Place to stay

Hotels and campgrounds fill up quickly, both inside and around the park. Make sure you have secured lodging before you make other plans. If you do not, you may have to drive several hours away from the park to the nearest available hotel or campsite.

Travel time

Plan plenty of time to get to your destination. Yellowstone is worth pulling over for! Plan a minimum of 40 minutes to travel between junctions or visitor service areas on the Grand Loop Road. The speed limit in Yellowstone is 45 mph (73 kph) except where posted slower.

Essentials

Top 5 sites to see:
1. Old Faithful Geyser
2. The Grand Canyon of the Yellowstone River
3. Yellowstone Lake
4. Mammoth Hot Springs Terraces
5. Hayden or Lamar valleys

Accessibility

A printed guide is available at all visitor centers and on the park website. To arrange for an ASL interpreter for NPS ranger-led programs, call 307-344-2251 at least three weeks in advance.

Qualified service animals are welcome throughout the park and in all park facilities. However, they must be leashed and under your control at all times.

Open

Medical services

Yellowstone provides emergency response and ambulance service through the 911 system. Medcor provides medical care in the park, from emergencies to minor needs, at

- Mammoth Clinic (307-344-7965) year-round
- Lake Clinic (307-242-7241), summer
- Old Faithful Clinic (307-545-7325) summer

Air evacuation and trauma care is provided by the Eastern Idaho Regional Medical Center and other area hospitals.

Welcome to Yellowstone National Park

Yellowstone is a special place, and very different from your home. Like any grand adventure, your Yellowstone journey will take you to impressive new locations and introduce you to new experiences. There are different risks here than you may have faced before. You are responsible for your own safety.

We need your help to preserve the wildlife, natural features, and cultural treasures that bring so many visitors to Yellowstone. The park rules protect you and also protect the park. Follow the park rules for a safe and enjoyable visit. Please be a positive part of the Yellowstone experience. More guidance is described inside and online at [www.nps.gov/yell/planyourvisit/rules.htm](http://www.nps.gov/yell/planyourvisit/rules.htm).

Yellowstone National Park is assisted in fulfilling our mission by our official non-profit partner, Yellowstone Forever. Proceeds from Yellowstone Forever educational bookstores, Institute, and philanthropic efforts support priority park projects and visitor education. Find more information at [Yellowstone.org](http://Yellowstone.org) or call (406) 848-2400.

Lodging, campground, and tour reservations

As one of Yellowstone’s official concession companies, Yellowstone National Park Lodges offers lodging, camping, dining, and a variety of tours and activities. In summer, visitors can enjoy photo safaris, partial or full-day tours, horseback and stagecoach rides, and boating and fishing adventures. In winter, there are partial or full-day tours by heated snowcoach, skiing, and snowshoe adventures.

Reservations are available at park hotels and at:

- YellowstoneNationalParkLodges.com
- Reserve_YNP@Xanterra.com
- P.O. Box 165, Yellowstone NP, WY 82190

Launching, landing, or operating unmanned aircraft (drones) on lands and waters administered by the National Park Service is prohibited.
Watching wildlife
Watching wildlife in Yellowstone can be an amazing experience—unparalleled in the lower 48 states. All the large mammals present when Yellowstone became a park are here today: grizzly and black bears, wolves, mountain lions, elk, bison, pronghorn, moose, and bighorn sheep. You may also see a variety of birds, including bald eagles.

Looking for wildlife?
• To conserve energy, most animals are active in the cool of dawn or dusk.
• Animals are everywhere in the park, but it is easier to see them in open meadows and sagebrush than in dense forest.
• Find a place with a broad view for your binoculars or spotting scope, and be prepared to wait.

For your safety, and the safety of the animals please obey park rules:
• Stay at least 100 yards (91 m) away from bears and wolves, and at least 25 yards (23 m) away from all other wild animals.
• If an animal moves closer to you, you must move to maintain the appropriate distance.
• Do not surround, crowd, or disrupt an animal’s path of movement.
• If other visitors put you or wildlife in danger, leave the area and notify a park ranger.
• Spotlighting, or viewing animals with artificial light, is illegal.
• Calling to attract wildlife is illegal. You may not bugle to elk, howl at wolves, or make bird calls of any kind.
• Tracking wildlife with electronic equipment is not permitted.

