	[™] Alte	ered 🗂	Unaltered		Moved	Original Site	

This board and batten, steep roofed building was erected in 1879 as a chapel. It was a simple structure, small in size and with a steeple. Since its building, the chapel has been enlarged with the addition of rear rooms. It is now L-shaped. It was moved from its original site at the beginning of the Four Mile Trail in 1901 to its present location, and at that time it was apparently placed on a stone foundation. Around 1965 this foundation was raised about 3 feet to its present height. The building contains 1,470 square feet.

The chapel, which seats 250, was sponsored by the California State Sunday School Association and built at a cost of three to four thousand dollars. Funds were raised by voluntary donation from children and prominent members of the Association.

Mr. Charles Geddes, a leading architect of San Francisco, made and presented the plans. The building was erected by Mr. E. Thompson of San Francisco in the summer of 1879.

The organ was donated in memory of Miss Florence Hutchings, the first white child born in Yosemite, who died September 22, 1881.

The chapel was established for the free use of persons of every faith and has been in continuous use since its dedication.

Boundary:

Begin at Benchmark 3965 (500' SW of Sentinel Bridge) travel 200° for 400', then 302° for 100', then 32° for 100', then 32° for 100', then 122° for 100' then 212° for 100'.

Significance: 2nd Order

Acreage: 1.0 acre

Recommended treatment: Preservation

Preliminary cost estimate for above: When accomplished, the Historic Resource Study for Yosemite National Park may indicate the need for a Historic Structure Preservation Guide for the Yosemite Valley Chapel.

į
