subseries is organized alphabetically by park location, then chronologically. This subseries contains maps and drawings of buildings at all of the major tourist stops and

government areas along the Grand Loop. There are also maps and drawings for buildings at Bechler, Divide Creek, the East Entrance, Gallatin Canyon, Gallatin Gateway, Gardiner, Montana [North Entrance], Lamar, Mount Sheridan, Mount Washburn, the Northeast Entrance, Peale Island, Shoshone Lake, the South [Snake River] Entrance, Stephens Creek, the West Entrance, and West Yellowstone. At the end of the subseries, there are several maps and drawings that feature buildings at two or more locations throughout the park and buildings designed to be built in Yellowstone, but in no specific location within the park.

#### *2. SUBSERIES 05.02: STRUCTURES, 1930-2002*

This subseries contains drawings and design plans for structures such as amphitheaters, boat docks, fencing and screens, and park entrances and signs. This subseries is arranged chronologically.

#### *3. SUBSERIES 05.03: ROADS & TRAILS, 1916-2000*

The maps and drawings in this subseries relate to the development, layout, construction, and maintenance of the road system and the trails system in Yellowstone. Many of the drawings and blueprints are from a series of major projects undertaken in the park by the federal government in the 1920s, 1930s, and 1940s. For these projects, the road system in the park was referred to as the Yellowstone National Park Highway System (YNPHS). In this subseries, all of the drawings from these projects and others sponsored by the federal government over the decades have YNPHS in the title. In this subseries, there are also designs, drawings, and maps for other construction projects related to the roads and bridges in Yellowstone. There are also several maps and drawings of the trails within the park. These include maps, layouts, and construction drawings for the trails around individual areas within the park and maps that show the trail system of the entire park. This subseries is arranged chronologically.

#### *4. SUBSERIES 05.04: GROUNDS & SHORELINES, 1936-1972, and undated*

In this subseries, the maps and drawings relate to the development and construction of campgrounds in Yellowstone. There are also maps and drawings of landscaping work on the grounds at Canyon Village and the grounds at the Game Ranch at Stephens Creek. This subseries is arranged chronologically.

#### *5. SUBSERIES 05.05: SERVICES & UTILITIES, circa 1919-circa 2000*

The maps and drawings in this subseries relate to the design, development, and layout of the communications systems, electrical systems, water and sewer systems, and other utilities systems in Yellowstone. Some of the maps and drawings are related to the construction of a specific utility line or system, while many others are layouts of the utilities systems at individual areas in the park. All of the maps and drawings in this subseries feature a utility line or system that extends either above ground or below ground beyond an individual building. Because many building projects include plans for

pipng, water systems, and other utility systems, there are also drawings for these systems in the Buildings subseries of Series V: Facilities & Maintenance in this collection.

6. *SUBSERIES 05.06: PARKWIDE, 1938-2006*

This subseries contains maps and drawings that are related to the general maintenance and improvement of the developed areas in Yellowstone. The majority of the maps in this subseries are maintenance assignments that are part of the contracts each concessioner agrees to before they can operate in the park. This subseries is arranged chronologically.

VI. *SERIES VI: FIRE MANAGEMENT, circa 1930-2003, and undated*

The maps and overlays in this series are organized into two subseries, an organization which reflects the organization of the records in Record Group 03: Fire Management. The first subseries in this series is Suppression & Prevention, History, Occurrences, & Progressions (non-1988). The second subseries is 1988 Fires.

1. *SUBSERIES 06.01: SUPPRESSION & PREVENTION, HISTORY, OCCURRENCES, & PROGRESSIONS (NON-1988), circa 1930-2003, and undated*

This subseries contains maps and overlays related to wildfire management in the park. Many are related to suppression and prevention of wildfires in Yellowstone. These include maps that illustrate the “seen areas” from fire lookouts throughout the park, as well as maps that illustrate fuel types throughout the park and the rates at which certain areas were predicted to burn. Many of the maps in this subseries chronicle the history and occurrences of fires in the park in the decades since Yellowstone was established. Others illustrate the progressions of certain fires as they burned in the park, including many of the fires that burned in 1981. None of the maps and overlays in this subseries are directly related to the 1988 Fires. All maps, drawings, and overlays related to the 1988 Fires have been processed into a separate subseries within the Fire Management Series. Architectural drawings of the various fire lookouts can be found in the Buildings subseries in Series V: Facilities & Maintenance in this collection. This subseries has been arranged alphabetically.

