

2012 Yosemite Forum

Sponsored by Resources Management and Science, Yosemite National Park

An interactive lecture series designed to bring evolving knowledge of the Sierra Nevada to the public and the park.

How do Resource Managers Make the Right Decisions in the Face of Climate Change

**DEBRA SCHLAFMANN, CALIFORNIA LANDSCAPE
CONSERVATION COOPERATIVE (CA LCC) COORDINATOR**

Natural resource managers who care for our treasured ecosystems such as national parks, marine sanctuary's and/or wildlife refuges are witnessing changes in the environment never before seen. Considering these changes, managers need to know how to adapt their management actions recognizing that striving for historic conditions may no longer be feasible. Providing forecasts of environmental stressors, like climate change, in a manner and scale that is useful to resource managers is essential for making smart decisions. The recently formed California LCC has funded projects to meet needs of resource managers and some examples will be presented.

**Tuesday, April 10, 2012
Auditorium, Yosemite Valley
Noon to 1 p.m.**

Yosemite Forum is a partnership among:

- ☞ Yosemite National Park, Resources Management and Science Division
- ☞ USGS, Western Ecological Research Center, Yosemite Field Station
- ☞ University of California, Sierra Nevada Research Institute
- ☞ The Yosemite Conservancy
