

Stock Site Evaluation Project
Pate Valley Trail Camp

Yosemite National Park
California

National Park Service
U.S. Department of the Interior

Forage Area: There is very limited understory forage at this site. There is a meadow area north of the river. However, grazing is not allowed in this meadow until the large amount of invasive plants (velvet grass) have been eradicated. This meadow also is a sensitive resource area and stock use has the potential to cause impacts.

Pate Valley Trail Camp

Camp ID: 69
Fire Ring: 271,988mE x 4,201,327mN
Handling Practices: This site is in Pate Valley close to the footbridge over the Tuolumne River. The access route heads north 20 m from the NPS system trail to the fire ring, which is also approximately 130 m south of the footbridge. The unloading area is at the fire ring. The holding area is 30 m south of the trail. Do not camp or hold stock in the sensitive resource area indicated on the map due to concerns about stock use causing potential impacts.