Cell phone service
Cell phone service is very limited in the park and surrounding areas. General cell coverage areas are marked on the park map (back cover). Emergency 911 service by cell phone is only available in coverage areas. Text 911 is not available in Yellowstone. During peak hours and periods of heavy visitation, the cellular network may be very slow. Your provider may or may not roam on networks in Yellowstone. As a courtesy to others, please silence your mobile device while enjoying Yellowstone.

Wi-Fi
Wi-Fi is available to visitors at the Mammoth Hotel and the Old Faithful Snow Lodge, Lake Lodge cafeteria, and the Canyon and Grant lodges for a fee. The Horace M. Albright Visitor Center in Mammoth Hot Springs has free Wi-Fi. Data speeds are very limited outside of Mammoth Hot Springs.

Pet Tip Line • To report a crime or criminal activity please call 307-344-2132. Leave as much detail as you can. Remain anonymous, or leave a name and number.

Smoking is prohibited in geyser basins, on trails, in buildings, or within 25 feet (7.6 m) of entrances.

Store food securely
Do not feed any wildlife, including small mammals and birds. Consuming human food is unhealthy and encourages aggressive behavior that may require animals to be destroyed.

All food, trash, and scented items must be kept inaccessible to bears at all times. Tents, truck beds, and picnic tables are not secure. In some areas, ravens have learned how to unzip packs and scatter the contents.

None of these items, even if clean and empty, may be left unattended at any time:
• Water and beverage containers
• Cooking or eating utensils
• Stoves and grills
• Coolers and ice chests
• Garbage—bagged or not
• Food, including condiments, even if in containers
• Cosmetics and toiletries
• Pet food and bowls
• Pails, buckets, and wash basins

Pets
Pets are not allowed on trails or boardwalks, in the backcountry, or in hydrothermal basins. Where allowed, pets must be leashed and remain within 100 feet (30.5 m) of a road or parking area.

Do not leave a pet unattended, tied to an object, or without adequate food, water, shade, ventilation, or other basic needs. Owners must bag and dispose of pet waste. We recommend that someone in your group remain with your pet at all times to personally ensure their well being.
Make Memories to Last a Lifetime

Camping
NPS-operated campgrounds
Campsites are first-come, first-served at Mammoth, Norris, Indian Creek, Lewis Lake, Pebble Creek, Slough Creek, and Tower Fall. Arrive early to obtain a site, campgrounds fill quickly.

Reservable sites
Reserve sites at Canyon, Bridge Bay, Madison, and Grant Village through Yellowstone National Park Lodges at 307-344-7311.

Fishing Bridge RV Park is CLOSED for the 2019 season.

No overflow camping
There are no overflow camping areas available in Yellowstone. No camping or overnight vehicle parking is allowed in pullouts, parking areas, picnic grounds, or any place other than a designated campground. Additional camping may be available in neighboring communities.

Check-in and check-out
Registration desks at reservable campgrounds are open 7 AM to 10 PM during peak season, and 8 AM to 9 PM during early and late season. Check-out time is 11 AM.

Length of stay
Camping is limited to 14 days from July 1 through Labor Day (first Monday in September) and 30 days the rest of the year.

Discounts
Holders of Senior and Access passes receive a 50 percent discount on camping fees.

Quiet hours
From 10 PM to 6 AM, no loud audio devices or other noise disturbances are allowed.

Group camping
Group camping (tents only) is available at Madison, Grant, and Bridge Bay for organized groups with a designated leader. Fees range from $144.61 to $422.71 per night, depending on group size. Advance reservations are required at 1-307-344-5437 or ynpsa@xanterra.com.

Food storage boxes
Food storage boxes are available at each of the campsites at Indian Creek, Norris, Pebble Creek, Slough Creek, Tower Fall, and Lewis Lake campgrounds. Many camp sites in other campgrounds are also equipped with bear-proof storage boxes.

Backcountry camping

Overnight backcountry camping is allowed in designated sites and requires a permit. Permits can be obtained up to two days before the start of your trip at any backcountry office. Permits are free prior to Memorial Day. From Memorial Day through September 10, a per-person, per-night fee applies.

- Backpackers and boaters: $3 per-person per-night (group maximum $15 per night).
- Groups with stock animals: $5 per-person per-night.

