In non-developed areas, the disposal of human waste within 100 feet of a water source, high water mark of a body of water, a campsite, or within sight of a trail is prohibited (36CFR 2.14). The preferred option for human waste disposal is a removal system such as a ["Restop 2."](#) If a removal system is unavailable a 4- to 8-inch deep "cat hole" can be used. Toilet paper must be carried out.
- Take only pictures - leave no evidence of your visit.
- All food scraps (fruit peels, nut shells, etc.) are considered trash and must be disposed of properly. It is a violation to feed the wildlife, including squirrels.

Participants should also respect signs or other obvious indications that an area is being revegetated or restored – staying on designated pathways or hardened surfaces.
