## ***COPYRIGHT AND RESTRICTIONS***

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

## ***HISTORY***

Lee Land Exchange Survey Resource Management Project Number 99-04, SHPO  
Project Number U98NA0736b

The Lee Land Exchange Survey, Resource Management Project Number 99-04, was conducted between October, 1998-April, 1999. The project intended to exchange approximately 2,000 acres of Bureau of Land Management (BLM) administered land for 1,250 acres of private land within Zion National Park. This investigation focused on the identification of cultural resources within the area of potential effect; the evaluation of identified resources against the eligibility criteria for inclusion to the National Register of Historic Places; and an assessment of effects to historic properties that could result from the proposed undertaking. 43 archeological sites and 68 isolated finds were recorded. Three of the sites contained historic period components, related to ranching and livestock grazing in the area. Additionally, two loci of previously recorded site 42Ws 1813 were identified and recorded. One of the newly recorded sites, 42Ws 3769 was evaluated as being eligible for inclusion to the National Register of Historic Places, under criterion D. The remaining sites were recommended to be ineligible for inclusion to the National Register.