Detailed information on backcountry permit fees and making advanced reservations is available online at www.nps.gov/yell/planyourvisit/backcountryhiking.htm

Horses, mules, and other stock animals

Traveling in the Yellowstone backcountry with horses, mules, or llamas is an exciting way to see the park. By their very nature, these large animals have the potential to leave great impacts on the land around them. Permits are required for both day rides and overnight trips. To obtain permits and plan a safe, enjoyable, low-impact trip, please contact a backcountry office or look online at www.nps.gov/yell/planyourvisit/horseride.htm

Fishing season

General fishing season opens May 25 and closes November 3, 2019. Some areas remain closed until July 15. Fishing permits are required in Yellowstone, state-issued fishing permits are not valid within the park. Anglers 16 years or older need a permit; younger children can fish for free with a permitted adult.

Fishing regulations in Yellowstone protect the unique values of the park ecosystem and conserve native fish species. Copies of the complete park regulations are available wherever permits are sold, and online at www.nps.gov/yell/planyourvisit/fishing.htm

Possession limits and closures vary throughout the park. Anglers are responsible for knowing the regulations in the area they are fishing. Anglers are also responsible for knowing how to tell the difference between species. Native fish must be released unharmed back into the water immediately. These include:

- Arctic grayling
- cutthroat trout
- mountain whitefish

These tackle and gear restrictions apply:

- Hooks must be barbless.
- Tackle and lures must be non-toxic. Lead tackle is not allowed.
- Bait is prohibited.
- Felt-soled footwear is not permitted.

Swimming

Park waters are swift and cold

- Swimming in hot springs or their runoff channels is prohibited.
- Swimming in park rivers is not recommended. Currents can be dangerously strong and fast.
- Swimming in Yellowstone Lake is not recommended. Average lake temperature is approximately 41º F (5º C).

Boating

The boating season opens May 25 and closes November 3, 2019. All watercraft (motorized boats, non-motorized boats, and float tubes) must have a permit and be inspected for aquatic invasive species (AIS) by park staff. Any watercraft suspected of harboring AIS will be subject to a non-chemical decontamination treatment.

Aquatic Invasive Species are nonnative plants and animals that can cause irreversible harm to the park ecosystem. New Zealand mudsnails, whirling disease, and lake trout have already resulted in loss of native fish and closure of some park areas.

Watercraft users and anglers are asked to inspect all items that may come in contact with park waters, ensuring that they are clean, drained, and dry.

Motorized boating is allowed on Lewis Lake and most of Yellowstone Lake. Only non-motorized boating is allowed on most other lakes. Only one river is open to non-motorized boating, the Lewis River channel between Lewis and Shoshone lakes.

If you plan to boat in the park, please familiarize yourself with Yellowstone National Park Boating Regulations. Copies are available online www.nps.gov/yell/planyourvisit/boating.htm and at backcountry offices.

Certain Boats Banned. Boats with sealed internal water ballast tanks are temporarily banned in the park to minimize the risk of introducing aquatic invasive species.

Boat permits & AIS inspection locations

Motorized & non-motorized boat permits & AIS inspections:
South Entrance Backcountry Office, Grant Village Backcountry Office, Bridge Bay Marina Ranger Station

Float tube only permits & AIS inspections:
Locations above, and also at Mammoth Backcountry Office, Canyon Backcountry Office, Old Faithful Backcountry Office, Northeast Entrance, Bechler Ranger Station
Day hiking

More than 1,000 miles of hiking trails wind through Yellowstone National Park. Whether you hike for half a mile or more than ten, the backcountry can be an escape from the crowds and a chance to get in touch with the wilderness that Yellowstone preserves.

Ask at any visitor center for brochures describing day hikes throughout the park. Remember to ask about any seasonal closures, trail conditions, or wildlife sightings when you plan your hike. Be prepared for wildlife encounters and carry bear spray on all hikes.

Most popular day hikes:
1. Mount Washburn, north of Canyon
2. Beaver Ponds, at Mammoth Hot Springs
3. Lone Star Geyser, near Old Faithful
4. Fairy Falls, north of Old Faithful
5. Storm Point, east of Fishing Bridge

Be prepared for bear encounters

Hiking in bear habitat has inherent risks. You are likely to be safer if you stay on roads and official trails but your safety cannot be guaranteed. Federal regulations require you to stay at least 100 yards (91m) away from bears.