2. *SUBSERIES 06.02: 1988 FIRES, 1988, and undated*

This subseries contains maps and overlays related to the series of fires and fire complexes that burned through the park in the summer and fall of 1988. In that year, over a dozen significant fires affected almost 800,000 acres of the park, while also burning through several thousands of acres in the surrounding national forests. Most of the maps in this subseries are daily progressions of these fires that were charted by infrared flyovers that often occurred twice daily during peak burn times. These progressions are organized in this subseries based on the names and groupings the park assigned these fires in 1988. Most of the fires eventually burned together and were

managed as complexes. The four major fire complexes were the Clover Mist complex, the Hellroaring-Storm Creek complex, the North Fork complex, and the Snake River complex. In addition to the progression maps in this subseries, there are also maps and overlays indicating incident command posts, helibases, and other information related to the management of the efforts to suppress the fires. There are also maps that were produced in the aftermath of the 1988 fire season. These maps relate to rehabilitation efforts, as well as research efforts to determine the ecological impacts of the fires. This subseries is arranged alphabetically, since most of the maps originated in 1988.

001	Diagram of the Retracement of the North Boundary Yellowstone National Park through Frac. B8E and the Frac S. Bdy of T7N R7E of the Principal Meridian, Montana, Jan. 31, 1891
002	Reference Map of Fort Yellowstone, Wyo. that belonged to James Hade, Troop D, 6th Cavalry, 1894
003	Map of Grounds in the Vicinity of Mammoth Hot Springs in the Yellowstone National Park prepared under the direction of Captain H.M. Chittenden Corps of Engineers. U.S.A., Surveyed by Weston Small, Junior Engineer, Drawn by Paul Burgoldt, Draftsman, 1903 (oversized)
004	Map of Northern Entrance Yellowstone National Park at Gardiner, MT, February 1903
005	Map of the grounds in the vicinity of the Northern Entrance to the Yellowstone National Park surveyed & drawn under the direction of Maj. H.M. Chittenden Corps of Engineers U.S.A. by Lieutenant C.A. Seoane, 3rd Cavalry U.S.A., 1904 (rolled)
006	1905-1909 Fort Yellowstone Boundary Rearrangement: Maps prepared under Major H.M. Chittenden, 1905-1907 (oversized)
007	1905-1909 Fort Yellowstone Boundary Rearrangement: Maps prepared under 1st-Lieut. E.D. Peek, 1908-1909 (1/2) (oversized)
008	1905-1909 Fort Yellowstone Boundary Rearrangement: Maps prepared under 1st-Lieut. E.D. Peek, 1908-1909 (2/2)
009	1905-1909 Fort Yellowstone Boundary Rearrangement: Maps prepared under Captain Wildurr Willing, 1909
010	Fort Yellowstone, Wyo. Plat of Cemetery with Attached Index, Office of the Quartermaster, November 11, 1909
011	Fort Yellowstone, Wyo., Last Corrected January 7, 1910
012	Portions of the South & East Boundaries of the Yellowstone National Park, Surveyed by Sidney E. & Albert B. Bartlett, Drawn June 9, 1910
013	Map of Fort Yellowstone, Wyo. Compiled from the best sources by Lieutenant A.R. Jones, 3rd Cav'y, Post Engineer Officer, 1905, Received December 1911
014	Administrative & Topographic Maps of Yellowstone National Park, 1912
015	Park Northern Boundary Township Surveys [includes town of Gardiner], 1883-1916
016	Map of the grounds in the vicinity of Mammoth Hot Spring in the Yellowstone National Park, Compiled from map prepared under the direction of Capt. H.M. Chittenden Corps of Engineers U.S.A. with Additions & Corrections to date U.S. Engineer Office, Yellowstone Park, Wyo. Dec. 18, 1912 with changes from June 20, 1918 (oversized)
