

Stock Site Evaluation Project
Dorothy Lake East, West, Southeast, and Peninsula

Yosemite National Park
California

National Park Service
U.S. Department of the Interior

Forage Area: For the three camps on the west side of the lake there are multiple meadows and understory grazing. For the camp on the east side of the lake there are small meadows and understory. Avoid use of sensitive resource areas indicated on map.

Dorothy Lake - West

Camp ID: 100
Fire Ring: 272,754mE x 4,228,263mN
Handling Practices: Preferred use as drop camp only, due to concerns about stock use causing potential impacts to sensitive resources on or near this site. Use signed access route. The unloading area is next to the fire ring. Hold stock in area southwest of site following NPS system trail and access route shown on map.

Dorothy Lake - Southwest

Camp ID: 101
Fire Ring: 272,853mE x 4,228,096mN
Handling Practices: Do not use this camp if other camps are available. Do not hold stock here due to concerns about stock use causing potential impacts to sensitive resources on or near this site.

Dorothy Lake - East

Camp ID: 134
Fire Ring: 273,317mE x 4,228,847mN
Handling Practices: This camp will support small groups but has limited forage. The access route diverges from the NPS system trail and heads up the slope north between two bedrock outcrops 50 m to the fire ring. The unloading area is at the fire ring. The holding area is up the slope 25 m to the northwest.

Dorothy Lake - Peninsula Camp

Camp ID: 144
Fire Ring: 273,011mE x 4,228,297mN
Handling Practices: This is the preferred camp. Follow signed access route to camp. Unload stock at fire ring. Holding area is down the slope 20 m to the south of the fire ring. Do not use camp until seasonal pond used as holding area is dry and able to support stock with minimal soil disturbance.