Learn more about bears, safe bear viewing, and how to properly use bear spray at Experiencing Wildlife in Yellowstone, a free ranger program presented from Memorial Day to Labor Day at visitor centers throughout the park. See visitor centers for details.

Photography

Have reasonable expectations of your camera. A cell phone camera will not be able to capture the same resolution and detail as a more advanced camera with large lenses.

Arm yourself with patience. To get the best shot, you will spend more time waiting and observing than photographing. Look for patterns in animal behavior that can help you get a great shot. You may have to wait a while—so be ready.

Stay safe behind and in front of the camera. An unusual vantage point can add drama to your image, but you don’t want to add the drama of a hospital visit to your trip. Never sacrifice safety for a photograph.

• Be aware of your surroundings. Stay behind fences and guard rails. Never turn your back on wild animals.
• Keep children close to you at all times. Never try to pose them with wildlife.
• Stay out of the road. Do not stop your vehicle in the road, or stand in the roadway. Do not block any portion of the road with tripods, chairs, or other objects. Do not block the free flow of traffic.

Bicycling

Bicycling is permitted on paved roads, parking areas, and designated routes. Bicycles are subject to the same traffic rules as automobiles and are prohibited on trails and boardwalks.

Park roads are narrow and winding with few shoulders. Therefore, regulations require cyclists to ride single file and we strongly recommend wearing a helmet and high-visibility clothing.

Road elevations range from 5,300 to 8,860 feet (1,615 to 2,700 m), and services and facilities are far apart. During April, May, and June, high snowbanks may make travel more dangerous.

Find information on the park website or pick up the Bicycling in Yellowstone brochure at a visitor center or ranger station.

Bear spray rentals

Bear Aware LLC rents bear spray from May 25–September 30. The rental kiosk is located at the north end of the Canyon Visitor Education Center parking area.

Rentals include holster and belt, hiking safety information, and instructions on proper use of bear spray. Cost is $9.25 per day or $28.00 per week (3–7 days). Prices do not include tax. For more information visit bearaware.com.

Rental returns

Return items to the Canyon kiosk, Madison campground, park gas stations, or to the Cooke City Visitor Center.

Bear spray recycling

Bear spray cannot be taken on airplanes or thrown in the trash. Canisters can be recycled in the park at hotel front desks, general stores, backcountry offices, and ranger stations; also at some area camping stores, and the Bozeman airport.
Activities for young people

**Junior Ranger Program**
If you are age 4 or older, you can become a Yellowstone Junior Ranger. Stop by any visitor center to purchase a Junior Ranger activity booklet for $3. To earn your official Yellowstone Junior Ranger patch, you need to:

- Hike on a park trail or boardwalk.
- Complete the age-appropriate activities on geysers, wildlife, and park habitats.
- Attend a ranger-led activity—such as a talk, guided walk, or evening campfire program—and get the ranger’s signature.

Children and adults benefit by learning more about the natural wonders of the park and sharing the fun of becoming a Junior Ranger.

**Young Scientist Program**

Become a Young Scientist! Buy a self-guiding booklet for $5 at the Canyon Visitor Education Center (ages 10+) or Old Faithful Visitor Education Center (ages 3+). In the Old Faithful area, check out a Young Scientist Toolkit for the gear you need for your investigation. Once you finish, you will be awarded a Young Scientist patch or key chain.

Explore park heritage

Opportunities to connect to the past are everywhere in Yellowstone. Visit Mammoth Hot Springs to walk the self-guiding trail around Fort Yellowstone, which chronicles the U.S. Army’s role in protecting the park. Other historic sites include the Fishing Bridge Museum, the Museum of the National Park Ranger, Obsidian Cliff, and the Old Faithful Inn and Historic District.

**Removing or possessing** natural or cultural resources (such as wild-flowers, antlers, rocks, and arrowheads) is strictly prohibited.

The **Heritage and Research Center** (above) is located just beyond the North Entrance in Gardiner, Montana. This facility is home to Yellowstone’s museum collection, archives, research library, archeology lab, and herbarium. Although primarily a research facility, tours provide an inside look at some of the collections. Free tours are available Wednesdays at 2 PM, May 29 through September 4, 2019 (limit 15). For reservations, please call 307-344-2264.

