**About the Road Projects**

All these projects are part of a multi-year commitment to upgrade park roads—many of which are more than 80 years old. Gibbon Canyon (1 on the map) is particularly challenging due to the terrain and because the park is relocating part of the road. The new route will cross the Gibbon River on a new bridge, then climb up and along the rim of Gibbon Canyon where visitors will enjoy new views and new picnic areas. In addition, the Gibbon Falls Overlook is being improved. The road had to be closed early this year so that the new bridge could be constructed. If all goes well, the new route will be completed in 2010.