**Yellowstone Forever Institute**

Programs about wildlife, plants, geology, and history are perfect for curious adults and families who want to spend a day or more exploring the park with a knowledgeable guide. To find out more, call 406-848-2400 or visit [Yellowstone.org](http://www.nps.gov/yell/planyourvisit/guidedtours.htm).

**Make the Most of Your Visit**

Yellowstone encompasses more than 2.2 million acres, most of it beyond the reach of roads. One could take an entire lifetime to experience the park—and you would still never see it all. Here are some suggestions for making the most of the time you do have.

**Tour early in the day to avoid crowds:** Most people tour the park from 10:00 AM to 6:00 PM. Wildlife are most active at sunrise and sunset; arriving before 8 AM improves your chances of observing animals during their active periods. Park entrance gates are open 24-hours.

**Visit a hidden gem:** Take a day hike, or stroll one of our historic walking tours at Fort Yellowstone or Old Faithful historic districts. You could even explore nearby national park units, national forests, state forests, and state parks. The entire region offers an amazing variety of public lands for recreation and enjoyment.

**Activities for young people**

**Make the Most of Your Visit**

Yellowstone encompasses more than 2.2 million acres, most of it beyond the reach of roads. One could take an entire lifetime to experience the park—and you would still never see it all. Here are some suggestions for making the most of the time you do have.

**Tour early in the day to avoid crowds:** Most people tour the park from 10:00 AM to 6:00 PM. Wildlife are most active at sunrise and sunset; arriving before 8 AM improves your chances of observing animals during their active periods. Park entrance gates are open 24-hours.

**Visit a hidden gem:** Take a day hike, or stroll one of our historic walking tours at Fort Yellowstone or Old Faithful historic districts. You could even explore nearby national park units, national forests, state forests, and state parks. The entire region offers an amazing variety of public lands for recreation and enjoyment.
Famously Hot Features

Yellowstone was established in 1872 as the world’s first national park primarily because of its unparalleled collection of geysers, hot springs, mudpots, and steam vents.

**Hot springs** are the most common hydrothermal features in the park. They vary from frothing mocha-like boiling water to clear and calm pools of tremendous depth.

**Mudpots** are acidic features with a limited water supply. Their consistency and activity vary with the seasons and precipitation.

**Fumaroles**, or steam vents, are the hottest hydrothermal features in the park. They are easier to see in cool weather.

**Travertine terraces** are found at Mammoth Hot Springs, where the interactions of water and limestone create chalk-white travertine.

**Geysers** erupt with steaming hot water. Variations in each geyser’s underground reservoir determine whether it is regular and predictable—like Daisy Geyser in the Upper Geyser Basin—or irregular like Steamboat Geyser in Norris Geyser Basin.

**How “faithful” is Old Faithful Geyser?**
Since its first documentation in 1870, Old Faithful has been one of the more predictable geysers. Over time, the average interval between Old Faithful’s eruptions has increased or decreased, due to changes in its plumbing from ongoing processes and earthquakes. The Hebgen Lake Earthquake (1959), caused an increase in the time between eruptions. The average interval between eruptions of Old Faithful Geyser, as of February 2019, is 98 minutes ± 10 minutes, with intervals ranging from 79 to 109 minutes.

**Where geology and biology thrive**
Descending of the first life forms to evolve on Earth live in the extremely hot, sometimes acidic, habitats in and around hydrothermal features. The heat-loving microorganisms, called **thermophiles**, survive and thrive in Yellowstone’s active volcanic environment.

Nourished by energy and chemical building blocks available in the hot springs, the microbes build vividly colored communities that vary depending on the types of microbes, the pH (acidity or alkalinity), temperature of the feature, and exposure to sunlight.

Millions of individual microbes can connect into long strands called filaments. Some filaments tangle, forming mats. Flowing water brings other microbes, organic matter, and minerals that add to the mat. Mats can be thin as tissue paper or thick as lasagna. Due to their fragility, they must not be touched.

Dozens of types of microbes from all three domains of life can exist in these mats, from Archea in the hottest, most acidic features to the more widespread Bacteria and Eukarya.

Scientists continue to study the many mysteries of thermophiles and their extreme habitats in the living laboratories of Yellowstone’s thermal areas and features.

How do geysers work?
Geysers are hot springs with narrow spaces in their plumbing, usually near the surface. These constrictions prevent water from circulating freely to the surface where heat would escape. The deepest circulating water can be more than twice as hot as the surface boiling point of 199° F (93° C).

The surrounding pressure also increases with depth, similar to the ocean. Increased pressure exerted by the enormous weight of the overlying rock and water prevents the water from boiling as it heats up.

As the water rises, steam forms. Bubbling upward, steam expands as it nears the top of the water column until the bubbles are too large and numerous to pass freely through the constrictions. At a critical point, the confined bubbles actually lift the water above, causing the geyser to splash or overflow. This decreases pressure on the system, and violent boiling results. Tremendous amounts of steam force water out of the vent, and the eruption begins.

Water is expelled faster than it can enter the geyser’s plumbing system, and the heat and pressure gradually decrease. The eruption stops when the water reservoir is exhausted or when the system cools.

Yellowstone’s geyser basins contain fountain-type geysers and cone-type geysers. Fountain-type geysers shoot water out in various directions from a pool of water. Cone-type geysers, like Lone Star Geyser (photo above) erupt in a concentrated jet of water from inside a rock formation.

Stay on boardwalks and designated trails. Do not touch any thermal features and keep foreign objects out of springs.
Within the herd

Yellowstone is the only place in the United States where bison have lived continuously since prehistoric times. Yellowstone bison are special because they are America’s largest bison population on public land and have not been hybridized through interbreeding with cattle.

Bison eat primarily grasses and sedges and are well-suited to both prairies and forests. With adult males weighing up to 2,000 pounds (907 kg), the bison is the largest land mammal in North America. This iconic ungulate is the National Mammal of the United States.

Yellowstone bison herds exhibit wild behavior, like their ancient ancestors. The herd is comprised of cows, calves, and some younger bulls. Mature bulls spend most of the year alone or with other bulls—except during the rut, or mating season. During the rut in July and August, mature males display their dominance by bellowing, wallowing, and fighting with other bulls. The winners earn the right to mate with receptive females.

After a gestation period of 9 to 9 1/2 months, calves are born in late April and May. Their orange fur makes them easy to see, even from a distance, and has earned them the nickname “red dogs.” Look for bison in open country along the Lamar, Yellowstone, Firehole, and Madison rivers.

Bison or buffalo?

In North America, both “bison” and “buffalo” refer to the American bison (Bison bison). Generally, “buffalo” is used informally; “bison” is preferred for formal or scientific purposes. Early European explorers called this animal by many names. Historians believe that the term “buffalo” grew from the French word for beef, boeuf. American bison are a different genus than other buffalo in the world.

Bringing up bear cubs

Both grizzly and black bear cubs are born in the deep winter months, while their mother hibernates. In April and May, they begin to venture out with their mother as she digs for roots, insects, and squirrels. Cubs stay with their mother for two to three years before striking out on their own.

Look for black bears along the edges of wooded areas in the Lamar and Hayden valleys, or among the trees near Mammoth and Tower. Grizzly bears are usually seen in open areas. (See page 6 for information about safely recreating in bear country.)

Keep your distance

Stay at least 100 yards (91m) away from bears and wolves, and at least 25 yards (23 m) away from all other wild animals.

Pack mentality

Yellowstone National Park is the site of one of the most ambitious and controversial wildlife restoration projects in the world. The Yellowstone Wolf Project has yielded more than two decades of discoveries on wolf behavior, predator–prey relationships, wildlife disease management, and ecological complexity.

The stark white backdrop of snow and the general absence of leaf cover make winter an ideal time for visitors and researchers alike to observe wildlife. From the popular overlooks of Lamar Valley, it is possible to get a glimpse of wolf society. You may even witness the dangerous dance of predators and prey as each struggles to survive.
The Upper Geyser Basin, home of Old Faithful, hosts the majority of the world’s active geysers. The concentration of hydrothermal features here provides ample evidence of Yellowstone’s active volcano.

Partially molten rock, or magma, from this volcano may be as close as 3–8 miles (5–13 km) below your feet. Magma provides the first key ingredient for creating thermal features: heat. Rain and snow eventually supply the second ingredient: water. The water seeps down several thousand feet (more than a kilometer) below the surface where it is heated. Underground cracks and earthquake faults form the third ingredient: a natural “plumbing” system. Super-heated water rises through the plumbing to produce hot springs and geysers.

Old Faithful erupts more frequently than any of the other big geysers, although it is not the largest or most regular geyser in the park. During summer, rangers forecast eruption times for six major geysers. (Five are here; the sixth—Great Fountain—is in the Lower Geyser Basin north of Old Faithful.) However, a geyser’s pattern of eruptions may change at any time.

Forecasted eruption times are posted in the Visitor Education Center and in many of the area facilities. You can also call 307-344-2751 (option 2), access predictions on the Yellowstone National Park app, or check the @GeysersNPS Twitter feed.

Stay on boardwalks and designated trails. Do not touch any thermal features and keep foreign objects out of springs.

Public restrooms located in all visitor centers, stores, restaurants, hotels, gas stations, and at or near all picnic areas.

Recycling bins are located in the parking lot near the yurts, near trash bins at the General Stores, and in the parking lot near the Visitor Education Center.
The Lower Falls of the Yellowstone River. The Grand Canyon of the Yellowstone River illustrates the park’s complex geologic history in dramatic colors and shapes. The Upper and Lower Falls of the Yellowstone River add to the grandeur of this unique natural treasure.

This canyon formed when hydrothermal activity altered and weakened the bedrock, making the stone softer. The Yellowstone River eroded the weakened rocks to deepen and widen the canyon.

The 308-foot (93 m) Lower Falls marks the point where the volcanic bedrock beneath the river changes from hard rock, resistant to erosion, to the hydrothermally altered rocks common downstream. The 109-foot (33 m) Upper Falls marks a similar shift. The multi-hued layers of the canyon result from the hydrothermally altered rhyolite and sediments. Look closely at dark orange, brown, and green areas near the river for still-active hydrothermal features. Their activity—and that of water, wind, and earthquakes—continue to sculpt the canyon today.

Stay on designated trails. Stay behind barrier walls and keep back from the canyon edge.

Check locally for closures and re-routing due to construction.
Yellowstone Lake is the largest high-elevation lake (above 7,000 ft) in North America, covering 286 square miles, with an average depth of 138 feet. The only outlet of the lake is at Fishing Bridge, where the Yellowstone River flows north. The lake is covered by ice from mid-December to May or June.

Powerful geologic processes shaped the shoreline of Yellowstone Lake, which overlies the edge of the Yellowstone caldera. Glacial activity and volcanic events carved the central basin and ragged shores. A pyroclastic explosion created the West Thumb basin 174,000 years ago. Many of the area’s 1,000 to 3,000 annual earthquakes occur under Yellowstone Lake, causing uplift and subsidence events which continue to reshape the water’s edge.

Yellowstone Lake is also the site of one of the most extensive conservation efforts in the National Park Service. Park staff work to reduce the impact of invasive lake trout (Salvelinus namaycush) on the survival of the native population of cutthroat trout (Oncorhynchus clarkii bouvieri).

Mammoth Hot Springs terraces are like living sculptures, shaped by the volume of water, the slope of the ground, and objects in the water’s path. Travertine builds up rapidly here and causes the features to change quickly and constantly. Some vents will clog completely, new vents may form, and old vents may reopen. Sometimes the water is concentrated in a few springs while at other times it may spread across many outlets.

In every case, water follows the path of least resistance, whether above ground or underground. Scientists estimate that, at any given time, only about 10 percent of the water in the Mammoth Hot Springs system is on the surface. The features are always changing, but the overall activity of the entire area and the volume of water discharge remain relatively constant. Here, as in few other places on earth, rock forms before your eyes.

Stay on boardwalks and designated trails. Do not touch any thermal features and keep foreign objects out of springs.

Fort Yellowstone

For the decade after Yellowstone National Park was established in 1872, the park was under serious threat from those who would exploit, rather than protect, its resources. In 1886, the U.S. Army stepped in to help.

The buildings of Fort Yellowstone are a testament to the long history of our first national park and of the important role the Army played in preserving it for the future. They remind us that the resources we find within Yellowstone’s boundaries are not only natural ones, but cultural as well. Our interactions with this wilderness continue to shape our idea of what a national park should be, just as they did during the days of Fort Yellowstone.

Yellowstone National Park was designated a UNESCO World Heritage Site in 1978, because it protects significant geological phenomena and processes. It is also a unique manifestation of geothermal forces, natural beauty, and wild ecosystems where rare and endangered species can thrive. As one of the few remaining intact large ecosystems in the northern temperate zone, Yellowstone’s ecological communities provide unparalleled opportunities for conservation, study, and enjoyment of large-scale wildland ecosystem processes.

Yellowstone is un lugar peligroso

Mantenga distancia de los animales
- No se acerque ni alimente a ningún animal.
- Los bisontes, los osos y los alces han herido y matado personas.
- Manténgase a 100 yardas (91 m) de osos y lobos.
- Manténgase a 25 yardas (23 m) de todos los demás animales.
- Nunca corra si ve a unoso.
- Camine en grupos, haga ruido y lleve gas pimienta para osos.

Sea prudente en las zonas termales
- Permanezca en los paseos marítimos y en los senderos.
- El agua caliente puede causar graves quemaduras o la muerte.
- Nunca corra ni empuje.
- Supervise a los niños en todo momento.
- No está permitido fumar en las cuencas de los géiseres ni en los edificios.

Usted es responsable de su seguridad.

Yellowstone presente de multiples dangers

Restez à distance des animaux
- Ne vous approchez pas et ne nourrissez pas les animaux.
- Les bisons, les ours, et les wapitis ont déjà été à l'origine de blessés et de morts.
- Restez à 100 yards (91 m) des ours et des loups.
- Restez à 25 yards (23 m) de tous les autres animaux.
- Ne courez jamais devant un os.
- Restez en groupe lors des randonnées, faites du bruit, et conservez un vaporisateur de gaz poivré sur vous.

Soyez prudent(e) dans les zones thermales
- Restez sur les passages en bois et les sentiers.
- L'eau très chaude peut provoquer des blessures graves ou entraîner le décès.
- Soyez attentif / attentive à ne jamais courir, vous pousser ou vous bousculer.
- Surveillez constamment les enfants.
- Il est interdit de fumer dans les bassins des géysers et les bâtiments.

Vous êtes responsable de votre sécurité.

Der Yellowstone-Park ist gefährlich

Halten Sie sich von Tieren fern
- Nähern Sie sich keinen Tieren an und füttern Sie sie nicht.
- Bisons, Bären und Elche haben in der Vergangenheit Menschen verletzt und getötet.
- Bleiben Sie 100 Yard (91 m) von Bären und Wölfen entfernt.
- Bleiben Sie 25 Yard (23 m) von allen anderen Tieren entfernt.
- Laufen Sie niemals von einem Bären weg.
- Wandern Sie in einer Gruppe, machen Sie Lärm und tragen Sie ein Bärenspray bei sich.

Vorsicht in Thermalbereichen
- Bleiben Sie auf Geh- und Wanderwegen.
- Das heiße Wasser kann zu schweren Verbrennungen oder Tod führen.
- Niemals laufen, schubsen oder stoßen.
- Achten Sie stets auf Ihre Kinder.
- Rauchen ist nicht gestattet in Geyserbereichen oder Gebäuden.

Sie sind für deren Sicherheit verantwortlich.

Национальный парк Йеллоустоун опасен.

• Перемещайтесь только по дощатым настилам и оборудованным тропам.
• Не бросайте в гидротермальные объекты предметы, в том числе монеты и мелкие камни.
• Не курите в зданиях и гейзеровых бассейнах.
• Не прикраймливайте диких животных и птиц.
• В соответствии с законом все посетители должны держаться на расстоянии не менее 91 м (100 ярдов) от медведей, волков и не менее 23 метров (25 ярдов) от других животных, включая бизонов, олени и койотов.

Yellowstone est pericolosa

• Percorriamo le passerelle e i sentieri.
• Non lanciate oggetti, come monete e sassolini, nelle formazioni idrotermali.
• È vietato fumare nei bacini dei geyser o negli edifici.
• Non date da mangiare agli animali selvatici o avvicinarli.
• La legge richiede che tutti i visitatori restino ad almeno 91 metri (100 iarde) da orsi e lupi, e ad almeno 23 metri (25 iarde) da tutti gli altri animali, inclusi bisonti, renne e coyote.

You are responsible for your safety.
